A Heart for the Future Robert Boak Slocum,2018-02-20 Apart from impressive liturgical expressions every year in Advent and one stirring statement called The Christian Hope which concludes the Prayer Book Catechism the Episcopal Church is not known for its formation and application of eschatology the doctrine of last things A Heart for the Future Writings on the Christian Hope may change that The distinguished and diverse contributing authors including Robert M Cooper Robert D Hughes Harold T Lewis Fredrica Harris Thompsett Paul F M Zahl and Robert Boak Slocum who is also the general editor differ widely in method meaning and approach They are very much alike however in the rigor with which they profess their faith in the Christian future avoiding the simplistic eschatology that would cleave the Body of Christ in two by creating a false dichotomy between walking with God in this world and walking toward God in the next The choice Christians must make is not between the now and the external it is between being forward looking and being backward looking Unless we look with eagerness and longing toward the future we will stay stranded in the past To live the Christian life today we need A Heart for the Future Science and Literature in Cormac McCarthy's Expanding Worlds Bryan Giemza,2023-05-04

Bryan Giemza challenges the myth of the solitary genius both in scientific and humanistic endeavors and demonstrates how Cormac McCarthy is the exceptional figure whose work allows and encourages us to interrogate the marriage of the sciences and humanities Drawing from previously unsurfaced archival connections as well as a range of primary sources and interview subjects including those close to McCarthy Giemza places McCarthy s work within contemporary scientific discourse and literary criticism Timely and innovative in both content and structure the volume includes a biographical examination of the

writer's love of science and the path that led him to the Santa Fe Institute and offers a rare look behind its closed doors. The book probes the STEM subjects with chapters focused on technology, engineering, and math within and throughout McCarthy's fictional universe and biography. The final chapter explores McCarthy's friendship with Guy Davenport and their shared interest in creating a unified aesthetic theory alongside McCarthy's essays and most recent literary projects, *The Passenger* and *Stella Maris*. In arguing that science and art are connected by aesthetics, Giemza confirms the profound truth of McCarthy's unwavering belief that there is a beauty to science and a language of human understanding that transcends words.
