Paris and the Parasite Macs Smith, 2021-06-08 The social consequences of anti parasitic urbanism as efforts to expunge supposedly biological parasites penalize those viewed as social parasites According to French philosopher Michel Serres ordered systems are founded on the pathologization of parasites which can never be fully expelled In Paris and the Parasite Macs Smith extends Serres s approach to Paris as a mediatic city asking what organisms people and forms of interference constitute its parasites Drawing on French poststructuralist theory and philosophy media theory the philosophy of science and an array of literary and cultural sources he examines Paris and its parasites from the early nineteenth century to today focusing on the contemporary city In so doing he reveals the social consequences of anti parasitic urbanism

Le Corbusier in the Antipodes Antony Moulis, 2020-12-30 This book considers the architect Le Corbusier s encounters with Australia and New Zealand as a two way exchange showing the impact of his ideas and projects on architects of the region whilst also revealing counterinfluences on Le Corbusier in his post war career that were activated by his contacts Compiled from detailed archival research undertaken at the Fondation Le Corbusier Paris and nationally based archives Le Corbusier in the Antipodes brings together a set of episodes placing them in context with the history of modern art architecture and urbanism in 20th century Australia and New Zealand Key exchanges between Le Corbusier and others never before described are presented and analyzed including Le Corbusier s contact with Australian architect Harry Seidler at Chandigarh Le Corbusier s drawing of the plan of Adelaide in 1950 and his creative collaboration with Jorn Utzon on art for the Sydney Opera House This book also includes analysis of previously unseen Le Corbusier artworks which formed part of the Utzon family collection In reading these personal and contingent moments of encounter the book puts forward new ways of understanding the dissemination and mediation of Le Corbusier s ideas and their effects in post war Australia and New Zealand These antipodean contacts are set against the broader story of Le Corbusier s career questioning received interpretations of his design methods and current assumptions about the influence of his work in national contexts beyond Europe

Philosophy and the City Keith Jacobs, Jeff Malpas, 2019-03-15 Philosophy has its origins in the city and in the context of our own highly urbanised modes of living the relationship between philosophy and the city is more important than ever The city is the place in which most humans now play out their lives and the place that determines much of the cultural social economic and political life of the contemporary world Towards a Philosophy of the City explores a wide range of approaches and perspectives in a way that is true to the city s complex and dynamic character The volume begins with a comprehensive introduction that identifies the key themes and then moves through four parts examining the

concept of the city itself its varying histories and experiences the character of the landscapes that belong to the city and finally the impact of new technologies for the future of city spaces Each section takes up aspects of the thinking of the city as it develops in relation to particular problems contexts and sometimes as exemplified in particular cities This volume provides an invaluable resource for students and scholars in Philosophy Geography Sociology and Urban Studies **The extended self** Chris Abel, 2016-10-28 In this wide ranging study of architecture and cultural evolution the author argues that underlying the global environmental crisis is a general resistance to changing personal and social identities shaped by a technology based culture and its energy hungry products The book traces the roots of that culture to the coevolution of Homo sapiens and technology from the first use of tools as artificial extensions of the human body to the motorised cities spreading around the world whose uncontrolled effects are changing the planet itself Advancing a new concept of the meme called the technical meme as the primary agent of cognitive extension and technical embodiment the author proposes a theory of the extended self encompassing material and spatial as well as psychological and social elements Drawing upon research from philosophy psychology and the neurosciences the book presents a new approach to environmental and cultural studies that will appeal to a broad readership searching for insights into the crisis **Hotel Lobbies and Lounges** Tom

Avermaete, Anne Massey, 2013 This volume in the Interior Architecture series explores the architectural significance of hotels throughout history and how their material construction has reflected and facilitated the social and cultural practices for which they are renowned Including case studies addressing contemporary developments in hotel planning and design and illustrated throughout this volume is an innovative and insightful contribution to architectural and interior design literature

Self-understanding in the Tractatus and Wittgenstein's Architecture Raimundo Henriques, 2024-07-16 Between 1926 and 1928 the philosopher Ludwig Wittgenstein designed a house for his sister in Vienna the Kundmannngasse This book aims to clarify the relation between that house and Wittgenstein's early philosophy The starting point of its main argument is a remark from Diktat f r Schlick c 1932-33 in which Wittgenstein proposes an analogy between ornaments and nonsensical sentences The attempt to extract from it an account of the relation between the Kundmannngasse and the Tractatus Logico Philosophicus 1921 leads to the writings of Adolf Loos whose influence Wittgenstein recognized The discussion of Loos's writings suggests that the analogy should be understood not as one between actual ornaments and nonsensical sentences but as one between Loos's and Wittgenstein's uses of these notions So understood it favors the so called resolute reading of the Tractatus and reveals that both Wittgenstein's use of nonsense and Loos's use of ornaments are means to the end of promoting self understanding The book concludes that both the Kundmannngasse and the Tractatus are results of Wittgenstein's efforts at this kind of self understanding These can be construed as ways of acknowledging our humanity which in turn can be seen as a unifying element of Wittgenstein's philosophy **Book Review Digest**, 1928 **The Architects' Journal**, 2004 *Tape Delay* Charles Neal, 2001 Bestselling collection of interviews with the Eighties
