Free Indirect Mode:

The Semantics of Free Indirect Discourse Regine Eckardt, 2014-11-27 Free indirect discourse presents us with the inner world of protagonists of a story. We seem to see the world through their eyes and listen to their inner thoughts. The present study analyses the logic of free indirect discourse and offers a framework to represent multiple ways in which words betray the speaker's feelings and attitude. The theory covers tense aspect, temporal indexicals, modal particles, exclamation marks and other expressive elements and their dependence on shifting utterance contexts. It traces the subtle ways in which story texts can offer information about protagonists. The study of free indirect discourse has been a topic of great interest in recent years in semantics and pragmatics. In this book, Regine Eckardt proposes a new theory of this domain and applies it to a wide variety of phenomena: discourse particles, exclamation marks and mood, in addition to the traditional indexical pronouns and tenses. She situates this project within a larger attempt to extend the tools of semantic analysis to fiction. Most formally oriented semanticists have not paid serious attention to this domain, which has resulted in a major gap in semantic theory; this book is thus a pioneering effort and raises many intriguing points. The total result is an empirically rich and exciting work which will be a profitable read for researchers interested in semantics, pragmatics and formal approaches to literature. Eric McCready

Aoyama Gakuin University *How to express yourself with a causal connective* Mirna Pit, 2022-03-07 The Dutch, German and French languages display a variety of regularly used connectives, all of which introduce causes, arguments or reasons, such as Dutch *omdat*, *want* and *aangezien*; German *weil*, *denn* and *da*; and French *parce que*, *car* and *puisque*. Why should languages have different connectives to express the notion of backward causality? The central argument developed in this book is that different connectives express different degrees of subjectivity. In a series of corpus analyses, it is shown that the degree of subjectivity of the main participant involved in the causal relation strongly predicts the occurrence of one or another connective. Hence, language users have at their disposal connectives of varying degrees of subjectivity. In an analysis of judiciary sentences, it is revealed that speakers are actually sensitive of this semantic distinction and sometimes even exploit it for their communicative purposes in order to conceal their subjective involvement. Judges prefer objective over subjective connectives. This volume makes a contribution to the study of language in use by applying empirical methods to authentic language data. It will be of interest to anyone concerned with discourse coherence, perspective and subjectivity, corpus linguistics and cross-linguistic analyses. **The Cambridge Introduction to Narrative** H. Discourse and Style Dan Shen, 2024-12-02 This book examines overlaps differences and complementarities between narratology and stylistics and shows the consequences of this examination for the practical analysis of prose narrative Narratology identifies discourse as one of its two main objects of study story being the other and stylistics of course designates style as its concern Too often however work in each of these fields proceeds without attention to developments in the other This book corrects that situation by looking beneath the superficial similarities between the discourse of narratology and the style of fictional stylistics The author shows that the two seemingly interchangeable terms actually refer to different textual elements For example both narratology and stylistics identify point of view as an important element of discourse and style respectively but each approach conceives of it differently and thus analyzes it differently This book argues that the different analyses are complementary and shows how they can be brought together This synthesis leads to richer conceptions of point of view as well as more comprehensive and precise analyses of its functions and effects in individual narratives For its theoretical and interpretive contributions this book will appeal to scholars and students in narrative studies literary stylistics and literary theory and criticism

Tense and Narrativity Suzanne Fleischman, 2010-07-22 In this pathfinding study Suzanne Fleischman brings together theory and methodology from various quarters to shed important new light on the linguistic structure of narrative a primary and universal device for translating our experiences into language Fleischman sees linguistics as laying the foundation for all narratological study since it offers insight into how narratives are constructed in their most primary context everyday speech She uses a linguistic model designed for natural narrative to explicate the organizational structure of artificial narrative texts primarily from the Middle Ages and the postmodern period whose seemingly idiosyncratic use of tenses has long perplexed those who study them Fleischman develops a functional theory of

Mind The Gap Peter Wilson, 2014-06-03 We rarely speak or even write in the complete sentences that are often held to be the ideal form of linguistic communication Language is in fact full of gaps because speakers and writers operate in contexts which allow bits of language to be understood rather than expressed This book systematically analyses this inherent gappiness of language known as ellipsis and provides an account of the different contexts both linguistic and situational which affect its use Peter Wilson draws on a wide variety of examples of spoken and written English and both literary and non literary to present a comprehensive classification of elliptical language that ranges from the conversational fragment and the advertisement to the dialogue of Shakespeare and imagist poetry Mind the Gap shows how ellipsis is a feature of major structural and stylistic importance to our understanding of spoken and written language and will be of interest to undergraduate students of linguistics literature communication and the interrelations between them

Narrative in English Conversation Christoph Rühlemann, 2014-01-09 Storytelling is a fundamental mode of everyday interaction This book is based upon the Narrative Corpus NC a specialized corpus of naturally occurring narratives and provides new paths for its study Christoph R hlemann uses the NC s narrative specific annotation and XPath and XQuery query languages that allow the retrieval of complex data structures to facilitate large scale quantitative investigations into how narrators and recipients collaborate in storytelling Empirical analyses are validated using R a programming language and environment for statistical computing and graphics Using this unique data and methodological base R hlemann reveals new insights including the discovery of turntaking patterns specific to narrative the first investigation of textual colligation in spoken data the unearthing of how speech reports as discourse units form striking patterns at utterance level and the identification of the story climax as the sequential context in which recipient dialogue is preferentially positioned

The Fictions of Language and the Languages of Fiction Monika Fludernik, 2003-12-16 Monika Fludernik presents a detailed analysis of free indirect discourse as it relates to narrative theory and the crucial problematic of how speech and thought are represented in fiction Building on the insights of Ann Banfield s *Unspeakable Sentences* Fludernik radically extends Banfield s model to accommodate evidence from conversational narrative non fictional prose and literary works from Chaucer to the present Fludernik s model subsumes earlier insights into the forms and functions of quotation and aligns them with discourse strategies observable in the oral language Drawing on a vast range of literature she provides an invaluable resource for researchers in the field and introduces English readers to extensive work on the subject in German as well as comparing the free indirect discourse features of German French and English This study effectively repositions the whole area between literature and linguistics opening up a new set of questions in narrative theory
