The Devil's Toy Box Andrew J. Fox, 2022 A Promethean technology is one that allows someone of average resources skills and intelligence to carry out actions that were once only doable by governments militaries or institutions with considerable resources Essentially Promethean technologies allow users to create their own weapons of mass destruction These emerging technologies are increasingly affordable and accessible and are no more complicated to operate than a satellite TV control box or a smart phone Although these technologies are a terrifying prospect the more we know about these dangers the better we can prepare to head them off In The Devil's Toy Box Andrew Fox lays out seven decades of preemptive analysis and shows that while homeland security has explored in depth the possible Promethean threats the world faces it has failed to forecast the most likely attacks Using fictional scenarios Fox teaches how to predict future threats and how to forecast which ones are likely to be used by bad actors within the next five to ten years Combining the skills of homeland security experts and the imaginations of speculative fiction writers he then offers an analytical method to deter counter or abate these threats rather than adopting an attitude of resigned fatalism

Incorporating Engaged Research in Social Development Wassie Kebede, Alice K. Butterfield, 2021-04-26 In a wide ranging presentation derived from teaching experiences and research projects seasoned professors Wassie Kebede and Alice Butterfield examine engaged research that links social work human services and social development with the intent of instigating action for social change Drs Kebede and Butterfield begin by introducing others to an overview of engaged research and models of social change and then examine development issues in Ethiopia in view of engaged research After offering their context of engaged research as a prototype for extrapolating development policies that

can be studied compared and contrasted with those in other countries Kebede and Buttereld present the results from the engaged research of former PhD students now faculty at various universities in Ethiopia The book provides a glimpse into the professors own experiences and an emphasis on the importance of involving faculty and students in engaged research through coursework Incorporating Engaged Research in Social Development is a comprehensive study that offers academic insight and research results in order to promote social development and change Readers are encouraged to use this book for teaching and implementing engaged research in higher education Guidelines for teaching undergraduate and graduate courses are included **The Encyclopedia of Research Methods in Criminology and Criminal Justice, 2 Volume Set**
