The 24 revised full papers presented (9 papers from the applications track and 15 from the foundations track) were carefully reviewed and selected from 82 submissions. The latest and most relevant information on model driven software engineering in the industrial and academic spheres is provided. The papers are organized in topical sections on MDA development processes MDA for embedded and real time systems MDA and component based software engineering metamodeling model transformation and model synchronization and consistency.

MDA Distilled Stephen J. Mellor, 2004 A readable and much needed introduction to MDA. Dr Jim Arlow coauthor of UML and the Unified Process Addison Wesley 2002 and Enterprise Patterns and MDA Addison Wesley 2004 This book provides an excellent introduction to the ideas and technologies that will form the foundation of the model driven architecture over the coming years. I recommend it wholeheartedly. Dr Andy Evans Managing Director Xactium Limited UK Excellent job of distilling MDA down to its core concepts. Krzysztof Czarnecki University of Waterloo coauthor of Generative Programming Addison Wesley 2000 As systems have grown more crucial to the operations of organizations worldwide so too have the costs associated with building and maintaining them. Enter model driven architecture MDA a standard framework from the Object Management Group (OMG) that allows developers to link object models together to build complete systems. MDA prevents design decisions from being intertwined with the application and keeps it independent of its implementation. The result is an application that can be combined with other technologies as well as other applications and models that become highly reusable assets. MDA Distilled is an accessible introduction to the MDA standard and its tools and technologies. The book describes the fundamental features of MDA how they fit together and how you can use them in your organization today. You will also learn how to define a model driven process for a project involving multiple platforms implement that process and then test the resulting system. MDA Distilled will help you understand The MDA framework including the platform independent model (PIM) and the platform

specific model PSM The Meta Object Facility MOF the OMG's adopted standard for metamodeling Horizontal vertical and merging mappings between models Building marks and marking models Elaborating models including viewing generated models and managing manual changes Building executable models with Executable UML Agile MDA development Developers and architects can dramatically improve productivity portability interoperability and maintenance with MDA Find out how with this essential reference and quickly learn how to harness the significant power of this new framework
