morphology shape of the crystals ii the asbestos cement mineralogical composition using SEM analyses and iii high magnification structure of the individual fibers fibrils as well as iv energy dispersive x ray analysis of the fiber chemistry by comparison to a standard Also quantification analysis of fiber length and thickness was performed due to the reason that fibrogenicity and carcinogenicity of asbestos fibers are both dependent on several fiber parameters including fiber dimensions There are several standards specified under the Factories Act and Mines Act including limits of exposure But standards in India are only on paper All forms of asbestos pose grave to human health All are proven human carcinogens There is no continued justification for the use of asbestos Its production and use should be banned worldwide A global ban on asbestos is needed Diamonds (3rd Edition) Antoinette Matlins,2011 Whether buying for personal pleasure or for investment in today s market of Internet auctions new diamond cuts new colours new treatments and new frauds buyers need a source of expert guidance This comprehensive guide from diamond expert and best selling author Antoinette Matlins is the unofficial bible for all diamond buyers who want to get the most for their money
