## **Environmental Ethics And Process Thinking:**

**Environmental Ethics and Process Thinking** Clare Palmer, 1998 In this study Clare Palmer challenges the belief that the process thinking of writers like A N Whitehead and Charles Hartshorne has offered an unambiguously positive contribution to environmental ethics She compares process ethics to a variety of other forms of environmental ethics as well as deep ecology and reveals a number of difficulties associated with process thinking about the environment

*Environmental Ethics and Process Thinking* Clare Palmer, 1998 Here Palmer challenges the belief that the process thinking of writers like A N Whitehead Charles Hartshorne has offered an unambiguously positive contribution to environmental ethics She compares process ethics to a variety of other forms A More Perfect Union Linda Sargent Wood, 2012-09-01 In 1962 when the Cold War threatened to ignite in the Cuban Missile Crisis when more nuclear test bombs were detonated than in any other year in history Rachel Carson released her own bombshell *Silent Spring* to challenge society's use of pesticides To counter the use of chemicals and bombs the naturalist articulated a holistic vision She wrote about a web of life that connected humans to the world around them and argued that actions taken in one place had consequences elsewhere Thousands accepted her message joined environmental groups flocked to Earth Day celebrations and lobbied for legislative regulation Carson was not the only intellectual to offer holistic answers to society's problems This book uncovers a sensibility in post World War II American culture that both tested the logic of the Cold War and fed some of the twentieth century's most powerful social movements from civil rights to environmentalism to the counterculture The study examines important leaders and institutions that embraced and put into practice a holistic vision for a peaceful healthful and just world nature writer Rachel Carson structural engineer R Buckminster Fuller civil rights leader Martin Luther King Jr Jesuit priest and paleontologist Pierre Teilhard de Chardin humanistic psychologist Abraham Maslow and the Esalen Institute and its founders Michael Murphy and Dick Price Each looked to whole systems instead of parts and focused on connections interdependencies and integration to create a better world Though the 60s dreams of creating a more perfect world were tempered by economic inequalities political corruption and deep social divisions this holistic sensibility continues to influence American culture today Beyond the Bifurcation of Nature Dan Dombrowski, Brianne Donaldson, 2014-10-21 Environmental destruction animal abuse and widespread indifference toward plants and elemental systems demand that a human centric view of the world be permanently dismantled But once it is what functional hierarchies take its place if any This volume brings Alfred North Whitehead's process relational worldview into conversation with deeper empirical perspectives on science and religion with activist and deconstructive philosophies with South Asian and indigenous traditions and with **Land, Value, Community** Wayne Ouderkirk, Jim Hill, 2012-02-01 Land Value Community provides an in depth critical study of the theories of J Baird Callicott one of the world's foremost environmental philosophers An international group of scholars representing philosophy ecology ecofeminism Native American studies political science and

religion studies critically assesses Callicott's contributions to environmental ethics and philosophy and presents alternative perspectives from their own work. Each section consists of several authors focusing on one aspect of Callicott's thought, raising questions not only for Callicott but also for anyone affected by environmental issues. A noteworthy feature of the book is Callicott's own response to his critics. This volume allows readers to explore multiple avenues in their search for answers to the significant philosophical questions raised by environmental problems. The Ethics of Creativity Brian G.

Henning, 2011-12-09 Foreword by Daniel A. Dombrowski. A central concern of nearly every environmental ethic is its desire to extend the scope of direct moral concern beyond human beings to plants, nonhuman animals, and the systems of which they are a part. Although nearly all environmental philosophies have long since rejected modernity's conception of individuals as isolated and independent substances, few have replaced this worldview with an alternative that is adequate to the organic, processive world in which we find ourselves. In this context, Brian G. Henning argues that the often overlooked work of Alfred North Whitehead has the potential to make a significant contribution to environmental ethics. Additionally inspired by classical American philosophers such as William James, John Dewey, and Charles Sanders Pierce, and environmental philosophers such as Aldo Leopold, Peter Singer, Albert Schweitzer, and Arne Naess, Henning develops an ethical theory of which the seminal insight is called *The Ethics of Creativity*. By systematically examining and developing a conception of individuality that is equally at home with the microscopic world of subatomic events and the macroscopic world of ecosystems, *The Ethics of Creativity* correctly emphasizes the well-being of wholes while not losing sight of the importance of the unique centers of value that constitute these wholes. In this way, *The Ethics of Creativity* has the potential to be a unique voice in contemporary moral philosophy. *A Companion to Environmental Philosophy* Dale Jamieson, 2008-04-15. A

*Companion to Environmental Philosophy* is a pioneering work in the burgeoning field of environmental philosophy. This ground-breaking volume contains thirty-six original articles exemplifying the rich diversity of scholarship in this field. Contains thirty-six original articles written by international scholars. Traces the roots of environmental philosophy through the exploration of cultural traditions from around the world. Brings environmental philosophy into conversation with other fields and disciplines such as literature, economics, ecology, and law. Discusses environmental problems that stimulate current debates. Whitehead's Philosophy Janusz A. Polanowski, Donald W. Sherburne, 2012-02-01. This volume explores the range of Alfred North Whitehead's philosophy and his relevance to contemporary philosophical traditions. While philosophers and theologians with only a passing acquaintance with Whitehead might think that his philosophy is unconnected to our Western philosophical tradition, the contributors prove that nothing could be further from the truth. The most respected scholars in the field: George Allan, Lisa Bellantoni, John B. Cobb Jr., Frederick Ferr, David L. Hall, William S. Hamrick, Robert Cummings Neville, Janusz A. Polanowski, Patrick Shade, and Donald W. Sherburne illustrate points of connection between Whitehead's ideas to the following: Descartes, the so-called Father of Modern Philosophy, classical American thought, several contemporary American

thinkers including Richard Rorty and Alasdair MacIntyre aspects of European philosophy and current reflections upon the environment and technology

**Nature, Value, Duty** Christopher J. Preston, Wayne Ouderkirk, 2006-11-17 Gifford Lecturer and Templeton Prize winner Holmes Rolston III is widely known as the father of environmental ethics His writings range between natural philosophy and theology and include detailed presentations of an interlocking position that includes aesthetics value theory natural resource policy wilderness advocacy and sustainable development *Nature Value and Duty Life on Earth* with Holmes Rolston III is a collection of contemporary writings on the work of Holmes Rolston III The authors contributing to this volume are a mixture of senior scholars in environmental ethics and new voices in philosophy and in literature Together they provide an in depth evaluation of many of the topics discussed by Rolston They probe the strengths and weaknesses of his work and suggest valuable correctives Rolston himself in a detailed reply to each of his critics at the end of the volume reveals where some of these criticisms sting him the most and in the process provides one of the most detailed and articulate defenses of his position ever offered

**Spinoza and Deep Ecology** Eccy de Jonge, 2017-03-02 *Spinoza and Deep Ecology* explores the philosophical psychological and political assumptions that underpin a concern for nature offering specific suggestions how the domination of humans and nature may be overcome It is primarily intended as an introduction to the philosophy of ecology known as deep ecology and to the way Spinoza's philosophy has been put to this aim Only a self realisation along the lines of Spinoza's philosophy can afford a philosophy of care which is inclusive of humans and the non human world which recognises the need for civil laws and democratic politics for human flourishing In stark contrast to texts written by or on behalf of deep ecologists *Spinoza and Deep Ecology* is not afraid of criticising existing versions of deep ecology which fail to accept that human concerns are integral to environmental issues

**Understanding the Global Environment** Samir Dasgupta, 2009 Globalization is often discussed in terms of its ecological ramifications Yet while ecological imbalance is today one of the greatest threats to mankind globalization is also a reality that is here to stay The volume therefore seeks to address how globalizing and environmental interests can be reconciled The essays in this volume state that globalization can work both in favour of and against the environment The major issues discussed in this topical volume are how globalization can be used to promote environmental reforms the role of individuals private organizations and governments in keeping environmental degradation in check and in promoting environmental reform globalization and ecological inequality women the environment and globalization changing nature of environmental movements overpopulation and the ecology the relation between the ecology and the economy and the effects of global climate changes

*The God of Metaphysics* T. L. S. Sprigge, 2006-04-20 Publisher Description

**Ecologies of Grace** Willis Jenkins, 2008-02-04 Christianity struggles to show how living on Earth matters for living with God While people of faith increasingly seek practical ways to respond to the environmental crisis theology has had difficulty contextualizing the crisis and interpreting the responses In *Ecologies of Grace* Willis Jenkins presents a field shaping introduction to Christian

environmental ethics that offers resources for renewing theology Observing how religious environmental practices often draw on concepts of grace Jenkins maps the way Christian environmental strategies draw from traditions of salvation as they engage the problems of environmental ethics By being particularly sensitive to the ways in which environmental problems are made intelligible to Christian moral experience Jenkins guides his readers toward a fuller understanding of Christianity and ecology He not only makes sense of the variety of Christian environmental ethics but by showing how environmental issues come to the heart of Christian experience prepares fertile ground for theological renewal *Exploring Wild Law* Peter Burdon, 2011 From cover Wild law is a groundbreaking approach to law that stresses human interconnectedness and dependence on nature It critiques existing law for promoting environmental harm and seeks to establish a mutually enhancing human Earth relationship For the first time this volume brings together voices from the leading proponents of wild law around the world It introduces readers to the idea of wild law and considers its relationship to environmental law the rights of nature science religion property law and international governance *Divinanimality* Stephen D. Moore, 2014-09-15 A turn to the animal is underway in the humanities most obviously in such fields as philosophy literary studies cultural studies and religious studies One important catalyst for this development has been the remarkable body of animal theory issuing from such thinkers as Jacques Derrida and Donna Haraway What might the resulting interdisciplinary field commonly termed animality studies mean for theology biblical studies and other cognate disciplines Is it possible to move from animal theory to creaturely theology This volume is the first full length attempt to grapple centrally with these questions It attempts to triangulate philosophical and theoretical reflections on animality and humanity with theological reflections on divinity If the animal human distinction is being rethought and retheorized as never before then the animal human divine distinctions need to be rethought retheorized and retheologized along with it This is the task that the multidisciplinary team of theologians biblical scholars philosophers and historians assembled in this volume collectively undertakes They do so frequently with recourse to Derrida's animal philosophy and also with recourse to an eclectic range of other relevant thinkers such as Haraway Giorgio Agamben Emmanuel Levinas Gloria Anzaldua Helene Cixous A N Whitehead and Lynn White Jr The result is a volume that will be essential reading for religious studies audiences interested in ecological issues animality studies and posthumanism as well as for animality studies audiences interested in how constructions of the divine have informed constructions of the nonhuman animal through history *God, Humanity and the Cosmos - 2nd Edition* Christopher Southgate, 2005-12-01 Contributors include Christopher Southgate John Hedley Brooke Celia Deane Drummond Paul D Murray Michael Robert Negus Lawrence Osborn Michael Poole Jacqui Stewart Fraser Watts David Wilkinson This fully revised and updated edition of *God, Humanity and the Cosmos* includes new chapters by John Hedley Brooke Paul D Murray and David Wilkinson In addition to a systematic exploration of contemporary perspectives in physics evolutionary biology and psychology as they relate to theological descriptions of the universe humanity and consciousness the book now
