Representing the Past in the Art of the Long Nineteenth Century Matthew C. Potter, 2021-09-30 This edited collection explores the intersection of historical studies and the artistic representation of the past in the long nineteenth century

The case studies provide not just an account of the pursuit of history in art within Western Europe but also examples from beyond that sphere These cover canonical and conventional examples of history painting as well as more inclusive popular and vernacular visual cultural phenomena General themes explored include the problematics internal to the theory and practice of academic history painting and historical genre painting including compositional devices and the authenticity of artefacts depicted relationships of power and purpose in historical art the use of historical art for alternative Liberal and authoritarian ideals the international cross fertilisation of ideas about historical art and exploration of the diverse influences of socioeconomic and geopolitical factors This book will be of particular interest to scholars of the histories of nineteenth century art and culture

Mood and Mobility Richard Coyne, 2024-05-21 An argument that as we engage with social media on our digital devices we receive modify intensify and transmit moods We are active with our mobile devices we play games watch films listen to music check social media and tap screens and keyboards while we are on the move In Mood and Mobility Richard Coyne argues that not only do we communicate process information and entertain ourselves through devices and social media we also receive modify intensify and transmit moods Designers practitioners educators researchers and users should pay more attention to the moods created around our smartphones tablets and laptops Drawing on research from a range of disciplines including experimental psychology phenomenology cultural theory and architecture Coyne shows that users of social media are not simply passive receivers of moods they are complicit in making moods Devoting each chapter to a particular mood from curiosity and pleasure to anxiety and melancholy Coyne shows that devices and technologies do affect people's moods although not always directly He shows that mood effects are transitional different moods suit different occasions and derive character from emotional shifts Furthermore moods are active we enlist all the resources of human sociability to create moods And finally the discourse about mood is deeply reflexive in a kind of meta moodiness we talk about our moods and

have feelings about them Mood in Coyne s distinctive telling provides a new way to look at the ever changing world of ubiquitous digital technologies *Architecture and Science-Fiction Film* David T. Fortin,2016-12-05 The home is one of our most enduring human paradoxes and is brought to light tellingly in science fiction SF writing and film However while similarities and crossovers between architecture and SF have proliferated throughout the past century the home is often overshadowed by the spectacle of otherness The study of the familiar home within the alien SF creates a unique cultural lens through which to reflect on our current architectural condition SF has always been linked with alienation however the conditions of such alienation and hence notions of home have evidently changed There is often a perceived comprehension of the familiar that atrophies the inquisitive and interpretive processes commonly activated when confronting the unfamiliar Thus by utilizing the estranging qualities of SF to look at a concept inherently linked to its perceived opposite the home a unique critical analysis with particular relevance for contemporary architecture is made possible *Binding Space: The Book as Spatial Practice* Marian Macken,2018-04-17 Books orient intrigue provoke and direct the reader while editing interpreting encapsulating constructing and revealing architectural representation Binding Space The Book as Spatial Practice explores the role of the book form within the realm of architectural representation It proposes the book itself as another three dimensional complementary architectural representation with a generational and propositional role within the design process Artists books in particular that is a book made as an original work of art with an artist designer or architect as author have certain qualities and characteristics quite different from the conventional presentation and documentation of architecture Paginal sequentiality the structure and objecthood of the book and the act of reading create possibilities for the book as a site for architectural imagining and discourse In this way the form of the book affects how the architectural work is conceived constructed and read In five main sections Binding Space examines the relationships between the drawing the building and the book It proposes thinking through the book as a form of spatial practice one in which the book is cast as object outcome process and tool Through the book we read spatial practice anew **Transforming Curriculum Through Teacher-Learner Partnerships** Nair, Pradeep,Keppell, Michael James,Lim, Chee Leong,Mari, TamilSalvi,Hassan, Nurhanim,2020-12-11 Empowering learners for life requires a fundamental shift in higher education curriculum design New priorities pedagogies technologies spaces and assessment strategies are required to enable learners to take ownership of their learning Student centeredness concepts are still prescriptive in nature as most decisions on curriculum assessment teaching and learning approaches are still teacher centric Teachers are developing student centered learning environments without the involvement of the learners in the planning decision making and or design process In addition some lecturers are still practicing the traditional approaches of content delivery and conventional assessment methods rather than experimenting with innovative practices suited for student centered approaches Therefore there is an ongoing need for research focused on the importance and effectiveness of a paradigm shift in education that involves student teacher

partnerships fueled by innovative teaching and learning designs where students take an active role and contribute as partners in learning Transforming Curriculum Through Teacher Learner Partnerships captures experiences and evidence among teachers in exploring the possibility of active student participation in curriculum design delivery and assessment through teacher learner partnership The chapters address issues of teacher learner partnerships in designing the learning environment and how student centered methods create resilient adaptable and future capable learners While highlighting topics within this scope such as learner autonomy learning performance self efficacy and teaching pedagogy this book is ideally intended for teachers administrators teacher educators practitioners stakeholders researchers academicians and students interested in issues related to the teacher learner partnership

The Routledge Companion to Creativity Tudor Rickards, Mark A. Runco, Susan Moger, 2008-11-19 Creativity can be as difficult to define as it is to achieve This is a complex and compelling area of study and this volume is perfectly poised to explore how creativity can be better understood and used in a range of contexts The book not only centres on creativity in wider organizational theory but also defines the conditions in which creativity can flourish and assesses how the contemporary business environment has an impact on creative solutions The volume grounds the concept of creativity in a sound theoretical framework and explores issues of practical and theoretical consequence covering a range of themes including innovation and entrepreneurship creativity and design environmental influences knowledge management meta theories of creativity personal creativity structured interventions Comprising contributions written by an unusually wide array of leading creativity scholars The Routledge Companion to Creativity is an insightful and cutting edge resource It is an essential purchase for anyone with an interest in creativity from a business psychology or design perspective

Costumers at Work: The Collaborative Creativity, Emotional Labour, and Technical Skill of Costume

Creation Madeline Taylor, 2025-06-23 *Costumers at Work: The Collaborative Creativity, Emotional Labour, and Technical Skill of Costume Creation* explores the various forms of work carried out in the costume workshop by the myriads of skilled professionals who transform ideas and sketches into the wearable costumes seen on stage. Costume work as collective, collaborative, and material labour produced by a predominantly female workforce has been long overlooked by the performance industry and those who study it. This book exposes the inherent tensions between theatre's strict hierarchies and collaborative ideology and how these inform the structures negotiated day to day by costumers as they carry out their work. Through close attention to their work, the book establishes costumers' work as collaborative and complex: a creative and emotional labour that contributes to enhanced storytelling, actor performance, and audience experience. Using extensive ethnographic observation conducted over 14 months at three professional theatre costume workshops around Australia, combined with extant interviews and research from across the globe, *Costumers at Work* provides explicit theories and guidance about the behaviours, skills, and communication modes that make costume collaboration more effective and enjoyable. This book is written for costume researchers, practitioners, and students of theatrical costume design and construction, along with theatre scholars broadly.
