In Contradiction A Study Of The Transconsistent:

In Contradiction Graham Priest, 2006-02-16 Priest advocates and defends the view that there are true contradictions dialetheism a perspective that flies in the face of orthodoxy in Western philosophy since Aristotle and remains at the centre of philosophical debate This edition contains the author's reflections on developments since 1987 *In Contradiction* Graham Priest, 2006 Priest advocates and defends the view that there are true contradictions dialetheism a perspective that flies in the face of orthodoxy in Western philosophy since Aristotle and remains at the centre of philosophical debate This edition contains the author's reflections on developments since 1987

Unorthodox Minds in Contemporary Fiction Grzegorz Maziarczyk, Joanna Klara Teske, 2024-09-30 Unorthodox Minds in Contemporary Fiction seeks to provide an overview of the ways in which broadly understood contemporary fiction envisions explores and engenders minds going beyond the classical models The opening essay discusses the complex relationships between such innovative concepts of the mind and experimental techniques for presenting mentality The chapters which follow focus on disembodied and/or extended mind virtuality of avatar minds intermental thought of reader communities the capability of artificial intelligence and humans for genuine selfless love the interplay between technology and affect in posthuman consciousness The books under discussion include *Murmur* by Will Eaves *The Unfortunates* by B S Johnson *The Satanic Verses* by Salman Rushdie *H A PPY* by Nicola Barker and *Machines Like Me* by Ian McEwan A piece of conceptual fiction by Steve Tomasula one of the most innovative American novelists of our times exploring the human mind's alleged power to transcend its biological limits complements these scholarly inquiries

Truth in Fiction John Woods, 2018-02-23 This monograph examines truth in fiction by applying the techniques of a naturalized logic of human cognitive practices The author structures his project around two focal questions What would it take to write a book about truth in literary discourse with reasonable promise of getting it right What would it take to write a book about truth in fiction as true to the facts of lived literary experience as objectivity allows It is argued that the most semantically distinctive feature of the sentences of fiction is that they are unambiguously true and false together It is true that Sherlock Holmes lived at 221B Baker Street and also concurrently false that he did A second distinctive feature of fiction is that the reader at large knows of this inconsistency and isn't in the least cognitively molested by it Why it is asked would this be so What would explain it Two answers are developed According to the no contradiction thesis the semantically tangled sentences of fiction are indeed logically inconsistent but not logically contradictory According to the no bother thesis if the inconsistencies of fiction were contradictory a properly contrived logic for the rational management of inconsistency would explain why readers at large are not thrown off cognitive stride by their embrace of those contradictions As developed here the account of fiction suggests the presence of an underlying three or four valued dialethic logic The author shows this to be a mistaken impression There are only two truth values in his logic of fiction The naturalized logic of Truth in Fiction jettisons some of the standard assumptions and analytical tools of contemporary

philosophy chiefly because the neurotypical linguistic and cognitive behaviour of humanity at large is at variance with them Using the resources of a causal response epistemology in tandem with the naturalized logic the theory produced here is data driven empirically sensitive and open to a circumspect collaboration with the empirical sciences of language and cognition

Hyperintensionality and Normativity Federico L. G. Faroldi, 2019-03-28 Presenting the first comprehensive in depth study of hyperintensionality this book equips readers with the basic tools needed to appreciate some of current and future debates in the philosophy of language semantics and metaphysics After introducing and explaining the major approaches to hyperintensionality found in the literature the book tackles its systematic connections to normativity and offers some contributions to the current debates The book offers undergraduate and graduate students an essential introduction to the topic while also helping professionals in related fields get up to speed on open research level problems *Buddhism*

Between Religion and Philosophy Rafal K. Stepień, 2024 N g rjuna is the most influential of all Buddhist thinkers following the Buddha himself Throughout his works N g rjuna calls on us to completely abandon all our views But how could anyone possibly do that This book shows not only how N g rjuna s truly radical teaching of abelief makes perfect sense within his Buddhist philosophy but how it stands at the summit of his religious mission to care for all living beings Rather than treating any one aspect of N g rjuna s ideas in isolation here he emerges as forging a single system of thought and practice one that challenges the very ways in which we think about religion and philosophy **Valences of Interdisciplinarity** Raphael

Foshay, 2011 A collection of essays on interdisciplinary theory research and teaching *In Defense of Conciliar Christology* Timothy Pawl, 2016-03-10 This work presents a historically informed systematic exposition of the Christology of the first seven Ecumenical Councils of undivided Christendom from the First Council of Nicaea in 325 AD to the Second Council of Nicaea in 787 AD Assuming the truth of Conciliar Christology for the sake of argument Timothy Pawl considers whether there are good philosophical arguments that show a contradiction or incoherence in that doctrine He presents the definitions of important terms in the debate and a helpful metaphysics for understanding the incarnation In Defense of Conciliar Christology discusses three types of philosophical objections to Conciliar Christology Firstly it highlights the fundamental philosophical problem facing Christology how can one thing be both God and man when anything deserving to be called God must have certain attributes and yet it seems that nothing that can aptly be called man can have those same attributes It then considers the argument that if the Second Person of the Holy Trinity were immutable or atemporal as Conciliar Christology requires then that Person could not become anything and thus could not become man Finally Pawl addresses the objection that if there is a single Christ then there is a single nature or will in Christ However if that conditional is true then Conciliar Christology is false since it affirms the antecedent of the conditional to be true but denies the truth of the consequent Pawl defends Conciliar Christology against these charges arguing that all three philosophical objections fail to show Conciliar Christology inconsistent or incoherent Deleuze and Guattari's Philosophy of Freedom Dorothea

Olkowski, Eftichis Pirovolakis, 2019-01-31 This volume addresses the issue of freedom in the philosophy of Deleuze and Guattari. This is all the more challenging in that Deleuze and Guattari almost never use the term freedom, preferring instead the concept of the refrain. The essays collected in the volume show that freedom has been understood in a remarkably narrow sense and that in fact freedom operates as the refrain in every realm of thought and creation. The motivating approach in these essays is Deleuze and Guattari's emphasis on the irreality of media and capitalistic sign regimes which they perceive to have taken over even the practices of philosophy, the arts and science. By offering a clear and engaging treatment of the underexplored issue of freedom, this volume moves the discussion of Deleuze and Guattari's philosophy forward in ways that will appeal to researchers in Continental philosophy and a wide range of other disciplines. *Pretense and Pathology* Bradley

Armour-Garb, James A. Woodbridge, 2015-07-24 In this book Bradley Armour Garb and James A. Woodbridge distinguish various species of fictionalism, locating and defending their own version of philosophical fictionalism. Addressing semantic and philosophical puzzles that arise from ordinary language, they consider such issues as the problem of non-being, plural identity, claims, mental attitude ascriptions, meaning, attributions, and truth talk. They consider deflationism about truth, explaining why deflationists should be fictionalists, and show how their philosophical fictionalist account of truth talk underwrites a dissolution of the Liar Paradox and its kin. They further explore the semantic notions of reference and predicate satisfaction, showing how philosophical fictionalism can also resolve puzzles that these notions appear to present. Their critical examination of fictionalist approaches in philosophy, together with the development and application of their own brand of philosophical fictionalism, will be of great interest to scholars and upper level students of philosophy of language, metaphysics, philosophical logic, philosophy of mind, epistemology, and linguistics. **Demonstration and Burhan** Qusthan

A. H. Firdaus, 2024-11-29 This book investigates the historical development of Aristotle's perfect syllogism or demonstration into the Muslim world. It provides an accessible account to the modern reader while at the same time bringing to the discussion the important issue of the specifically Muslim contribution to the field of logic. The author emphasizes the importance of axioms in establishing demonstration and the modern logic of dialetheia. Graham Priest's idea of some true contradictions in Islamic discourses. While Muslim philosophers have been claiming that demonstration is equal to burhan in mantiq or logic in Islamic education, this book presents the fact that burhan sets aside the necessity of axioms, making the former seem to be a deviation from Aristotle's demonstration. The variety of Islamic philosophies has not been adequate enough to develop logic in Islamic education as progressive as its European counterparts. This book is an invitation to students and researchers to reconsider mantiq or logic in Islamic education based upon the Aristotelian logic and the modern logic of dialetheia, given that one cannot comprehend various Islamic discourses simply by exercising the Aristotelian principles of identity, non-contradiction, and excluded middle. In providing a useful overview of Aristotle before launching into a discussion on the various positions that Muslim scholars take regarding demonstration, the author presents a better

framework for scholars and students in philosophy and religious studies to grasp several controversial and peculiar ideas in Islam

Handbook of Philosophical Logic Dov M. Gabbay, Franz Guenther, 2013-03-09 It is with great pleasure that we are presenting to the community the second edition of this extraordinary handbook It has been over 15 years since the publication of the first edition and there have been great changes in the landscape of philosophical logic since then The first edition has proved invaluable to generations of students and researchers in formal philosophy and language as well as to consumers of logic in many applied areas The main logic article in the Encyclopaedia Britannica 1999 has described the first edition as the best starting point for exploring any of the topics in logic We are confident that the second edition will prove to be just as good The first edition was the second handbook published for the logic community It followed the North Holland one volume Handbook of Mathematical Logic published in 1977 edited by the late Jon Barwise The four volume Handbook of Philosophical Logic published 1983 1989 came at a fortunate temporal junction at the evolution of logic This was the time when logic was gaining ground in computer science and artificial intelligence circles These areas were under increasing commercial pressure to provide devices which help and or replace the human in his daily activity This pressure required the use of logic in the modelling of human activity and organisation on the one hand and to provide the theoretical basis for the computer program constructs on the other

Reason, Truth and Reality Daniel Goldstick, 2009-06-02 Dan Goldstick's Reason Truth and Reality addresses two questions what sort of world do we inhabit and what moral obligations do we have To answer the questions Goldstick mounts a bold contemporary defense of pre Kantian rationalism Basing consideration upon a characterization of reason in its deductive inductive and ethical functioning he asks what must hold good for reason so characterized to be a dependable guide to truth The conclusions Goldstick draws are threefold First of all the argument points to continuous deterministic causality throughout space and time In the second place a case is made for universal impermanence And thirdly Goldstick claims to establish a basis for the right within a version of utilitarianism supporting the maximum long term promotion of people's interests The discussion takes in such traditional rationalist themes as apriority conceivability and antiscpticism and such analytic topics as belief and desire truthvaluelessness and epistemic reliability

The Moon Points Back Koji Tanaka, Yasuo Deguchi, Jay L. Garfield, Graham Priest, 2015-06-01 The Moon Points Back comprises essays by both established scholars in Buddhist and Western philosophy and young scholars contributing to cross cultural philosophy It continues the program of Pointing at the Moon Oxford University Press 2009 integrating the approaches and insights of contemporary logic and analytic philosophy along with those of Buddhist Studies in order to engage with Buddhist ideas in a contemporary voice The essays in the volume focus on the Buddhist notion of emptiness sunyata exploring its relationship to core philosophical issues concerning the self the nature of reality logic and epistemology The volume closes with reflections on methodological issues raised by bringing together traditional Buddhist philosophy and contemporary analytic philosophy The Moon Points Back demonstrates convincingly that integration of Buddhist philosophy

with contemporary analytic philosophy and logic allows for novel understandings of and insights into Buddhist philosophical thought It also shows how Buddhist philosophers can contribute to debates in contemporary Western philosophy and how contemporary philosophers and logicians can engage with Buddhist material

Graham Priest on Dialetheism and Paraconsistency Can Başkent, Thomas Macaulay Ferguson, 2020-01-01 This book presents the state of the art in the fields of formal logic pioneered by Graham Priest It includes advanced technical work on the model and proof theories of paraconsistent logic in contributions from top scholars in the field Graham Priest's research has had a considerable influence on the field of philosophical logic especially with respect to the themes of dialetheism the thesis that there exist true but inconsistent sentences and paraconsistency an account of deduction in which contradictory premises do not entail the truth of arbitrary sentences Priest's work has regularly challenged researchers to reappraise many assumptions about rationality ontology and truth This book collects original research by some of the most esteemed scholars working in philosophical logic whose contributions explore and appraise Priest's work on logical approaches to problems in philosophy linguistics computation and mathematics They provide fresh analyses critiques and applications of Priest's work and attest to its continued relevance and topicality The book also includes Priest's responses to the contributors providing a further layer to the development of these themes

Legal Monism Paul Gragl, 2018-03-16 In response to a climate in which respect for international law and the law of the European Union is rapidly losing ground Paul Gragl advocates for the revival of legal monism as a solution to potentially irresolvable normative conflicts between different bodies of law In this first comprehensive monograph on the theory as envisaged by the Pure Theory of Law of the Vienna School of Jurisprudence the author defends legal monism against the competing theories of dualism and pluralism Drawing on philosophical epistemological legal moral and political arguments this book argues that only monism under the primacy of international law takes the law and the concept of legal validity seriously On a practical level it offers policy makers and decision makers methods of dealing with current problems and a means to restore respect for international law and peaceful international relations While having the potential to revive and elicit further interest and research in monism and the Pure Theory of Law the comprehensiveness and scope of the book also make it a choice text for inter disciplinary scholars

Philosophy in Classical India Jonardon Ganeri, 2003-09-01 This original work focuses on the rational principles of Indian philosophical theory rather than the mysticism more usually associated with it Ganeri explores the philosophical projects of a number of major Indian philosophers and looks into the methods of rational inquiry deployed within these projects In so doing he illuminates a network of mutual reference criticism influence and response in which reason is used to call itself into question This fresh perspective on classical Indian thought unravels new philosophical paradigms and points towards new applications for the concept of reason

Arguing on the Toulmin Model David Hitchcock, Bart Verheij, 2007-01-24 Summarizing in The Uses of Argument Toulmin emphasized a number of points that are by now familiar but still deserve attention 1

Reasoning and argument involve not only support for points of view but also attack against them 2 Reasoning can have qualified conclusions 3 There are other good types of argument than those of standard formal logic 4 Unstated assumptions linking premisses to a conclusion are better thought of as inference licenses than as implicit premisses 5 Standards of reasoning can be field dependent and can be themselves the subject of argumentation Each of these points is illustrated by his layout of arguments The rebuttal illustrates the first point the qualifier the second point and the warrant and backing the last three points 2 RECEPTION OF TOULMIN S BOOK As Toulmin himself notes in his essay in this volume which was delivered as an address in 2005 his fellow philosophers were initially hostile to the ideas in his book They were taken up however by specialists in fields like jurisprudence and psychology who found that they fit the forms of argument and reasoning that they were studying And Toulmin s model was embraced by the field of speech communication in the United States whose textbooks on argumentation now include an obligatory chapter on the Toulmin model of micro arguments

Science Ideated Bernardo Kastrup, 2021-08-27 Leading edge empirical observations are increasingly difficult to reconcile with scientific materialism Laboratory results in quantum mechanics for instance strongly indicate that there is no autonomous world of tables and chairs out there Coupled with the inability of materialist neuroscience to explain consciousness this is forcing both science and philosophy to contemplate alternative worldviews Analytic idealism the notion that reality while equally amenable to scientific inquiry is fundamentally mental is a leading contender to replace scientific materialism In this book the broad body of empirical evidence and reasoning in favor of analytic idealism is reviewed in an accessible manner The book brings together a number of highly influential essays previously published by major media outlets such as Scientific American and the Institute of Art and Ideas The essays have been revised and improved while two neverbeforepublished essays have been added The resulting argument anticipates a historically imminent transition to a scientific worldview that while elegantly accommodating all known empirical evidence and predictive models regards mind not matter as the ground of all reality *The Construction of Logical Space* Agustín Rayo, 2013-06-27 Our conception of logical space is the set of distinctions we use to navigate the world In *The Construction of Logical Space* Agustín Rayo defends the idea that one s conception of logical space is shaped by one s acceptance or rejection of just is statements statements like to be composed of water just is to be composed of H₂O or for the number of the dinosaurs to be zero just is for there to be no dinosaurs The resulting picture is used to articulate a conception of metaphysical possibility that does not depend on a reduction of the modal to the non modal and to develop a trivialist philosophy of mathematics according to which the truths of pure mathematics have trivial truth conditions
