For Your Sake He Became Poor Georges Massinelli, 2021-04-19 The Pauline collection for the poor in Jerusalem is the most famous example of financial support for geographically distant groups in early Christianity Recent assessments of the Pauline collection have focused on patronage to explain the social relations between Jerusalem and the Pauline groups and the strategies adopted by Paul Through a comparison with the

Greco Roman world and a close reading of the texts this study challenges the recent approach and proposes that other factors shaped Paul's stance Paul was interested in reassuring the Corinthians about the financial outcome of the collection and dispelling doubts that he might take advantage of them The collection was an action modeled on divine generosity and an exchange within a reciprocal relationship between Christian groups This study also surveys intergroup support between Christian groups in the first three centuries CE This practice involved churches from most of the Mediterranean Basin and was known even outside of Christian circles Transfers of money were organized according to a consistent pattern modeled on local charitable practices The Pauline collection had similar characteristics and can be seen as part of this widespread economic practice

Theory of Social Interaction Jonathan H. Turner, 1988 In developing the most comprehensive theory of social interaction among humans to date the author has also constructed a general theory of micro dynamics for sociology and social psychology He does so by reviewing existing theories of the past and present synthesizing these concepts into abstract models and principles of social interaction In contrast to Talcott Parsons and many others the book argues that social interaction rather than action and behaviour is sociology's most basic unit of analysis This unit is conceptualized as involving three processes 1 motivational or the process of mobilizing and energizing interactive behaviour 2 interactional or the process of mutual signaling and interpreting with symbols and 3 structuring or the process of repeating and organizing social interactions in time and place For each of these three constituent processes the relevant theories are analyzed and then synthesized into composite models and general laws
