Historians Guide To Statistics Quantitative Analysis And Historical Research:

Historian's Guide to Statistics Charles M. Dollar, Richard J. Jensen, 1971 *Quantitative Methods for Historians* Konrad Hugo Jarausch, 1991 The pioneering texts in quantitative history were written over two decades ago but as a command of methodological context computer experience and statistical literacy have become increasingly important to the study of history the need for an introductory *An Introduction to Quantitative Methods for Historians* Roderick Floud, 2013-11-05 Many statements made by historians are quantitative statements involving the use of measurable historical evidence The historian who uses quantitative methods to analyse and interpret such information needs to be well acquainted with the particular methods and techniques of analysis and to be able to make the best use of the data that are available There is an increasing need for training in such methods and in the interpretation of the large volume of literature now using quantitative techniques Dr Floud's text which is relevant to all branches of historical inquiry provides a straightforward and intelligible introduction for all students and research workers The simpler and more useful techniques of descriptive and analytical statistics are described up to the level of simple linear regression Historical examples are used throughout and great attention is paid to the need to ensure that the techniques are consistent with the quality of the data and with the historical problems they are intended to solve Attention is paid to problems of the analysis of time series which are of particular use to historians No previous knowledge of statistics is assumed and the simple mathematical techniques that are used are fully and clearly explained without the use of more mathematical knowledge than is provided by an O level course A bibliography is provided to guide historians towards the most useful further reading This student friendly text was first published in 1973 **Computing for Historians** Evan Mawdsley, Thomas Munck, 1993 This guide is intended to introduce historians to some of the ways in which the computer revolution can be of benefit in dealing with their sources and presenting their findings **The SAGE Handbook of Social Science Methodology** William Outhwaite, Stephen Turner, 2007-10-18 An excellent guidebook through different approaches to social science measurement including the all important route maps that show us how to get there Roger Jowell City University In this wide ranging collection of chapters written by acknowledged experts in their fields Outhwaite and Turner have brought together material in one volume which will provide an extremely important platform for consideration of the full range of contemporary analytical and methodological issues Charles Crothers Auckland University of Technology This is a jewel among methods Handbooks bringing together a formidable collection of international contributors to comment on every aspect of the various central issues complications and controversies in the core methodological traditions It is designed to meet the needs of those disciplinary and nondisciplinary problem oriented social inquirers for a comprehensive overview of the methodological literature The text is divided into 7 sections Overviews of methodological approaches in the social sciences Cases comparisons and theory Quantification and experiment Rationality complexity and collectivity Interpretation critique and

postmodernity Discourse construction Engagement Edited by two leading figures in the field the Handbook is a landmark work in the field of research methods More than just a cookbook that teaches readers how to master techniques it will give social scientists in all disciplines an appreciation for the full range of methodological debates today from the quantitative to the qualitative giving them deeper and sharpen insights into their own research questions It will generate debate solutions and a series of questions for researchers to exploit and develop in their research and teaching **The Study of History**

,2000 History is a subject which never stands still It is always changing its philosophies its contours its leading questions its politics its conceptual status and its methodologies This bibliographical guide to the study of history is wide ranging in scope extending from the ancient world to the 20th century It deliberately concentrates on modern historians views provides a substantial section on the philosophy of history charts controversies and highlights the continual evolution and diversification of history The material is logically organized in major areas and subsections and cross references are given where appropriate An index of authors editors and compilers is also provided

Correlation and Regression Analysis Thomas J. Archdeacon,1994 A blueprint for historians to understand and evaluate the variables and discusses the fundamentals of regression analysis 2 looks at procedures for assessing the level of association among diagnostic methods for identifying and correcting shortcomings Finally part 3 presents more advanced topics including in regression models quantitative analyses they re likely to encounter in journal literature and monographs on research in the social sciences ignore the fact that most historians have little background in mathematics would be folly to decipher equations and follow their logic Concepts are introduced carefully and the operation of equations is explained step by step Annotation copyright by Book News Inc Portland OR *Quantitative History and Uncharted People* Johan Fourie,2023-08-10 One of the biggest challenges in the study of history is the unreliable nature of traditional archival sources which omit histories of marginalised groups This book makes the case that quantitative history offers a way to fill these gaps in the archive Showcasing 13 case studies from the South African past it applies quantitative sources tools and methods to social histories from below to uncover the experiences of unchartered peoples Examining the occupations of slaves victims of the Spanish flu health of schoolchildren and more it shows how quantitative tools can be particularly powerful in regions where historical records are preserved but questions of bias and prejudice pervade Applying methods such as GIS mapping network analysis and algorithmic matching techniques it explores histories of indigenous peoples women enslaved peoples and other groups marginalised in South African history Connecting quantitative sources and new forms of data interpretation with a narrative social history this book offers a fresh approach to quantitative methods and shows how they can be used to achieve a more complete picture of the past

Technology and the Historian Adam Crymble, 2021-04-13 Charting the evolution of practicing digital history Historians have seen their field transformed by the digital age Research agendas teaching and learning scholarly communication the nature of the archive all have undergone a sea change that in and of itself constitutes a fascinating digital history Yet technology's role in the field's development remains a glaring blind spot among digital scholars Adam Crymble mines private and web archives social media and oral histories to show how technology and historians have come together Using case studies Crymble merges histories and philosophies of the field separating issues relevant to historians from activities in the broader digital humanities movement Key themes include the origin myths of digital historical research a history of mass digitization of sources how technology influenced changes in the curriculum a portrait of the self-learning system that trains historians and the problems with that system how blogs became a part of outreach and academic writing and a roadmap for the continuing study of history in the digital era

Democracy Delayed Charles W. Eagles, 2010-06-01 Historians have customarily explained the 1920s in terms of urban rural conflict arguing that cultural ethnic and economic differences between urban and rural Americans erupted to intensify and influence political conflict in the decade In *Democracy Delayed* Charles W. Eagles uses the issue of congressional reapportionment to examine politics in the 1920s in particular to test the urban rural thesis After the 1920 census the United States Congress for the first time failed to reapportion the House of Representatives as required by the Constitution The 1920 enumeration showed that for the first time more people lived in urban areas than in rural areas During a decade long stalemate congressional debates over reapportionment legislation contained repeated examples of violence and hostility as rural representatives resisted acceding to increased urban interests Eagles points out that previous studies employing the urban rural theory use an abstract model borrowed from the social sciences Eagles combines historiography narrative political history and legislative roll call analysis to provide extensive concrete evidence and a more precise

definition of the urban rural interpretation *Dock Workers* Sam Davies, Colin J. Davis, David de Vries, Lex Heerma van Voss, Lidewij Hesselink, Klaus Weinbauer, 2017-09-29 Workers who loaded and unloaded ships have formed a distinctive occupational group over the past two centuries As trade expanded so the numbers of dock labourers increased and became concentrated in the major ports of the world This ambitious two volume project goes beyond existing individual studies of dock workers to develop a genuinely comparative international perspective over a long historical period Volume 1 contains studies of 22 major ports worldwide Built around an agreed framework of issues these port studies examine the type of workers who dominated dock labour their race class and ethnicity the working conditions of dockers and the role of government as employer arbitrator and supporter The studies also detail how dockers organized their labour patterns of strike action and involvement in political organizations The structure of the port city is also outlined and descriptions given of the waterside environment These areas of investigation form the basis for a series of 11 thematic studies which comprise Volume 2 Drawing on the information provided in the port studies these essays identify important aspects and recurring themes and explain how and why particular cases diverge from the rest The final chapter of the book synthesizes the various approaches taken to offer a model which suggests several configurations of dock labour and presents suggestions for future research This major scholarly achievement represents the most sustained attempt to date to provide a comparative international history of dock labour An annotated bibliography completes this essential reference work **Drinking, Homicide, and Rebellion in Colonial Mexican Villages** William B. Taylor, 1979 This study analyzes the impact of Spanish rule on Indian peasant identity in the late colonial period by investigating three areas of social behavior Based on the criminal trial records and related documents from the regions of central Mexico and Oaxaca it attempts to discover how peasants conceived of their role under Spanish rule how they behaved under various kinds of street and how they felt about their Spanish overlords In examining the character of village uprisings typical relationships between killers and the people they killed and the drinking patterns of the late colonial period the author finds no warrant for the familiar picture of sullen depredation and despair Landed peasants of colonial Mexico drank moderately on the whole and mostly on ritual occasions they killed for personal and not political reasons Only when new Spanish encroachments threatened their lands and livelihoods did their grievances flare up in rebellion and these occasions were numerous but brief The author bolsters his conclusions with illuminating comparisons with other peasant societies **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1971 First multi year cumulation covers six years 1965 70 **Shaping the Urban Landscape** Gilbert A. Stelter, Alan F.J. Artibise, 1982-09-15 This is a collection of essays focusing on the process of city building in Canada The authors weigh the relative broad social economic and technological trends as they attempt to explain the shaping of this urban landscape
