Debating European Security and Defense Policy Maxime H. A. Larivé, 2016-05-13 Dr Lariv questions whether there is such a thing as a European defense and security policy This book analyzes the integration process by clearly illustrating to the reader the two sides of the argument in order to understand the complexity of the problems in the different stages of the creation and implementation of the European defense policy In doing so this study asks the question of why has the process been so halting and of such limited scope Structured in three parts Theories analyzing the theoretical debates raised by the positivist paradigms of neorealism liberalism and constructivism on European security History reflecting on the impacts of the Cold War American foreign policy the 2008 economic crisis and the evolution of European strategy and Actors by looking at the role of European institutions Member States and the CSDP on the transformation of the European defense policy since 1998 Each chapter is composed of sub questions allowing the reader to grasp the different forces explaining the deepening or lack of the deepening process of the CSDP Ultimately this book offers a unique base for fostering discussion understanding and critical thinking on the CSDP **A European Security Architecture after the Cold War** G.

Aybet, 2000-06-05 A European Security Architecture after the Cold War provides a critical account of the re projection and redefinition of Western values and security institutions in the post Coldwar era This transformation is explored in three stages The first stage covers the period 1990 91 and explains the preservation of a western security community inherited from the Cold War through a process of institutional reconstruction largely carried out on paper The second stage from 1991 to 1992 sees the incorporation of a purpose for these institutions as a framework for the implementation of collective security The third stage explores the emerging questions of legitimacy surrounding the new tasks of these institutions as they become embroiled in the war in the former Yugoslavia The precedents of legitimate intervention in upholding democracy free markets and human rights in the post coldwar era are examined from the perspectives of international law and Gramscian derived concepts of legitimacy focusing on the acceptance of military power by civil society and how intervention in these terms becomes a cultural practice **European Security in Transition** Franz Kernic, 2016-04-22 Since the end of World

European Security and Hybrid Threats Zeynep Arkan, 2025-03-21 Hybrid threats have been defined in various ways by different security actors with their scope continuously expanding to encompass emerging insecurities within the evolving security environment As an umbrella term encompassing a wide spectrum of threats with complex and multidimensional features the notion of hybrid threats remains inherently vague and amorphous This lack of clarity presents significant challenges for policymakers who must constantly identify potential dangers anticipate risks and formulate effective responses to safeguard their polities and populations Consequently a persistent sense of insecurity has become a defining characteristic of the current European security landscape This new normal of European security is characterised by a series of un known unknowns that fall under the elusive concept of hybrid threats However rather than accepting this evolving security paradigm at face value this study calls for a critical examination of its underlying assumptions core concepts and broader political implications It argues that the hybrid threat narrative demands a re evaluation of what security means in contemporary Europe and how it is operationalised Moreover the study underscores the expansive nature of the hybrid threat framework which has the potential to include virtually any domain ranging from education and technology to research and public infrastructure thereby contributing to the securitisation of all aspects of social and political life This expansive and ambiguous framing raises important questions about the limits of security and allocation of resources carrying considerable implications for democratic governance in Europe Dr Zeynep Arkan is an Associate Professor of International Relations at Hacettepe University Ankara
