Architecture Hans Kollhoff, Helga Timmermann, Fritz Neumeyer, 2002 Hans Kollhoff is one of Germany's most widely discussed and prominent architects his works ranging from the high rise at Potsdamer Platz in Berlin and the conversion of the former Berliner Reichsbank to the Foreign Office of the new Berlin Republic Kollhoff continues to define the essence of contemporary architecture while maintaining the standard of excellence and attention to detail that recall the world's classic structures This volume offers a close examination of twelve buildings designed by Kollhoff between 1996 and 2001 Each building is depicted in five full page duotone photographs dramatically illustrating their facades tectonic structure and highlighting Kollhoff's characteristic use of light and shadow An in depth essay by architectural theorist Fritz Neumeyer analyzes Kollhoff's many important contributions to the urban landscape **Oswald Mathias Ungers and Rem Koolhaas**

Lara Schrijver, 2021-10-07 Lara Schrijver examines the work of Oswald Mathias Ungers and Rem Koolhaas as intellectual legacy of the 1970s for architecture today Particularly in the United States this period focused on the autonomy of architecture as a correction to the social orientation of the 1960s Yet these two architects pioneered a more situated autonomy initiating an intellectual discourse on architecture that was inherently design based Their work provides room for interpreting social conditions and disciplinary formal developments thus constructing a plausible relationship between the two that allows the life within to flourish and adapt In doing so they provide a foundation for recalibrating architecture today

Berlin David Clay Large,2007-10-15 In the political history of the past century no city has played a more prominent though often disastrous role than Berlin At the same time Berlin has also been a dynamic center of artistic and intellectual innovation If Paris was the Capital of the Nineteenth Century Berlin was to become the signature city for the next hundred years Once a symbol of modernity in the Thirties it became associated with injustice and the abuse of power After 1945 it became the iconic City of the Cold War Since the fall of the Wall Berlin has again come to represent humanity s aspirations for a new beginning tempered by caution deriving from the traumas of the recent past David Clay Large s definitive history of Berlin is framed by the two German unifications of 1871 and 1990 Between these two events several themes run like a thread through the city s history a persistent inferiority complex a distrust among many ordinary Germans and the national leadership of the unloved city s electric atmosphere fast tempo and tradition of unruliness its status as a magnet for immigrants artists intellectuals and the young the opening up of social economic and ethnic divisions as sharp as the one created by the Wall
