Explorations in Consumer Culture Theory John F. Sherry, Eileen Fischer, 2008-11-24 The literature of marketplace behaviour long dominated by economic and psychological discourse has matured in the last decade to reveal the vast expanse of consumption activity not adequately addressed in either theoretical or empirical perspective by the discipline's favoured approaches The lived experience of consumption in cultural and historical context rendered in a fashion that is both intellectually insightful and authentically evocative and that recognizes the dynamics of accommodation and resistance that characterize the individual's relationship with the market is the central interpretive thrust of an emerging interdisciplinary field inquiry broadly labelled consumer culture theory In this volume some of the leading scholars of this field explore in great empirical detail and theoretical depth the relationships that the consumer has developed both with goods and services and with the stakeholders that animate markets Beginning with an examination of the underpinnings of cultural inquiry the focus then shifts to specific consumption venues Analyses of advertising in personal critical and historical perspective examination of lifestyle trends from dwelling practices of transnational nomads and regimes of personal training to genetic testing and gambling interpretations of the dynamics of brand loyalty and corporate image management and

investigation of family consumption rituals are among the topics explored in ethnographic and humanistic perspective

The Ethical Consumer Rob Harrison, Terry Newholm, Deirdre Shaw, 2005-03-15 This book is not simply the best book on the remarkable phenomenon of today's ethical consumer. It is a gift of advice and insight from the people that know best to the cause of tomorrow. Many of the writers deserve the plaudits of being pioneers of a new consumer movement. These are the issues of our time. Ed Mayo, Chief Executive of the UK's National Consumer Council (NCC). Who are ethical consumers and why are they on the rise? Leading the way towards answering this question, *The Ethical Consumer* is an indispensable introduction to the subject. Exploring areas like boycotts and fair trade projects, it gathers together the diverse experiences of scholars, campaigners and business practitioners from the international community. The chapters in this book explore ethical consumer behaviours, motivation and narratives, the social, political and theoretical contexts in which ethical consumers operate, the responsibilities of businesses and the effectiveness of ethical consumer actions. Contributions are informed by a broad range of research methods from case studies, focus groups to surveys and interviews. The text is of interest to business-related graduates, undergraduates and their tutors on courses relating to consumption. It will also be relevant to academics in other disciplines as well as to politicians, producers, practitioners, campaigners and not least consumers. **Understanding**

Children as Consumers David Marshall, 2010-04-19 What drives children as consumers? How do advertising campaigns and branding affect children and young people? How do children themselves understand and evaluate these influences? Whether fashion, toys, food, branding, money from TV adverts and the supermarket aisle to the internet and peer trends, there is a growing presence of marketing forces directed at and influencing children and young people. How should these forces be understood and what means of research or dialogue is required to assess them? With critical insight, the contributors to this collection take up the evaluation of the child as an active consumer and offer a valuable rethinking of the discussions and literature on the subject. Features 14 original chapters from leading researchers in the field. Each chapter contains vignettes or case examples to reinforce learning. Contains consideration of future research directions in each of the topics that the chapters cover. This book will be relevant reading for postgraduates and advanced undergraduates with an interest in children as consumers, consumer behaviour and on marketing courses in general as well as for researchers working in this field. *Handbook of Qualitative Research Methods in Marketing* Russell W.
