## **Frederick Fisher Buildings And Projects:**

**The New Tenement** Florian Urban, 2017-10-12 This book examines new tenements dense medium rise multi storey residences that have been the backbone of European inner city regeneration since the 1970s and came with a new positive view on urban living Focusing principally on Berlin Copenhagen Glasgow Rotterdam and Vienna it relates architectural design to an evolving intellectual framework that mixed anti modernist criticism with nostalgic images and strategic goals and absorbed ideas about the city as a generator of creativity locale of democratic debate and object of personal identification This book analyses new tenements in the context of the post functionalist city and its mixed use neighbourhoods redeveloped industrial sites and regenerated waterfronts It demonstrates that these buildings are both generators and outcome of an urban environment characterised by information exchange rather than industrial production individual expression rather than mass culture visible history rather than comprehensive renewal and conspicuous difference rather than egalitarianism It also shows that new tenements evolved under a welfare state that all over Europe has come under pressure but still to a certain degree balances and controls heterogeneity and economic disparities Building the Modern World Michael H. Hodges, 2018-04-16 A photographically rich biography of protean architect Albert Kahn Building the Modern World Albert Kahn in Detroit by Michael H Hodges tells the story of the German Jewish immigrant who rose from poverty to become one of the most influential architects of the twentieth century Kahn s buildings not only define downtown Detroit but his early car factories for Packard Motor and Ford revolutionized the course of industry and architecture alike Employing archival sources unavailable to previous biographers Building the Modern World follows Kahn from his apprenticeship at age thirteen with a prominent Detroit architecture firm to his death With material gleaned from two significant Kahn archives the University of Michigan s Bentley Historical Library and the Archives of American Art at the Smithsonian Institution Hodges paints the most complete picture yet of Kahn s remarkable rise Special emphasis is devoted to his influence on architectural modernists his relationship with Henry Ford his intervention to save the Diego Rivera murals at the Detroit Institute of Arts unreported until now and his work laying down the industrial backbone for the Soviet Union in 1929-31 as consulting architect for the first Five Year Plan Kahn s ascent from poverty his outsized influence on both industry and architecture and his proximity to epochal world events make his life story a tableau of America s rise to power Historic photographs as well as striking contemporary shots of Kahn buildings enliven and inform the text Anyone interested in architecture architectural history or the history of Detroit will relish this stunning work Regenerative by Design David Cheshire, 2024-10-01 How do we design cities and buildings that metabolise use living materials and are net positive that give back more to the planet than they take Our cities and buildings are a drain on the planet requiring huge amounts of resources and tracts of land to support their needs and destroying biodiversity in the process The idea of living regenerative buildings is gaining ground buildings that give back more than they take providing habitats ecosystems services e.g. clean

water clean air locally grown food and putting humans back in touch with the natural world The climate and biodiversity crisis has driven organisations to set ambitious net zero carbon and ESG targets however many are struggling to see how to achieve them and often doing the same thing but expecting a different result This book sets out the regenerative building agenda and design principles showing how buildings towns and cities could start to have a positive impact on our planet providing ecosystems services and living within the means afforded by the site *Architecture* Francis D. K.

Ching,2010-09-09 A superb visual reference to the principles of architecture Now including interactive CD ROM For more than thirty years the beautifully illustrated *Architecture Form Space and Order* has been the classic introduction to the basic vocabulary of architectural design The updated Third Edition features expanded sections on circulation light views and site context along with new considerations of environmental factors building codes and contemporary examples of form space and order This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment Using his trademark meticulous drawing Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries By looking at these seminal ideas *Architecture Form Space and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture In addition to updates to content and many of the illustrations this new edition includes a companion CD ROM that brings the book s architectural concepts to life through three dimensional models and animations created by Professor Ching *The Architectural Review*
