Interval Mathematics 1980 Karl L. E. Nickel, 2014-05-10 Interval Mathematics 1980 contains the proceedings of an International Symposium on Interval Mathematics held in Germany on May 27 31 1980 The book introduces the reader to some of the most important work done in the field of interval mathematics and its application to computing Topics covered range from purely theoretical to computational methods and computer architecture Comprised of 41 chapters this book begins with an overview of set functions and their applications followed by a discussion on global constrained optimization using interval analysis A model for the propagation of rounding error in floating arithmetic is then presented and the importance of 3 valued notions for interval mathematics is highlighted Subsequent chapters focus on the transformation of interval programs into convergent interval programs specifications for interval programming languages interval contractions for the solution of integral equations and mean convergence enclosing of solutions of operator equations with convex and inverse monotonic operators This monograph will be of value to both students and specialists in the fields of mathematics and computer science

My Ideal Bookshelf Thessaly La Force, 2012-11-13 The books that we choose to keep let alone read can say a lot about who we are and how we see ourselves In *My Ideal Bookshelf* dozens of leading cultural figures share the books that matter to them most books that define their dreams and ambitions and in many cases helped them find their way in the world Contributors include Malcolm Gladwell Thomas Keller Michael Chabon Alice Waters James Patterson Maira Kalman Judd Apatow Chuck Klosterman Miranda July Alex Ross Nancy Pearl David Chang Patti Smith Jennifer Egan and Dave Eggers among many others With colorful and endearingly hand rendered images of book spines by Jane Mount and first person commentary from all the contributors this is a perfect gift for avid readers writers and all who have known the influence of a great book

Life Strategies (draft), Part two: Literature Florentin Smarandache, 2008-01-01 Think like a man of action act like a man of thought says H Louis Bergson This small book collects some ideas hints and methods in various aspects of art and literature You will find novel ideas for experimental literature new genre of poems and countless other things about nothing If for nothing else the random sentences listed here at least can stimulate further thoughts and ideas for instance young writers and artists may find plenty of interesting ideas for their next literary work or best selling novels in Experimental Literature section In a sense this book itself is an experimental one Needless to say the readers may find that some of these ideas are quite absurd or seemingly outlandish just like the idea of improper courses in Umberto s Foucault Pendulum where the personages discuss possibility to teach absurd courses such as City planning for Gypsies etc I started to write down such ideas since I was a high school student and continue even today I always bear with me a small pen and small notebook where I write in the plane or driving my car or even in class room But I

hope that despite three decades of postponement this small book will keep on inspiring the reader as good ideas will always be worth to ponder
