Pattern Making, Pattern Breaking Ann Alder, 2016-05-13 Rapid changes in technology the nature of organisations non traditional career progression globalisation and virtual worlds mean that we need to become ever more effective learners in order to keep pace with the demands placed upon us Our patterns of understanding the ways in which we make sense of our work and our world hardly become fixed before we are asked to change them and form new ones The ability to build patterns is fundamental to our ability to learn Ann Alder's *Pattern Making Pattern Breaking* explores the ways in which educators and facilitators can work to help students build those patterns that will be most useful to them These may be technical patterns of language number sequence or process They may be thinking patterns that support problem solving creativity logical analysis or empathy They may be patterns of behaviour that demonstrate trust influence or integrity in relationships Ann also illustrates how you can teach students to break patterns to help them move on in the learning process by recognising and rejecting long held patterns of behaviour or assumptions that are unhelpful or redundant Formal education and training do not necessarily produce learners who are well resourced to take advantage of opportunities that arise and to avoid some of the stresses that uncertainty ambiguity or imposed change place upon them So perhaps one of the most important patterns

that we can explore and understand as we move forward in a changing world is our own pattern of learning Whether you are a parent teacher tutor trainer coach or manager you need to be an effective facilitator of learning and this book is the perfect starting place Becoming a Teacher Educator Anja Swennen, Marcel van der Klink, 2008-11-06 Becoming a Teacher Educator is an impressive book for teacher educators who want to be informed about the latest views and practices of their profession It is the first book that addresses a range of topics related to the work of teacher educators the induction of teacher educators and their further professional development Becoming a Teacher Educator has a practical focus and it provides theoretical insights experiences of experts and practical recommendations The book is rooted in the Association of Teacher Education in Europe ATEE and many of the chapters are written by authors who are active members of the ATEE Researchers and practitioners from different parts of Europe and beyond joined their efforts to write a book that is truly international and combines research practice and reflection Becoming a Teacher Educator is essential reading for novice teacher educators as well as for experienced teacher educators who want to keep up with the latest insights in their profession This book provides a guide for those who supervise novice and experienced teacher educators and for various professionals who are responsible for the professional development of teacher educators There is a growing need for evidence based resources made available to future teacher educators Since a learning society requires new sets of competencies of the main actors we are most in want of knowledgeable teacher educators that support the professional development of their student teachers This book fits the actual demands Dr Joost Lowyck Professor Emeritus former director of the Teacher Education Institute Leuven University This is an original book in a very important area The editors define the concept of teacher educator widely and I think therefore that the book is relevant for schools higher education and education authorities of all kinds The authorship and theme have wide relevance across Europe Australasia and North America Prof Bob Moon Professor in Education Teaching Studies Department of Education Open University UK The book highlights that while the current global focus is very much on the need to educate sufficient and highly qualified teachers little political focus is given to those who teach the teachers What makes this book distinctive for all engaged in teacher education whether experienced or novice is that it allows the spotlight on those who teach the teachers and the opportunity for teacher educators to discuss debate and seriously examine themselves as a profession Simone White Deakin University Australia
