directors not only created bold work but also drew on the complex energies of the theatre companies with which they worked to reimagine the shape and scope of theatre directing The Great North American Stage Directors series provides an authoritative account of the art of directing in North America by examining the work of twenty four major practitioners from the late 19th century to the present Each of the eight volumes examines three directors and offers an overview of their practices theoretical ideas and contributions to modern theatre The studies chart the life and work of each major North American theatre director placing his or her achievement in the context of other important theatre practitioners and broader social history Written by a team of leading experts the series presents the genealogy of directing in North America while simultaneously chronicling crucial trends and championing contemporary interpretation *Inherit the Wind* (SparkNotes Literature Guide) SparkNotes,2014-08-12 Inherit the Wind SparkNotes Literature Guide by Jerome Lawrence Making the reading experience fun Created by Harvard students for students everywhere SparkNotes is a new breed of study guide smarter better faster Geared to what today s students need to know SparkNotes provides Chapter by chapter analysis Explanations of key themes motifs and symbols A review quiz and essay topics Lively and accessible these guides are perfect for late night studying and writing papers *Science and Religion: A Very Short Introduction* Thomas Dixon,2008-07-24 The debate between science and religion is never out of the news emotions run high fuelled by polemical bestsellers like The God Delusion and at the other end of the spectrum high profile campaigns to teach Intelligent Design in schools Yet there is much more to the debate than the clash of these extremes As Thomas Dixon shows in this balanced and thought provoking introduction a whole range of views subtle arguments and fascinating perspectives can be found on this complex and centuries old subject He explores the key philosophical questions that underlie the debate but also highlights the social political and ethical contexts that have made the tensions between science and religion such a fraught and interesting topic in the modern world Dixon emphasizes how the modern conflict between evolution and creationism is quintessentially an American phenomenon arising from the culture and history of the United States as exemplified through the ongoing debates about how to interpret the First Amendment s separation of church and state Along the way he examines landmark historical episodes such as the Galileo affair Charles Darwin s own religious and scientific odyssey the Scopes Monkey Trial in Tennessee in 1925 and the Dover Area School Board case of 2005 and includes perspectives from non Christian religions and examples from across the physical biological and social sciences About the Series Combining authority with wit accessibility and style Very Short Introductions offer an introduction to some of life s most interesting topics Written by experts for the newcomer they demonstrate the finest contemporary thinking about the central problems and issues in hundreds of key topics from philosophy to Freud quantum theory to Islam *Evangelicals and the Arts in Fiction* John Weaver,2013-04-06 This book is an exploration of how the relationship of evangelicals to the arts has been portrayed in fiction for the last century The author argues that evangelicals are consistently seen as enemies of the arts by non evangelical writers The artist

typically represented by a literal artist occasionally by a scientist or reluctant messiah typically has to fight for liberation from such clichéd character types as the failed evangelical artist the rube or the hypocritical pastor Rather than resist the cliché of anti art evangelicalism the book contends that evangelicals should embrace it this stereotype is only hurtful so long as one assumes that the arts represent a positive force in human society This work built off the scholarship of John Carey does not make that assumption Surveying the current pro artistic views of most evangelicals the author advances the argument that evangelicals need to return to their anti art roots By doing so they would align themselves with the most radical artistic elements of modernism rather than with the classicists that the movement currently seems to prefer and provide space for themselves to critique how secular artistic stereotypes of evangelicals have economically and artistically marginalized the evangelicals community

Evolution on British Television and Radio Alexander Hall, 2021-09-30 This book charts the history of how biological evolution has been depicted on British television and radio from the first radio broadcast on evolution in 1925 through to the 150th anniversary of Charles Darwin's *Origin of the Species* in 2009 Going beyond science documentaries the chapters deal with a broad range of broadcasting content to explore evolutionary themes in radio dramas educational content and science fiction shows like *Doctor Who* The book makes the case that the dominant use in science broadcasting of the evolutionary epic a narrative based on a progressive vision of scientific endeavour is part of the wider development of a standardised way of speaking about science in society during the 20th century In covering the diverse range of approaches to depicting evolution used in British productions the book demonstrates how their success had a global influence on the genres and formats of science broadcasting used today
