term has come to signify something one dimensionally negative In essence the orientalist vision was an ethnocentric characterization of the peoples of Asia and Africa and the Near East as exotic primitive others subject to conquest by the nations of Europe That now well established point which expresses a postcolonial perspective is critical but Francaviglia suggest that it overlooks much variation and complexity in the views of historical actors and writers many of whom thought of western places in terms of an idealized and romanticized Orient It likewise neglects positive images and interpretations to focus on those of a decadent and ostensibly inferior East We cannot understand well or fully what the pervasive orientalism found in western cultural history meant says Francaviglia if we focus only on its role as an intellectual engine for European imperialism It did play that role as well in the American West One only need think about characterizations of American Indians as Bedouins of the Plains destined for displacement by a settled frontier Other roles for orientalism though from romantic to commercial ones were also widely in play In *Go East Young Man* Francaviglia explores a broad range of orientalist images deployed in the context of European settlement of the American West and he unfolds their multiple significances
