Endangered Languages Language Loss And Community Response:

Endangered Languages Lenore A. Grenoble, Lindsay J. Whaley, 1998-03-26 This book provides an overview of the issues surrounding language loss. It brings together work by theoretical linguists, field linguists and non linguist members of minority communities to provide an integrated view of how language is lost from sociological and economic as well as from linguistic perspectives. The contributions to the volume fall into four categories. The chapters by Dorian and Grenoble and Whaley provide an overview of language endangerment. Grinevald, England, Jacobs and Nora and Richard Dauenhauer describe the situation confronting threatened languages from both a linguistic and sociological perspective. The understudied issue of what beyond a linguistic system can be lost as a language ceases to be spoken is addressed by Mithun, Hale, Jocks and Woodbury. In the last section, Kapanga, Myers, Scotton and Vakhtin consider the linguistic processes which underlie language attrition.

The SAGE Handbook of Sociolinguistics Ruth Wodak, Barbara Johnstone, Paul E. Kerswill, 2011 This Handbook answers a long standing need for an up to date comprehensive international in depth critical survey of the history, trajectory, data, results and key figures involved in sociolinguistics. The result is a work of unprecedented coverage and insight. It is all here from the foundational contributions to the field to the impact of new media, new technologies of communication, globalization, trans border fluidities and agendas of research.

Responses to Language Endangerment Elena Mihas, Bernard Perley, Gabriel Rei-Doval, Kathleen Wheatley, 2013-11-15 This volume further complicates and advances the contemporary perspective on language endangerment by examining the outcomes of the most commonly cited responses to language endangerment, i.e. language documentation, language revitalization and training. The present collection takes stock of many complex and pressing issues such as the assessment of the degree of language endangerment, the contribution of linguistic scholarship to language revitalization programs, the creation of successful language reclamation programs, the emergence of languages that arise as a result of revitalization efforts after interrupted transmission, the ethics of fieldwork and the training of field linguists and language educators. The volume's case studies provide detailed personal accounts of fieldworkers and language activists who are grappling with issues of language documentation and revitalization in the concrete physical and socio cultural settings of native speaker communities in different regions of the world.

Undescribed and Endangered Languages Amedeo De Dominicis, 2009-03-26 The book is devoted to linguistic and phonetic analysis of some undescribed and endangered languages. It collects the Proceedings of the international conference on Undescribed and endangered languages: the preservation of linguistic diversity held in University of Tuscia, Viterbo, Italy on September 29, 2005. Papers are by Roberto Ajello, Pisa; Amedeo De Dominicis, Viterbo; Maurizio Gnerre, Napoli; Antonino Melis, N. Djama. It will appeal to linguists, phoneticians and phonologists as a contribution to the debate it discusses and it will be welcomed by a wide range of students and researchers as an ideal overview of recent works.

Ethnography and Language Policy Teresa L. McCarty, 2014-04-04 Illuminating through ethnographic inquiry how individual agents make language policy in everyday social practice this volume advances the growing field of language planning and policy using a critical sociocultural approach From this perspective language policy is conceptualized not only as official acts and documents but as language regulating modes of human interaction negotiation and production mediated by relations of power Using this conceptual framework the volume addresses the impacts of globalization diaspora and transmigration on language practices and policies language

endangerment revitalization and maintenance medium of instruction policies literacy and biliteracy language and ethnic national identity and the ethical tensions in conducting critical ethnographic language policy research These issues are contextualized in case studies and reflective commentaries by leading scholars in the field *Ethnography and Language Policy* extends previous work in the field tapping into leading edge interdisciplinary scholarship and charting new directions Recognizing that language policy is not merely or even primarily about language per se but rather about power relations that structure social linguistic hierarchies the authors seek to expand policy discourses in ways that foster social justice for all

The Oxford Handbook of Endangered Languages Kenneth L. Rehg, Lyle Campbell, 2018-07-18. The endangered languages crisis is widely acknowledged among scholars who deal with languages and indigenous peoples as one of the most pressing problems facing humanity, posing moral, practical, and scientific issues of enormous proportions. Simply put, no area of the world is immune from language endangerment. The *Oxford Handbook of Endangered Languages* in 39 chapters provides a comprehensive overview of the efforts that are being undertaken to deal with this crisis. A comprehensive reference reflecting the breadth of the field, the Handbook presents in detail both the range of thinking about language endangerment and the variety of responses to it and broadens understanding of language endangerment, language documentation, and language revitalization, encouraging further research. The Handbook is organized into five parts. Part 1, *Endangered Languages*, addresses the fundamental issues that are essential to understanding the nature of the endangered languages crisis. Part 2, *Language Documentation*, provides an overview of the issues and activities of concern to linguists and others in their efforts to record and document endangered languages. Part 3, *Language Revitalization*, includes approaches, practices, and strategies for revitalizing endangered and sleeping/dormant languages. Part 4, *Endangered Languages and Biocultural Diversity*, extends the discussion of language endangerment beyond its conventional boundaries to consider the interrelationship of language, culture, and environment and the common forces that now threaten the sustainability of their diversity. Part 5, *Looking to the Future*, addresses a variety of topics that are certain to be of consequence in future efforts to document and revitalize endangered languages.
