Engineering Distributed Objects Wolfgang Emmerich, Stefan Tai, 2003-06-29 This book constitutes the thoroughly refereed post proceedings of the Second International Workshop on Engineering Distributed Objects EDO 2000 held in November 2000 in Davis California USA The 15 revised full papers presented together with session surveys were carefully reviewed and selected from 30 submissions The book presents topical sections on middleware selection resource management architectural reasoning distributed communication advanced transactions and service integration

Engineering Distributed Objects Wolfgang Emmerich, 2002 Wolfgang Emmerich Engineering Distributed Objects The pay offs for creating distributed applications are in achieving portability scalability and fault tolerance In order to simplify building software that performs robustly regardless of platform or network infrastructure a new strata of middleware has been created This book provides a conceptual framework within which to describe object oriented middleware for the integration of distributed objects UML is used to explain distributed systems concepts Presenting both an extended case study and smaller illustrative examples there are pl

Engineering Distributed Objects Wolfgang Emmerich, Stefan Tai, 2014-01-15 *Engineering Distributed Objects* Claude L. Emmerich, Wolfgang Emmerich, 2000-04 Constructing a distributed system is quite different from using one to create applications that can perform in a distributed environment While other books simply focus on the building of infrastructures this one shows the reader how to create these applications on top of distributed components This unique approach will help software developers achieve portability and provide multi user access over networks Divided into two parts Concepts Infrastructures for Distributed Objects Java Microsoft DCOM OMG CORBA and Common Design Problems this book provides the latest technology developments *Engineering Distributed Objects* Wolfgang Emmerich, Stefan Tai, 2001-02-28 This book constitutes the thoroughly refereed post proceedings of the Second International Workshop on Engineering Distributed Objects EDO 2000 held in November 2000 in Davis California USA The 15 revised full papers presented together with session surveys were carefully reviewed and selected from 30 submissions The book presents topical sections on middleware selection resource management architectural reasoning distributed communication advanced transactions and service integration *Engineering Distributed Objects* Wolfgang Emmerich, Stefan Tai, 2001-02-28 This book constitutes the thoroughly refereed post proceedings of the Second International Workshop on Engineering Distributed Objects EDO 2000 held in November 2000 in Davis California USA The 15 revised full papers presented together with session surveys were carefully reviewed and selected from 30 submissions The book presents topical sections on middleware selection resource management architectural reasoning distributed communication advanced transactions and service integration Engineering Distributed Objects Wolfgang Emmerich, EDO., **Distributed Object Architectures with CORBA** Henry Balen, 2000-02-13 Distributed Object Architectures with CORBA is a guide to designing software comprised of distributed

components While it is based on OMG's Common Object Request Broker Architecture CORBA standard the principles also apply to architecture built with other technology such as Microsoft's DCOM As ORB products evolve to incorporate new additions to CORBA the knowledge and experience required to build stable and scalable systems is not widespread With this volume the reader can develop the skills and knowledge that are necessary for building such systems The book assumes a familiarity with object oriented concepts and the basics of CORBA Software developers who are new to building systems with CORBA based technologies will find this a useful guide to effective development

Advances in Exception Handling Techniques Alexander Romanovsky,Christophe Dony,Jorgen Lindskov Knudsen,Anand Tripathi,2003-06-29 Modern software systems are becoming more complex in many ways and have to cope with a growing number of abnormal situations which in turn are increasingly complex to handle The most general way of dealing with these problems is by incorporating exception handling techniques in software design In the past various

exception handling models and techniques have been proposed and many of them are part of practical languages and software composition technologies This book is composed of five parts which deal with topics related to exception handling in the context of programming language models design methodologies concurrent and distributed systems applications and experiences and large scale systems such as database and workflow process management systems The 17 coherently written chapters by leading researchers competently address a wide range of issues in exception handling

Software Architecture Flavio Oquendo, Brian Warboys, Ron Morrison, 2004-05-26 The last decade has been one of great progress in the field of software architecture research and practice Software architecture has emerged as an important subdiscipline of software engineering A key aspect of the design of any software system is its architecture i e the fundamental organization of a system embodied in its components their relationships to each other and to the environment and the principles guiding its design and evolution as defined in the Recommended Practice for Architectural Description of Software Intensive Systems IEEE Std 1471-2000 The First European Workshop on Software Architecture EWSA 2004 provided an international forum for researchers and practitioners from academia and industry to discuss a wide range of topics in the area of software architecture and to jointly formulate an agenda for future research in this field EWSA 2004 distinguished among three types of papers research papers which describe authors novel research work experience papers which describe real world experiences related to software architectures and position papers which present concise arguments about a topic of software architecture research or practice The Program Committee selected 19 papers 9 research papers 4 experience papers and 6 position papers out of 48 submissions from 16 countries Australia Brazil Canada Chile Finland France Germany Italy Japan Korea The Netherlands Spain Switzerland Turkey UK USA All submissions were reviewed by three members of the Program Committee
