Improving Software Practice Colin Tully, 1998-11-30 Improving Software Practice Case Experiences Edited by Colin Tully Colin Tully Associates UK The software process is a business critical process for many organizations For them improving software practice is both an imperative and a continuing challenge to achieve success and even survival This applies whether the organization develops software as its main business embeds software in its products or depends on software to underpin its business operations This book presents case histories of eight very different organizations each engaged in improving its software practice Each organization has made its own individual evaluation of where its improvement priority lies but they all share common experiences of what must be done in order to succeed in improving practice Any software manager or practitioner facing the need for improvement will learn from these real life stories recounted by those who have been there already seen the opportunities and struggled with the problems No two companies are the same or should adopt a standard approach but there are common lessons to be shared and this book exposes many of those common lessons in a way that is both readable and convincing This book documents the following Eight case studies that give an insight into software process improvement in the business environment Experience from various aspects of software process improvement Coverage of all parts of the complete software lifecycle Produced and funded within the framework of the ESSI initiative of the European Commission is Programme

Improving Software Testing Tim A. Majchrzak, 2012-02-03 Software is continuously increasing in complexity Paradigmatic shifts and new development frameworks make it easier to implement software but not to test it Software testing remains to be a topic with many open questions with regard to both technical low level aspects and to the organizational embedding of testing However a desired level of software quality cannot be achieved by either choosing a technical procedure or by optimizing testing processes In fact it requires a holistic approach This Brief summarizes the current knowledge of software testing and introduces three current research approaches The base of knowledge is presented comprehensively in scope but concise in length thereby the volume can be used as a reference Research is highlighted from different points of view Firstly progress on developing a tool for automated test case generation TCG based on a program s structure is introduced Secondly results from a project with industry partners on testing best practices are highlighted Thirdly embedding testing into e assessment of programming exercises is described

Improving the Adoption of Software Engineering Practices Through Persuasive Interventions Leif-Gerrit Singer, 2013-01-03 Software engineering practices and methodologies can improve software quality and developer productivity However they are not always adopted by developers even when mandated by an organization There can be different reasons for this missing motivation peer pressure or perceived complexity can prevent successful adoption This dissertation provides an approach to improve the adoption of software engineering practices by developers that uses non coercive means As an augmentation to mandating practices it uses persuasive software based interventions that can facilitate

creativity autonomy and other crucial factors in software development To support organizations in designing such interventions the thesis provides a catalog of adoption patterns abstract solutions to adoption problems A systematic and iterative process provides guidance in the application of these patterns to an organization s situation An evaluation shows that the process and the adoption patterns are effective *Improving Software Organizations* Lars Mathiassen, Jan Pries-Heje, Ojelanki Ngwenyama, 2002 Another stupendously gripping thriller from the author of *Gideon* *Software Engineering: Effective Teaching and Learning Approaches and Practices* Ellis, Heidi J.C., Demurjian, Steven A., Naveda, J.
