Implementing Eu Environmental Policy New Directions And Old Problems:

Implementing EU Environmental Policy Christoph Knill, Andrea Lenschow, 2000 This book examines issues of censorship publicity and teenage fandom in 1950s Britain surrounding a series of controversial Hollywood films *The Wild One* *Blackboard Jungle* *Rebel Without a Cause* *Rock Around the Clock* and *Jailhouse Rock* It also explores British cinema's commentary on juvenile delinquency through a re-examination of such British films as *The Blue Lamp* *Spare the Rod and Serious Charge* Taking a multi-dimensional approach the book intersects with star studies and social history while reappraising the stardom of Marlon Brando James Dean and Elvis Presley By looking at the specific meanings pleasures and uses British fans derived from these films it provides a logical and sustained narrative for how Hollywood star images fed into and disrupted British cultural life during a period of unprecedented teenage consumerism

The implementation of environmental policy in Ireland Bernadette Connaughton, 2019-05-22 This book explores the response of Ireland's political administrative system to the implementation of environmental directives in the cases of waste management water reform and biodiversity Ireland represents the implementation challenges of a small EU member state with a weak background in environmental governance and has struggled to adapt to the complexities of enforcing environmental rules Using a theoretical framework inspired by traditional implementation analysis and insights from the Europeanisation literature the book traces the implementation process in three directives The main conclusion of this study is that Ireland's implementation performance in waste management water and nature conservation is influenced by the low issue salience of environmental policy and the need to overcome structural problems in the public administration system to give effect to EU legislation

Environmental Policy in the EU Andrew Jordan, Viviane Gravey, 2021-05-06 The European Union EU has a hugely important effect on the way in which environmental policies are framed designed and implemented in many parts of the world but especially Europe The new edition of this leading textbook provides a state of the art analysis of the EU's environmental policies Comprising five parts *Environmental Policy in the EU* covers the rapidly changing context in which EU environmental policies are made the key actors who interact to co-produce them and the most salient dynamics of policy making ranging from agenda setting and decision making through to implementation and evaluation Written by leading international experts individual chapters examine how the EU is responding to a multitude of different challenges including biodiversity loss climate change energy insecurity and water and air pollution They tease out the different ways in which the EU's policies on these topics co-evolve with national and international environmental policies In this systematically updated fourth edition a wider array of learning features are employed to ensure that readers fully understand how EU environmental policies have developed over the last 50 years and how they are currently adapting to the rapidly evolving challenges of the twenty-first century including the COVID-19 pandemic It is an essential resource for undergraduate and postgraduate students studying environmental policy and politics climate change environmental law and EU politics more broadly The

Environmental Policy in the European Union Andrew Jordan, 2012 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy. Comprising five comprehensive parts, it includes in depth case studies of contemporary policy issues such as climate change, genetically modified organisms and trans Atlantic relations as well as an assessment of how well the EU is responding to new challenges such as enlargement, environmental policy integration and sustainability. The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors

Europeanization of Environmental Policies and their Limitations Arpad Todor, Florența Elena Helepciuc, 2021-05-13 This book offers a window into the mechanisms that drive events when countries with poor track records in environmental protection and low administrative capacity join an organisation with ambitious environmental regulatory regimes which include some of the highest environmental protection standards in the world. This book examines the institutional building capacity in Romania after two decades of the development of the EU's environmental policy on elaboration, transposition, implementation, monitoring and institutional building. The book examines how Romania has fared as one of the least environmentally friendly EU member states and poses the following questions: What are the limits of Europeanisation in the area of public policies? What is the reason why, despite the overwhelming public interest in environmental issues and widespread agreement that urgent action to protect the environment and prevent catastrophic climate change are paramount, the pace of achieving the goals remains slow? Why do policies fail? This book brings together several case studies focusing on the evolution of environmental policies in Romania over the last twenty years, with a special focus on the post accession period 2007 onwards. The book provides an analysis of policies where progress is less than satisfactory and examines why this is the case

EU Enlargement and the Environment JoAnn Carmin, Stacy D. VanDeveer, 2023-05-31 This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union, assessing and challenging prevailing views about the outcomes and processes of this historic development. Looking at four central themes: capacity changes and limitations, the EU's mixed messages and conflicting priorities, non state actor roles and developments, and the exchange of ideas and information, the volume shows that enlargement will change the EU, not just make it bigger, and that EU officials and programs are improving aspects of environmental policy in CEE countries, even as they are making others less sustainable. This book was previously published as a special issue of the journal *Environmental Politics*

Environmental politics in the European Union Christoph Knull, Duncan Liefferink, 2013-07-19 This book provides a comprehensive introduction to the development, making and implementation of European Union environmental politics and identifies the central areas and instruments of EU

environmental policy It analyses the factors influencing not only the formulation but also the implementation of environmental measures in the complex multi level setting of the EU On this basis it takes a critical look at the EU s effectiveness and problem solving capacity in the environmental field Designed as a textbook at undergraduate and graduate level the book employs a clear and insightful analytical perspective based on the theoretical state of the art of EU policy studies Thus it provides an overview of the major theoretical approaches available in the field At the same time the discussion is illustrated by a broad range of empirical findings with regard to the formulation and implementation of EU environmental policy This study is an ideal companion for anyone seeking a concise and accessible introduction into EU environmental politics

Environmental Policy Integration Andrea Lenschow,2012 Integrating environmental policies into the policies of all other sectors is the core European environmental policy But there has been no thorough investigation of the political process involved This volume provides the first It analyses the process of policy integration the greening of public policy across the relevant sectors and countries It finds significant variation from sector to sector and from country to country and analyses the reasons for this Surprisingly the UK traditionally the dirty man of Europe is far more actively engaged than environmental progressives such as Germany It identifies the obstacles to integration and offers solutions for policy formulation decision making and implementation at the relevant political levels

Comparative Environmental Politics Paul F. Steinberg, Stacy D. VanDeveer,2012 Combining the theoretical tools of comparative politics with the substantive concerns of environmental policy experts explore responses to environmental problems across nations and political systems

Regulators as Agenda-Setters Edoardo Guaschino,2022-08-05 This book provides a comprehensive understanding of how and under which conditions regulators in the social sectors are able to influence political agendas and issue definitions In these political processes agencies may become the policy entrepreneurs which are able to prioritize issues placing them in the political agenda and influencing policy formulations These activities generate additional questions about the political role of regulatory agencies and post delegation settings Based on original source data and a mixed methods approach the book shows that the diffusion of regulatory agencies is not only limited to regulatory responsibilities and to their increasing role in policy making but their influence has stretched over the agenda setting phase but only under certain conditions Moreover the evolution of their strategies the production and use of knowledge and the context in which they operate enable them to exert leverage on agendas This book will be of key interest to scholars students and practitioners of the politics of regulation bureaucracy agenda setting public policy social problems and more broadly to European and comparative politics and democracy

Routledge Handbook of Environmental Policy Helge Jörgens, Christoph Knill, Yves Steinebach,2023-06-28 This Handbook provides a state of the art review of research on environmental policy and governance The Routledge Handbook of Environmental Policy has a strong focus on new problem structures a perspective that emphasizes the preconditions and processes of environmental policymaking and a comparative

approach that covers all levels of local national and global policymaking The volume examines the different conditions under which environmental policymaking takes place in different regions of the world and tracks the theoretical conceptual and empirical developments that have been made in recent years It also highlights emerging areas where new and or additional research and reflection are warranted Divided into four key parts the accessible structure and the nature of the contributions allow the reader to quickly find a concise expert review on topics that are most likely to arise in the course of conducting research or developing policy and to obtain a broad reliable survey of what is presently known about the subject The resulting compendium is an essential resource for students scholars and policymakers working in this vital field

The European Union Steven P. McGiffen, 2005-10-20 The political dynamics of the European Union can often appear confusing shrouded as they are in complex legislative processes This book offers a clear and thorough critical introduction to the origins development and current direction of the EU and pinpoints the major policy debates animating decision makers This revised and updated edition offers a well illustrated analysis of each of the EU's major policy areas and covers arguments both for and against the EU McGiffen explores subjects including enlargement internal and external security the Euro trade the environment employment transport and regional policy He explains how and why the debate about membership is frequently and falsely presented as if it were a conflict between nationalism and internationalism and argues instead that the EU is merely one of a number of possible solutions to the economic and political problems facing Europe Published in association with Spectre

The Future of European Union Environmental Politics and Policy Anthony R. Zito, Charlotte Burns, Andrea Lenschow, 2020-07-29 The Future of European Union Environmental Politics and Policy investigates the trajectory of European Union EU environmental policy and reflects on how this hugely vital policy area of the EU has evolved over the decades Gathering together a selection of the leading scholars working on European environmental policy the volume assesses the extent to which change has occurred in important dimensions of EU environmental policy research These dimensions include the EU's values and approaches the provision of leadership the possibilities of Brexit and the dismantling of policies policy instruments and climate change policy implementation and enforcement and policy evaluation The contributors situate their research in the context of current developments and conditions including the global economic challenges and the rise of political challenges to both European governance and integration Each chapter reviews the EU environmental policy over the long term and assesses the implications of current developments for the future health of European environmental policy European integration and the environment itself The Future of European Union Environmental Politics and Policy will be of great interest to scholars of environmental politics environmental governance and EU policy The chapters were originally published as a special issue of Environmental Politics

Coping with Accession to the European Union T. Börzel, 2015-12-11 The book explores the role of new modes of governance in helping future member states to cope with their accession to the EU It examines the extent to which civil society and business have

assisted the governments of Southern Central and Eastern European accession countries in taking on the ever more comprehensive body of EU laws and regulations

Governmentality in EU External Trade and Environment Policy Jessica Lawrence, 2018-02-07 Governmentality and EU External Trade and Environment Policy applies theories drawn from Foucauldian governmentality studies to investigate the ideological and political roots of the European Union EU's external trade and environmental policy and their effects on the transnational legal landscape The EU's desire to spread environmental norms abroad is viewed in the book as a significant feature of contemporary EU trade policy The EU's activities in this area have not been uncontroversial for other transnational legal actors States individuals and organizations have challenged the EU's various trade and environment policies arguing that they are coercive unfair over reaching or inefficient Meanwhile these policies have also raised a number of questions from the perspective of legality and political theory This book considers what the practice of EU external trade and environment policy and international resistance to it tells us about the way the EU perceives the role and limits of transnational government the means and ends of politics and the drivers of human and institutional behavior Jessica Lawrence examines the legal and political discourse of the EU and those affected by its policies By studying legal cases statements by officials legislative texts press releases and other representative documents the book identifies the rationalities technologies and subjectivities that underlie contemporary EU activity in this area The overall effect paints a more complicated and nuanced picture of the EU's vision of itself and its goals one that ultimately seeks to provide a better understanding of the functioning of power in this area

Constructing a Policy-Making State? Jeremy John Richardson, Jeremy Richardson, 2012-09-20 Constructing a Policy Making State is a guide to how the European Union really works in which 12 policy sectors are analysed by some of the leading EU scholars in the world It considers how policy is made at the EU level who is involved which are the key institutions and if they are pro integration

Linking EU Climate and Energy Policies Jon Birger Skjærseth, Per Ove Eikeland, Lars H. Gulbrandsen, Torbjørn Jevnaker, 2016-05-27 Based on an innovative theoretical framework combining theories of EU policy making negotiation and implementation this comprehensive book examines EU climate and energy policies from the early 1990s until the adoption of new policies for 2030 The authors investigate how the linking of climate and energy concerns in policy packages has facilitated agreement among EU leaders with very different policy ambitions Employing in depth studies from a diverse range of energy economic countries the book also explores the impact of the implementation of policies on the climate and energy policy framework and the Energy Union initiative Social scientists and researchers in EU climate and energy policies will find the new empirical data and theoretical approach useful to their work Students of the social sciences and politics will also benefit from the accessible overview of EU climate and energy policy development This book will also be of interest to private and public decision makers looking for explanations for the causes and consequences of EU climate and energy policy development

European Economic Governance Willem Molle, 2011-03-01 In the course of its development the EU has

had to deal with an expanding policy agenda covering ever more subjects and an increased diversity of instruments. It has also had to deal with an increased number of member states and an extended range of partners: regional authorities, non-governmental organisations. These developments have greatly increased the risk of inconsistencies between the various policies pursued and between the various levels of competence for the same policy. Inconsistent policies are less effective than they ought to be. So they imply a welfare loss. The EU has tried to cope with the challenge of consistency by adapting its governance. Traditionally it uses mainly the regulatory method. The effectiveness of this method has recently come into question. So alternative methods are now favoured. One is the financial method which implies more expenditure via the EU budget. The other is coordination. The application of both methods has certain advantages and disadvantages. The problem for policy makers is then to determine the choice between the modes first and the optimal level of budgetary and coordination efforts next. Notwithstanding its obvious policy relevance, the problem has got little attention from academia. This book sets out to contribute to a solution by following two approaches. The first is a systematisation of the theoretical and conceptual underpinnings of the financial and coordination methods. The second is an empirical investigation into a range of European policy processes implying to different degrees budgetary outlays and coordination.

EU External Relations Law and Sustainability Ramses A. Wessel, Jamile Bergamaschine Mata Diz, Júlia Péret Tasende Társia, Saide Esra Akdogan, 2025-02-01

This book delves into the integration of sustainability within the European Union's external activities, emphasizing the necessity to weave sustainability throughout its relations with third states and international organizations. Unique in its approach, this collective work brings together a diverse range of experts, each contributing a chapter that explores different facets of sustainability in the context of the EU's increasing external actions. The pressing demands for sustainable development as outlined in the EU Treaties, specifically Articles 3, 5, and 21 of the TEU and Articles 11 and 191 of the TFEU, are examined through a compilation of theoretical analyses, legal dogmatic approaches, and detailed case studies. These contributions aim to offer a cohesive understanding of the legal implications and strategies for embedding sustainability into the EU's external engagements, providing a multidisciplinary perspective on a critical global issue. Furthermore, the book critically examines how sustainability is operationalized within various EU external policies, providing readers with a deep dive into the mechanisms and outcomes of such integration. It addresses the challenges and opportunities that lie ahead for the EU in maintaining its commitment to sustainability, making it a timely contribution to the discourse on global environmental policy and governance. Designed for scholars, legal practitioners, policymakers, and students interested in European Union law, sustainability, and external relations, this collective work serves as an essential resource. It offers a nuanced perspective on the complexities of legal frameworks that govern the EU's sustainable external actions and their significant impact on global environmental governance.
