

CAN YOU SOLVE THIS MATH PUZZLE?

Hard To Solve Math Puzzles

Gianni A. Sarcone, Marie-Jo Waeber

Hard To Solve Math Puzzles:

Hard-to-Solve Math Puzzles Derrick Niederman, 2001 Put your mathematical thinking cap on because even though these puzzles are toughies they take insight and brainwork to solve not a knowledge of calculus or linear algebra or any other kind of advanced math Consider for a moment How can you divide a regular pentagon into five identical pentagonal shapes What is the only decade in American history to contain four prime numbered years What three right triangles with integer sides have areas numerically equal to twice their perimeters Don't worry if the answers don't spring to mind immediately you'll have plenty of company Compute without calculators study the survival of the fittest by arithmetically analyzing a little amoeba reproduction and investigate whether or not a rich man's children are getting a square deal with their inheritance Just don't give up because you'll have a lot of satisfaction when you figure them out

Algorithmic Puzzles Anany Levitin, Maria Levitin, 2011-10-14 Algorithmic puzzles are puzzles involving well defined procedures for solving problems This book will provide an enjoyable and accessible introduction to algorithmic puzzles that will develop the reader's algorithmic thinking The first part of this book is a tutorial on algorithm design strategies and analysis techniques Algorithm design strategies exhaustive search backtracking divide and conquer and a few others are general approaches to designing step by step instructions for solving problems Analysis techniques are methods for investigating such procedures to answer questions about the ultimate result of the procedure or how many steps are executed before the procedure stops The discussion is an elementary level with puzzle examples and requires neither programming nor mathematics beyond a secondary school level Thus the tutorial provides a gentle and entertaining introduction to main ideas in high level algorithmic problem solving The second and main part of the book contains 150 puzzles from centuries old classics to newcomers often asked during job interviews at computing engineering and financial companies The puzzles are divided into three groups by their difficulty levels The first fifty puzzles in the Easier Puzzles section require only middle school mathematics The sixty puzzle of average difficulty and forty harder puzzles require just high school mathematics plus a few topics such as binary numbers and simple recurrences which are reviewed in the tutorial All the puzzles are provided with hints detailed solutions and brief comments The comments deal with the puzzle origins and design or analysis techniques used in the solution The book should be of interest to puzzle lovers students and teachers of algorithm courses and persons expecting to be given puzzles during job interviews
