Himalayan Ecology And Environment:

Ecology and Environment in the Himalayas Kuldip Singh Gulia, 2007 Today environment and ecology are the buzzwords. The pace of development and modernization has endangered the ecological balance of Himalaya. When the British brought railways in India in the late 18th century, the Himalayan jungles were denuded of the vast forests covers due to the demand for sleepers. When in early 19th century the Britishers attempted to curb wanton tree felling, there arose resentment among the people of Garhwal and Kumaon in Uttarakhand. But in later times those very women folk took to Chipko movement to curb tree felling. The book gives a multitude of ill effects of tree felling ranging from soil erosion to causing floods in the plains and depositing silt. The shrinking of various Himalayan glaciers has also created alarm among the global ecologists and environmentalists. Denudation of forests also has been causing landslides and endangering the wildlife. Now the efforts are being made to avert the man-made disaster. This book comes to grips with the magnitude of the problem in the entire Himalayan region.

Himalayan Ecology and Environment Amal Bhusan Chaudhuri, 1992-01-01 *Ecology and Man in the Himalayas* A. K. Kapoor, Satwanti Kapoor, 1994 The present volume emphasizes the importance of studying the structure and functioning of ecological systems and their mode of reaction on exposure to human intervention in the Himalayas. It stresses the impact of man on his environment and vice versa considered in the areas of biological and adaptive entity as well as a social, cultural and economic being.

Dimri, B. Bookhagen, M. Stoffel, T. Yasunari, 2019-11-08 This book proposes a unique and comprehensive integrated synthesis of the current understanding of the science of Himalayan dynamics and its manifestations on physical systems and ecosystems at different spatial and temporal scales. In particular, this work covers relevant aspects of weather and climate, paleoclimate, snow, glacier and hydrology, ecology, forestry among other topics associated with the Himalayas. It highlights the role of the Himalayas in defining local to regional to global scale impact on weather and climate. It includes Himalayan impact on defining physical basis of changing glacier systems, permafrost melting, thawing, climate variability and hydrological balances. As a result, this volume represents an important synthesized overview both for environmental and earth science researchers and for policy makers and stakeholders interested in the physical and dynamical processes associated with the Himalayan massif. *Life in the Himalaya* Maharaj K. Pandit, 2017-06-19 The collision of the Indian and Eurasian plates 50 million years ago created the Himalaya along with massive glaciers, intensified monsoon, turbulent rivers and an efflorescence of ecosystems. Today the Himalaya is at risk of catastrophic loss of life. Maharaj Pandit outlines the mountain's past in order to map a way toward a sustainable future. *The Routledge International Handbook of Himalayan Environments*,
