Environment and Humanities An Interdisciplinary Discourse seeks to explore this nexus offering a platform for dialogue between the sciences and the humanities recognizing that both are essential to confronting our shared environmental crises This book is the result of a collaborative effort to bridge the gap between these traditionally distinct fields The research papers contained within provide diverse perspectives on how human values ethics and historical experiences shape our relationship with the environment and in turn how environmental changes influence cultural and societal transformations We believe that engaging with environmental issues from an interdisciplinary viewpoint is not just beneficial but necessary for fostering the kinds of solutions that are both sustainable and equitable The contributions of scholars from various disciplines literature philosophy history anthropology psychology and environmental studies demonstrate the vast range of human experience that is intricately tied to the land water air and ecosystems around us Through this dialogue we aim to illustrate how environmental concerns can no longer be viewed through a single lens but must be understood as a complex and dynamic web of social ethical and ecological factors Ultimately Environment and Humanities calls for a reevaluation of how humanity perceives its place within the natural world By fostering an interdisciplinary discourse we hope to inspire new ways of thinking both within academic circles and in broader society toward a more responsible and compassionate coexistence with our planet

[Reading the Environment](#) Dominika Oramus, 2025-09-04 *Reading the Environment* Olga Tokarczuk's *Fiction* aims at analysing the dynamics of reading fiction in the context of accelerating climate change. This volume proposes an environment oriented model of reading and applies it to a well defined corpus: all existing English translations of Olga Tokarczuk's fiction. These are *Primeval and Other Times*, *House of Day*, *House of Night*, *Drive Your Plow Over the Bones of the Dead*, *Flights*, *The Books of Jacob* and *The Empusium*. Removed from the immediate cultural context of a single author, these novels give a representative sample of contemporary literature read by Anglophone people of diverse national backgrounds who live in different localities but share one endangered planet, whether they realise it or not. The book charts five ways in which our reading protocols have shifted: the way of interconnectedness, the way of nature/cultures, the way of sympoiesis, the way of Earth Island and the way of the beginning of the Anthropocene. This book is written for an academic audience: postgraduates, researchers and academics specializing in Environmental Humanities, Ecocriticism, World Literature, Post Modern Literature and Climate Fiction. **Companion to Environmental Studies** Noel Castree, Mike Hulme, James D. Proctor, 2018-05-01 *Companion to Environmental Studies* presents a comprehensive and interdisciplinary overview of the key issues, debates, concepts, approaches and questions that together define environmental studies today. The intellectually wide ranging volume covers approaches in environmental science all the way through to humanistic and post natural perspectives on the biophysical world. Though many academic disciplines have incorporated studying the environment as part of their curriculum, only in recent years has it become central to the social sciences and humanities rather than mainly the geosciences. The environment is now a keyword in everything from fisheries science to international relations to philosophical ethics to cultural studies. The Companion brings these subject areas and their distinctive perspectives and contributions together in one accessible volume. Over 150 short chapters written by leading international experts provide concise, authoritative and easy to use summaries of all the major and emerging topics dominating the field, while the seven part introductions situate and provide context for section entries. A gateway to deeper understanding is provided via further reading and links to online resources. *Companion to Environmental Studies* offers an essential one stop reference to university students, academics, policy makers and others keenly interested in the environmental question, the answer to which will define the coming century.
