Environmental Security And Environmental Management The Role Of Risk Assessment:

Environmental Security and Environmental Management: The Role of Risk Assessment Benoit Morel,Igor

Linkov,2005-12-06 The concept of environmental security has emerged as one basis for understanding international conflicts This phrase can mean a variety of things It can signify security issues stemming from environmental concerns or conflicting needs or it can mean that the environment is treated as a resource for the long term and the question is what should be done today to preserve the quality of the environment in the future In the same way that energy security is about ensuring access to energy for the long run it can also mean that pressing environmental concerns create a situation where different countries and communities are forced to collaboratively design a unified response even if cooperation is not generally in the logic of their relations Over the last several years the authors of this book and their colleagues have tried to demonstrate the power of risk assessment and decision analysis as valuable tools that decision makers should use for a broad range of environmental problems including environmental security Risk analysis is almost more a state of mind or a way of looking at problems than it is a kind of algorithm or a set of recipes It projects a kind of rationality on problems and forces a certain degree of quantitative rigor as opposed to the all too common tendency of making environmental recommendations based on anecdotal evidence

Wenning,2007-05-24 History has shown how powerful societies decline when natural resources are unable to be replenished This book explores the challenges facing coastal areas during in the near future It emphasizes beliefs that the convergence of seemingly disparate viewpoints and uncertain and limited information is possible only by using available risk assessment methodologies and decision making tools such as multi criteria decision analysis MCDA

Use of Landscape

Sciences for the Assessment of Environmental Security Irene Petrosillo, Felix Müller, K. Bruce Jones, Giovanni Zurlini, Kinga Krauze, Sergey Victorov, Bai-Lian Li, William G. Kepner, 2007-10-02 This book examines environmental security from the perspective of landscape sciences identifying the forces that threaten environmental security at all levels It stems from the last five years of the Pilot Study Project on Use of Landscape Sciences for Environmental Assessment sponsored by the NATO Committee on the Challenges of Modern Society Readers explore concepts of environmental security from subjective and objective perspectives *Addressing Global Environmental Security Through Innovative Educational Curricula* Susan Allen-Gil, Lia Stelljes, Olena Borysova, 2008-12-03 As the importance of environmental security increases worldwide colleges and universities are evaluating how well they are preparing the next generation of environmental scientists and managers and developing new educational approaches In this volume we examine 1 current educational practices and the need for change 2 educational needs from the perspective of employers and professionals and 3 new practices in higher education in environmental fields The contributors were carefully selected by an international coordinating team based on their international reputations in the field of progressive educational approaches and understanding of the global employment market in environmental science Although the focal geographic areas are North America Europe and the former Soviet republics the ideas and strategies discussed are universal to all institutions of higher education We highlight specific non traditional approaches such as using the university as a curricular tool developing permaculture programs and applying sustainability pedagogy and document their success from both a student and employer perspective We also include case studies on risk assessment and eco efficiency education to illustrate why and how transdisciplinary education can be accomplished We conclude that it is imperative that our educational systems teach environmental security at the university level within a transdisciplinary context and that opportunities such as internships and other methods of applied learning are included in the curriculum Real-Time and Deliberative Decision Making Igor Linkov, Elizabeth A. Ferguson, Victor S. Magar, 2008-10-24 Decision making tools are needed to support environmental management in an increasingly global economy Addressing threats and identifying actions to mitigate those threats necessitates an understanding of the basic risk assessment paradigm and the tools of risk analysis to assess interpret and communicate risks It also requires modification of the risk paradigm itself to incorporate a complex array of quantitative and qualitative information that shapes the unique political and ecological challenges of different countries and regions around the world This book builds a foundation to characterize and assess a broad range of human and ecological stressors and risk management approaches to address those stressors using chemical risk assessment methods and multi criteria decision analysis tools Chapters discuss the current state of knowledge with regard to emerging stressors and risk management focusing on the adequacy of available systematic quantitative tools to guide vulnerability and threat assessments evaluate the consequences of different events and responses and support decision making This book opens a dialogue on aspects of risk

assessment and decision analysis that apply to real time immediate and deliberative long term risk management processes
