Fishers Face:

Crisis in the World's Fisheries James R. McGoodwin, 1995-02-01 For over twenty years an alarming trend has emerged in the world's fisheries: there are too many fishers chasing too few fish. This book provides a broad overview and fundamental reassessment of fisheries management policies around the world.

Sustainable Fishery Systems Anthony Charles, 2023-06-14 SUSTAINABLE FISHERY SYSTEMS An up to date and interdisciplinary guide to sustainable fisheries. Fisheries, whether small scale or large scale, are filled with complexity and uncertainty. Making the right decisions to successfully manage fisheries for sustainability and resilience requires a systems approach including both natural and human elements and their many interactions. To understand fisheries and how they change over time, a diverse range of fishery knowledge must be brought together. Sustainable Fishery Systems 2nd edition meets these needs. The new edition provides essential information that can be readily applied within government, community, industrial, academic, and research settings. Sustainable Fishery Systems 2nd edition retains the first edition's emphasis on themes such as sustainability, resilience, uncertainty, complexity, and conflict, and expands its treatment of topics that have since the first edition's publication become crucial to consider in the field of fisheries. As a result, readers will find updated and expanded coverage of topics including coastal conservation, ecosystem-based management, co-management, community-based management, and more. New chapters covering connections between fisheries and marine protected areas, biodiversity conservation, climate and fisheries, and multi-sectoral management. A more detailed introduction to the systems perspective of fisheries reflecting the substantial growth in that subject's importance, and covering in detail the natural, human, and governance aspects of fisheries. Sustainable Fishery Systems 2nd edition is an indispensable interdisciplinary resource for educators, researchers, government agencies, and fisheries managers.

Proceedings of the International Symposium on Fisheries Sustainability: strengthening the science-policy nexus Food and Agriculture Organization of the United Nations, 2020-05-01 The International Symposium on Fisheries Sustainability: strengthening the science-policy nexus was held to support the development of a new vision for more sustainable and socially just fisheries and more resilient to the challenges of the twenty-first century. The event managed to gather an incredibly diverse group of participants from different sectors and regions around the world. Moreover, a set of recommendations emerged from the sessions' discussions that will help improve the sustainability of capture fisheries and progress towards the different targets and objectives of the Sustainable Development Goals.

World Small-scale Fisheries Ratana Chuenpagdee, 2011 The importance of fisheries is not lost in the global policy arena. What is often overlooked in the general discourse, however, is the significant difference between small and large scale fisheries. Major rethinking about all aspects of small scale fisheries is required, including their contribution to catches, employment, livelihood, food security, and conservation. This book is a collection of essays about the diverse, complex, and dynamic contexts that

characterize small scale fisheries around the world The essays highlight the strengths capacity motivation and contributions associated with this fishing sector They remind us that solutions and opportunities for the viability and sustainability of small scale fisheries can be found once the issues are understood from a holistic perspective and possible options including inventive governance arrangements are fully explored The authors are scientists and practitioners who work in small scale fisheries in various parts of the world many of whom participated at the first World Small Scale Fisheries Congress WSFC held in Bangkok in October 2010 and are members of the global research network for the future of small scale fisheries Too Big To Ignore The editor Ratana Chuenpagdee the initiator of the WSFC is Canada Research Chair in Natural Resource Sustainability and Community Development at Memorial University of Newfoundland Canada Book jacket **Community Management and Common Property of Coastal Fisheries in Asia and the Pacific** Robert S. Country gender assessment of agriculture and the rural sector Food and Agriculture Organization of the United Nations, 2023-04-24 This abstract outlines the objectives of an assessment conducted by the Food and Agriculture Organization FAO of the United Nation in Palau The assessment identified three main challenges firstly the need to acknowledge and reflect the contributions of women to household and rural economies in policies strategies plans and programs Secondly gender inequalities limit the capacity of women in Palau to develop their potential Finally the recognition of gender equality as a driver to sustainable development is beginning to be incorporated into public policies strategies plans and programs These findings highlight the importance of addressing these challenges in order to achieve greater gender equality and empowerment for rural women in Palau *Poverty Mosaics: Realities and Prospects in Small-Scale Fisheries* Svein Jentoft, Arne Eide, 2011-07-15 Small scale fisheries are a major source of food and employment around the world Yet many small scale fishers work in conditions that are neither safe nor secure Millions of them are poor and often they are socially and politically marginalized Macro economic and institutional mechanisms are essential to address these poverty and vulnerability problems however interventions at the local community level are also necessary This requires deep understanding of what poverty means to the fishers their families and communities how they cope with it and the challenges they face to increase resiliency and improve their lives for the better This book provides a global perspective situating small scale fisheries within the broad academic discourse on poverty fisheries management and development In depth case studies from fifteen countries in Latin America Europe South and Southeast Asia and sub Saharan Africa demonstrate the enormously complex ecological economic social cultural and political contexts of this sector Conclusions for policy making formulated as a joint statement by the authors argue that fisheries development poverty alleviation and resource management must be integrated within a comprehensive governance approach that also looks beyond fisheries The scientific editors Svein Jentoft and Arne Eide are both with the Norwegian College of Fishery Science Faculty of Biosciences Fisheries and Economics University of Troms Norway Global Symposium on Women in Fisheries , 2002 **Resilience in the**

English Small-Scale Fishery Rebecca Korda, Tim Gray, Selina M. Stead, 2020-09-21 This book is a contribution to our understanding of the worrying situation of small scale fisheries SSF which face marginalisation in most coastal countries The authors explain why SSF are so pressured how there has been a powerful backlash against this marginalisation during the last 30 years what are the main ideational currents supporting this backlash and what is the enduring value of SSF that justifies that support The authors discuss the major contemporary interpretations of SSF the challenges facing SSF globally and in England and SSF s coping strategies in response to those challenges through the framework of resilience theory In an innovative analysis the authors show how there are three kinds of resilience passive resilience where fishers are resigned to their adverse fate adaptive resilience where fishers make the best use of the opportunities that are available to them and transformative resilience where fishers attempt to change the system that faces them The authors draw on an extensive range of interview data to provide rich insights into the world of SSF and they discuss a variety of proposals for improving their conditions The book will appeal to the growing academic and public community that is following with increasing concern the debate about the future of SFF and to the environmental movement which has committed itself to support SSF as a greener form of fishing than the large scale industrial sector Assessment of fisheries innovations for investment and financing in Kenya van Anrooy, R., Gietzen, T., Yang, L., Ngugi, C., Otieno, S., Essel, T., 2022-10-01 To make small scale fisheries in Kenya more sustainable fishers need to invest in responsible fishing operations and technologies reduce overfishing contribute to fisheries management and implement climate change adaptation measures Small scale fishers often do not have access to financial services to innovate and to make the necessary transition to sustainable fishing operations Access to financial services will help them to innovate and adopt measures that will provide social economic and environmental returns the desired triple bottom line The African Rural and Agricultural Credit Association AFRACA and FAO in collaboration with the State Department for Fisheries Aquaculture and the Blue Economy in Kenya implemented a project to analyse and improve the access of small scale fishers to financial services in Kenya The project identified the key finance and fisheries sector stakeholders carried out surveys and interviews and conducted a techno economic performance analysis of some small scale fishing fleets to investigate the potential innovations for investment A two day stakeholder workshop was held in 2021 in which the participants agreed to constitute a CAFI SSF Network Kenyan Chapter AFRACA developed and tested training materials on lending to the fisheries sector for financial service providers This circular provides a summary of the project achievements The Small-Scale Fisheries Guidelines Svein Jentoft, Ratana Chuenpagdee, María José Barragán-Paladines, Nicole Franz, 2017-06-10 In June 2014 FAO member states endorsed the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries SSF Guidelines These Guidelines are one of the most significant landmarks for small scale fisheries around the world They are comprehensive in terms of topics covered and progressive with their foundations based on human rights and other key principles It can be anticipated that implementing the SSF Guidelines

whether at local national or regional levels will be challenging This book contains in depth case studies where authors discuss the extent to which the Guidelines can help improve the realities of small scale fishing men and women globally and make their livelihoods and communities more secure This will require policy intervention and innovation along with contributions of civil society organizations and academia However most of all it will necessitate the empowerment of fishing people so that they can become active participants in decision making on matters where their well being and human rights are at stake By endorsing the SSF Guidelines states have committed themselves to support and facilitate this development This book asks whether states can successfully walk the talk and provides advice as to how they can do so The collection of case studies sets the platform for an interactive dialogue space for researchers policy makers civil society and small scale fishing communities to start the conversation about the monitoring and evaluation of the implementation of the SSF Guidelines at local national regional and global levels An added value is that it helps add focus to our work as civil society activists involved in ensuring the application of the SSF Guidelines Naseegh Jaffer General Secretary World Forum of Fisher People WFFP This collection offers many ways in which institutions enabling small scale fisheries can protect and promote sustainability food security customary tenure self management and market access while fostering such benefits as ecosystem based management protected areas incorporation of local knowledge and poverty alleviation You will want to put this book in the hands of policy makers and practitioners immediately and for years to come Evelyn Pinkerton Professor Simon Fraser University Canada

Building Sustainable Agrifood Systems and Resilient Rural Communities in Japan Keiko Tanaka,Kiyohiko Sakamoto,Raymond Jussaume,2024-12-15 Building Sustainable Agrifood Systems and Resilient Rural Communities in Japan explores the challenges Japan has been facing as a post industrialized society Through case studies across rural Japan this book shows how these challenges are being addressed in terms of reorganizing agriculture food systems and rural livelihoods Although the contexts surrounding rural areas in Japan are different from elsewhere in the world this volume provides possible lessons on sustainability and adaptation

Blue Justice Svein Jentoft,Ratana Chuenpagdee,Alicia Bugeja Said,Moenieba Isaacs,2022-03-07 For small scale fisheries around the world the Blue Growth and Blue Economy initiatives may provide sustainable development but only insofar as they align with the global consensus enshrined in the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries in the context of Food Security and Poverty Eradication If states do nothing to fulfill the promises they made when they endorsed these guidelines in 2014 the Blue Economy will come at a loss for small scale fisheries and further their marginalization in the ocean economy Under the umbrella of Blue Justice this book demonstrates that these risks are real and must be considered as states implement their sustainable ocean development plans These are human rights issues which are embedded into governance principles and institutions and which make a difference for small scale fisheries people in their daily lives In stressing the importance of policies and institutions that build on the experiences of small scale fisheries people in the contexts in which they operate

this book draws on case studies of small scale fisheries from countries on all continents to clarify what Blue Justice entails for small scale fisheries and make suggestions for real change Through the Blue Justice paradigm this book flags the relevance of recognizing the potential impact that different factors including the Blue Economy approach could bring to fishing communities their livelihoods cultural traditions and other potential multidimensional conflicts Vulnerability in fishing communities can increase and inequalities can be reinforced at different levels if individuals and community capabilities are not strengthened A first of its kind not to be missed this book is informative purposeful and pertinent in an era of change Silvia Salas CINEVESTAV Marine Resources Department Merida Mexico The studies reveal that Blue Justice is a governability issue which requires establishing right institutions that are transdisciplinary integrated participatory and holistic It is implicit from these writings that the SSF Guidelines and Blue Growth initiatives do not form two different discourses and that the implementation of the former would resolve many of the justice issues caused by the latter in favor of small scale fisheries and their communities Oscar Amarasinghe Professor Chancellor Ocean University of Sri Lanka and President Sri Lanka Forum for Small Scale Fisheries SLFSSF

Small-Scale and Artisanal Fisheries: Insights and Approaches for Improved Governance and Management in a Globalized Context Steven W. Purcell, Beatrice Irene Crona, Robert

Pomeroy, 2020-08-21 Small-Scale Fisheries in Europe: Status, Resilience and Governance José J.

Pascual-Fernández, Cristina Pita, Maarten Bavinck, 2020-04-28 This book offers a comprehensive account of the status and dynamics of people participating in the small scale fisheries SSF of Europe It covers the situation of SSF in 25 coastal countries thereby providing a portrait of almost every coastal country on the continent and analyzing the recent evolution of the sector Small scale fisheries are argued to be extremely important in Europe as they provide employment and welfare while increasing food sovereignty and maintaining communities in coastal areas The recent worldwide focus on SSF derives from their environmental sustainability which distinguishes many of their activities from those of large scale fisheries This book analyses the diversity of SSF and shows how fishing communities have sometimes developed successful governing models demonstrating social and economic resilience While the book emphasizes the strengths of SSF and the synergies that occur with other marine sectors it also presents cases of failure in which collective action and policy have actually contributed to a weakening of the sector In this context the book shows how governmental policies toward SSF vary considerably from country to country in a way that is not entirely consistent with European policies

Managing Fishing Capacity Stephen Cunningham, Steve Cunningham, D. F. Gréboval, Food and Agriculture Organization of the United

Nations, 2001-01-01 The document provides a background to the need for managing fishing capacity and a review of technical and policy issues that arise in doing so A summary of recommendations is included **Fishing Europe's Troubled Waters**

David Symes, 2023-03-31 Spanning the last 50 years of fisheries policy in Europe this book is the parting contribution and career spanning reflection from one of Europe's most renowned social scientists working in the field of fisheries management

and policy The last 50 years have without doubt been the most turbulent years in the history of North Atlantic fisheries a turbulence brought about by the actions of fishers scientists and above all politicians It is a period of change that sees a radical redrawing of the political geography of fisheries globalisation of trade the development of fisheries management towards increasingly restrictive regulation and declining fish stocks The book explains why the bold but deeply flawed Common Fisheries Policy persistently failed to deliver its basic goal of sustainable fisheries The spotlight falls on the monolithic highly centralised command and control nature of the Policy that strives to apply a universal one size fits all approach thus creating a governing system wholly unsuited to the system to be governed out of kilter with preferred models of governance and disconnected from the practical realities of fishing as a livelihood in a challenging environment A final section on Brexit focuses on its halting progress from concept to reality the implications for the fisheries sector and the fateful final negotiations with the EU over the fisheries question Seeking to explain why the anticipated benefits for the UK industry failed to materialise attention is drawn to the misplaced political hubris over regaining sovereignty in areas like the North Sea This book will be essential reading for students scholars professionals and policymakers working on fisheries marine governance natural resource management environmental policy and the European Project

Nordic fisheries at a crossroad Jeppe Høst, Johan Hultman, Filippa Säwe, Pekka Salmi, Jesper Manniche, Emil Bæk Holland, 2018-10-04 Nordic fisheries at a crossroad explores how Nordic small scale fisheries can develop to promote high value creation and product specialization By looking at recent developments among small scale but land based food producers we suggest specialization and dedication as the main development strategies The central notion is to break away from the price competitive globalised fish markets and develop new products or distribution models To succeed in this there is a need for substantive and coordinated efforts to bridge the gap between conventional logics and the new development logics between supply and demand The vision should be to develop viable and composite markets for high quality and specialty fish products through dedication and specialization Markets that go beyond the local and reach supermarkets and consumers on a national and international scale

Fisheries Bioeconomics J. C. Seijo, O. Defeo, S. Salas, Food and Agriculture Organization of the United Nations, 1998-01-01 This book is presented in seven Chapters Chapter 1 describes the basic assumptions underlying the optimal allocation of natural resources and the inherent characteristics of fisheries that determine under unrestricted access the failure to allocate resources economic inefficiency and overfishing To mitigate these undesired effects the bioeconomic literature invokes the allocation of property rights which in turn must be implemented within a management context Thus in this Chapter we suggest some guidelines to conduct management plans Static and dynamic bioeconomic models are presented in Chapter 2 as a theoretical framework for the design of intelligent management schemes aiming at sustainable use of fish stocks Classic models are shown such as the Gordon Schaefer based on the logistic We also develop new bioeconomic approaches such as a distributed delay model to add realism to Smith's fleet dynamics approach Chapter 2

also includes an introductory version of a bioeconomic yield mortality model and dynamic age structured models A comparison of the dynamic and static trajectories is stressed The price of time and its implications for optimal resource allocation over time is also discussed For the sake of adding realism to the above models the systems approach is used in Chapter 3 to model different technological and ecological complexities that occur in marine fisheries Ecological interdependencies competition predation as well as technological interdependencies resulting from fleets with different fishing power and or gear types operating on components of a stock or on different target species of a mixed stock are specified and modelled
