## From Data To Knowledge:

*From Data and Information Analysis to Knowledge Engineering* Myra Spiliopoulou, Rudolf Kruse, Christian Borgelt, Andreas Nürnberger, Wolfgang A. Gaul, 2006-04-20 This volume collects revised versions of papers presented at the 29th Annual Conference of the Gesellschaft für Klassifikation the German Classification Society held at the Otto von Guericke University of Magdeburg Germany in March 2005 In addition to traditional subjects like Classification Clustering and Data Analysis coverage extends to a wide range of topics relating to Computer Science Text Mining Web Mining Fuzzy Data Analysis IT Security Adaptivity and Personalization and Visualization Enterprise Information Portals and Knowledge Management Joseph M. Firestone, 2003 Practical and comprehensive approach to enterprise portals and their relationship to knowledge management Key Issues in the New Knowledge Management Joseph M. Firestone, Mark W. McElroy, 2012-06-25 In Key Issues in the New Knowledge Management Firestone and McElroy the architects of the New Knowledge Management TNKM provide an in depth analysis of the most important issues in the field of Knowledge Management The issues the book addresses are central in the field today The Knowledge Wars or the issue of how you define knowledge determines how you manage it The nature of knowledge processing Information management or knowledge management Three views on the evolution of knowledge management The role of knowledge claim evaluation in knowledge processing or the difference between opinion judgements information data and real knowledge in knowledge management systems Is culture a barrier in knowledge management The Open Enterprise and accelerated sustainable innovation Portals How should one evaluate KM software Intellectual Capital Measuring the impact of KM initiatives on the organization and the bottom line KM and terrorism **Transactions on Large-Scale Data- and Knowledge-Centered Systems XVII** Abdelkader Hameurlain, Josef Küng, Roland Wagner, Ladjel Bellatreche, Mukesh Mohania, 2015-01-29 The LNCS journal Transactions on Large Scale Data and Knowledge Centered Systems focuses on data management knowledge discovery and knowledge processing which are core and hot topics in computer science Since the 1990s the Internet has become the main driving force behind application development in all domains An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data and knowledge management systems from centralized systems to decentralized systems enabling large scale distributed applications providing high scalability Current decentralized systems still focus on data and knowledge as their main resource Feasibility of these systems relies basically on P2P peer to peer techniques and the support of agent systems with scaling and decentralized control Synergy between grids P2P systems and agent technologies is the key to data and knowledge centered systems in large scale environments This the 17th issue of Transactions on Large Scale Data and Knowledge Centered Systems contains extended and revised versions of five papers selected from the 24 full and 8 short papers presented at the 15th International Conference on Data Warehousing and Knowledge Discovery DaWaK 2013 held in Prague The Czech Republic in August 2013 Of the five papers two cover data

*Knowledge Discovery in Spatial Data* Yee Leung, 2010-03-14 When I first came across the term data mining and knowledge discovery in databases I was excited and curious to find out what it was all about I was excited because the term tends to convey a new field that is in the making I was curious because I wondered what it was doing that the other fields of research such as statistics and the broad field of artificial intelligence were not doing After reading up on the literature I have come to realize that it is not much different from conventional data analysis The commonly used definition of knowledge discovery in databases the non trivial process of identifying valid novel potentially useful and ultimately understandable patterns in data is actually in line with the core mission of conventional data analysis The process employed by conventional data analysis is by no means trivial and the patterns in data to be unraveled have of course to be valid novel useful and understandable Therefore what is the commotion all about Careful scrutiny of the main lines of research in data mining and knowledge discovery again told me that they are not much different from that of conventional data analysis Putting aside data warehousing and database management aspects again a main area of research in conventional database research the rest of the tasks in data mining are largely the main concerns of conventional data analysis

Document Mining Web Mining Bio Data Mining and more      Decomposition Methodology for Knowledge Discovery and Data Mining Oded Z. Maimon, Lior Rokach, 2005 Data Mining is the science and technology of exploring data in order to discover previously unknown patterns It is a part of the overall process of Knowledge Discovery in Databases KDD The accessibility and abundance of information today makes data mining a matter of considerable importance and necessity This book provides an introduction to the field with an emphasis on advanced decomposition methods in general data mining tasks and for classification tasks in particular The book presents a complete methodology for decomposing classification problems into smaller and more manageable sub problems that are solvable by using existing tools The various elements are then joined together to solve the initial problem The benefits of decomposition methodology in data mining include increased performance classification accuracy conceptual simplification of the problem enhanced feasibility for huge databases clearer and more comprehensible results reduced runtime by solving smaller problems and by using parallel distributed computation and the opportunity of using different techniques for individual sub problems      *Data Mining and Medical Knowledge Management: Cases and Applications* Berka, Petr, Rauch, Jan, Zighed, Djamel Abdelkader, 2009-02-28 The healthcare industry produces a constant flow of data creating a need for deep analysis of databases through data mining tools and techniques resulting in expanded medical research diagnosis and treatment Data Mining and Medical Knowledge Management Cases and Applications presents case studies on applications of various modern data mining methods in several important areas of medicine covering classical data mining methods elaborated approaches related to mining in electroencephalogram and electrocardiogram data and methods related to mining in genetic data A premier resource for those involved in data mining and medical knowledge management this book tackles ethical issues related to cost sensitive learning in medicine and produces theoretical contributions concerning general problems of data information knowledge and ontologies
