Exile In The Middle Ages Proceedings:

Exile in the Middle Ages Laura Napran, Elisabeth M. C. Van Houts, 2004 Exile in the Middle Ages took many different forms As a literary theme it has received much scholarly attention in the Latin Greek and vernacular traditions The historical and legal phenomenon of exile is relatively unexplored territory In the secular world it usually meant banishment of a person by a higher authority for political reasons resulting in the exile leaving home for a shorter or longer period Sometimes an exile did not wait to be expelled but left of his or her own accord Leaving home to go on pilgrimage or in the case of women to marry could be experienced as a form of exile In the ecclesiastical sphere two forms of exile stand out Monasticism was often seen as a form of spiritual permanent exile from the secular world Excommunication was a punishment exercised by the Church authorities in order to eject persons often only temporarily from the community of Christians Banishment as a form of social punishment is therefore the central theme of this volume on Exile in the Middle Ages The book covers the period of the central Middle Ages from ca 900 to ca 1300 in Western Europe though some chapters have a wider remit The genesis of the volume was a series of presentations delivered at the Leeds International Medieval Congress in 2002 which was devoted to the theme of Exile

Law and Order in Anglo-Saxon England Thomas Benedict Lambert, 2017 Law and Order in Anglo Saxon England explores English legal culture and practice across the Anglo Saxon period beginning with the essentially pre Christian laws enshrined in writing by King Aethelberht of Kent in c 600 and working forward to the Norman Conquest of 1066 It attempts to escape the traditional retrospective assumptions of legal history focused on the late twelfth century Common Law and to establish a new interpretative framework for the subject more sensitive to contemporary cultural assumptions and practical realities The focus of the volume is on the maintenance of order what constituted good order what forms of wrongdoing were threatening to it what roles kings lords communities and

individuals were expected to play in maintaining it and how that worked in practice Its core argument is that the Anglo Saxons had a coherent stable and enduring legal order that lacks modern analogies it was neither state like nor stateless and needs to be understood on its own terms rather than as a variant or hybrid of these models Tom Lambert elucidates a distinctively early medieval understanding of the tension between the interests of individuals and communities and a vision of how that tension ought to be managed that strikingly treats strongly libertarian and communitarian features as complementary Potentially violent honour focused feuding was an integral aspect of legitimate legal practice throughout the period but so too was fearsome punishment for forms of wrongdoing judged socially threatening Law and Order in Anglo Saxon England charts the development of kings involvement in law in terms both of their authority to legislate and their ability to influence local practice presenting a picture of increasingly ambitious and effective royal legal innovation that relied more on the cooperation of local communal assemblies than kings sparse and patchy network of administrative officials

Peacemaking and the Restraint of Violence in High Medieval Europe Simon Leboutteiller,Louisa Taylor,2023-10-04 The High Middle Ages have been seen as an important point within the development of governmental and administrative bureaucracy as well as a time in which there was frequent conflict This volume addresses the methods by which violence was regulated and mitigated and peaceful relations were re established in high medieval Europe By studying the restraint of violence and the imposition of peace the chapters in this volume contribute to interdisciplinary discussions about the effects that violence had on medieval societies The wide ranging geographical scope of this volume invites comparisons to be made in relation to how violence was restrained and peace established in different settings The chapters in the first part of this volume address the issue of how violence was moderated and curbed during and following periods of conflict The second part explores attempts to maintain peace and the processes which developed to deal with those viewed as having broken the peace The final part of this volume explores the ways in which conflict was avoided through the maintenance of positive relationships between individuals and groups This book will be of interest to both academics and students interested in conflict the restraint of violence and peacemaking in medieval societies as well as those working on ritual and conflict resolution in any historical period *Criticism of the Court and the Evil King in the Middle Ages* Albrecht

Classen,2024-05-06 Examining literary narratives from the tenth through the fifteenth centuries this book explores how writers used their craft to voice harsh criticism of the ruling class and unearths a deep distrust of kings and other authority figures during the Middle Ages **Lives, Identities and Histories in the Central Middle Ages** Julie Barrau,David Bates,2021-10-07 How did medieval people define themselves And how did they balance their identities as individuals with the demands of their communities Lives Identities and Histories in the Central Middle Ages intertwines the study of identities with current scholarship to reveal their multi layered sometimes contradictory dimensions Drawing on a wide range of sources from legal texts to hagiographies and biblical exegesis and diverse cultural and social approaches this volume

enriches our understanding of medieval people's identities as defined by themselves and by others as individuals and as members of groups and communities. It adopts a complex and wide-ranging understanding of what constituted identities beyond family and regional or national belonging such as social status, gender, age, literacy levels, and displacement. New figures and new concepts of identities thus emerge from the dialogue between the chapters through an approach based on life histories, lived experience, ethnogenesis, theories of diaspora, cultural memory, and generational change.

Rural Space in the Middle Ages and Early Modern Age Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church, the court, and more recently on urban space. The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches. While previous scholars examined the figure of the peasant in the premodern world, the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city. The experience in rural space was important already for writers and artists in the premodern era, as the large variety of scholarly approaches indicates. The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works. In a surprisingly large number of cases, we can even discover elements of utopia hidden in rural space. We also observe how much the rural world was a significant element already in early medieval mentality. Moreover, as many authors point out, the impact of natural forces on premodern society was tremendous, if not catastrophic.

Married Life in the Middle Ages, 900-1300 Elisabeth van Houts, 2019-02-06 *Married Life in the Middle Ages 900-1300* contains an analysis of the experience of married life by men and women in Christian medieval Europe c. 900-1300. The study focusses on the social and emotional life of the married couple rather than on the institutional history of marriage, breaking it into three parts: Getting Married (the process of getting married and wedding celebrations), Married Life (the married life of lay couples and clergy, their sexuality, and any remarriage), and Alternative Living (which explores concubinage and polygyny as well as the single life in contrast to monogamous sexual unions). In this volume, van Houts deals with four central themes: First, the tension between patriarchal family strategies and the individual family member's freedom of choice to marry and, if so, to what partner; second, the role played by the married priesthood in their quest to have individual agency and self-determination accepted in their own lives in the face of the growing imposition of clerical celibacy; third, the role played by women in helping society accept some degree of gender equality and self-determination to marry and in shaping the norms for married life; incorporating these principles; fourth, the role played by emotion in the establishment of marriage and in married life at a time when sexual and spiritual love feature prominently in medieval literature.

Norms of Dependency in Late Antique and Early Medieval Societies Martin Schermaier, Julia Winnebeck, Matthias Becher, 2025-06-02 Late antique and early medieval normative sources frequently employ Roman legal terminology to denote a person's legal inferiority and thus suggest the continued relevance of the

concepts associated with these terms However it is far from clear to what extent the use of identical terminology actually indicates the similarity of social phenomena There is ample evidence of important changes regarding the rights and duties of enslaved persons and the development or emergence of other new forms of asymmetrical dependency This raises the question to what extent consistency in terminology and legal practice is actually an indicator of the stability of social structures Against this background a group of scholars of legal ecclesiastical and social history were invited to a conference at the BCDSS in March 2022 to scrutinise different law codes and legal sources for their evidence of dependency The result are these ten papers that truly enhance our understanding of slavery and other dependency relations in late antique and early medieval societies from c 100 to c 900 CE

St. Magnús of Orkney Haki Antonsson, 2007-04-30 The focus of this book is on the cult of St Magn s Earl of Orkney who was killed in 1116 1117 in an inter dynastic dispute More specifically it looks at the emergence of the Magn s cult in the twelfth century and the hagiographical corpus that was composed in his honour by Icelandic and English men of letters These aspects of the Orcadian cult are not however examined in isolation but are rather placed within broader Scandinavian and European contexts Moreover they provide points of departure for the examination of important topics relating to religious life and literature in early Christian Scandinavia such as the earliest cults of native saints and the perception of martyrdom

Ecclesia et Violentia Radosław Kotecki, Jacek Maciejewski, 2014-10-17 *Ecclesia et Violentia* is an interdisciplinary anthology that explores the phenomenon of violence in relation to the medieval Church as well as within the structures of that institution The volume provides a clearer understanding of hostile and violent acts against both religious institutions and clergy and explores the interpersonal aggression between clergymen or forms of violent behaviour of medieval clerics It investigates furthermore the role of violence in maintaining discipline within religious communities as well as religious legal and cultural interpretations of the aforementioned issues However despite the many points of view expressed here the central question the authors reconcile is how the phenomenon of violence interacted with the most important medieval institution and official Church thinking regarding concepts such as power rank feudal loyalty and protection and ownership Through the geographical diversity of the contributions and the variety of disciplinary perspectives this book highlights how important violence was in the life of the clergy and how it formed an integral part of the legal culture and social bonds in many regions of medieval Europe

Mobility in the Early Middle Ages, and Beyond - Mobilität im Frühmittelalter und darüber hinaus Laury Sarti, Helene von Trott zu Solz, 2025-04-21 This interdisciplinary volume deals with new methodological approaches to studying early medieval mobility The chapters address innovative methods from the fields of history archaeology and the natural sciences discussing the potential and limits of each methodological approach and shining the spotlight on historical and archaeological as well as scientific methods

Brasington, 2017-05-15 The essays in this volume in honour of Martin Brett address issues relating to the compilation and transmission of canon law collections the role of bishops in their dissemination as well as the interpretation and use of law in the eleventh and twelfth centuries The studies are grouped thematically under the headings Bishops and Their Texts and Texts and the Use of Canon Law These reflect important areas of contention in the historiographical literature and hence will further the debates regarding not simply the compilation and dissemination of canonical collections in the earlier middle ages but also the development of the practical application of canon law within Europe especially after c 1080 Individually the contributors offer new viewpoints on key issues and questions relating to the creation of canonical texts their transmission and use on both sides of the English Channel in the decades either side of the year 1100 Collectively the essays explore the methods and motives of compilers assess the use of law find readers both in the compilation of texts and within their margins and perhaps most importantly speculate where possible about the living communities in which these texts were compiled copied and used **Leprosy and Charity in Medieval Rouen** Elma Brenner, 2015 An investigation into the effects of

Excommunication and Outlawry in the Legal World of Medieval Iceland Elizabeth Walgenbach, 2021-05-25 In this book Elizabeth Walgenbach argues that outlawry in medieval Iceland was a punishment shaped by the conventions of excommunication as it developed in the medieval Church Excommunication and outlawry resemble one another often closely in a range of Icelandic texts including lawcodes and narrative sources such as the contemporary sagas This is not a chance resemblance but a by product of the way the law was formed and written Canon law helped to shape the outlines of secular justice The book is organized into chapters on excommunication outlawry outlawry as secular excommunication and two case studies one focused on the conflicts surrounding Bishop Gu mundr Arason and another focused on the outlaw Aron Hj rleifsson

Recalcitrant Crusaders? Paula Z. Hailstone, 2019-12-06 This book explores the contribution of southern Italy and Sicily to the crusades and crusader states By adopting the theme of identity as a tool of analysis it argues that a far more nuanced picture emerges about the relationship than the dismissive portrayal by William of Tyre in his *Chronicon* which has largely been accepted by later historians Building upon previous scholarship in relation to Norman identity it widens the discussion to evaluate the role of more fluid and evolving Italo Norman and Italo Sicilian identities and how these shaped events In so doing this book also argues that the relationship between the territories needs to be considered in different dimensions direct involvement of leaders and rulers versus indirect engagement through the geography of southern Italy and Sicily Over time and as identities change these two dimensions converge making the kingdom itself a leading participant in crusading
