Valerie A. Braithwaite, 2004 *The Business of Hope* Mary-Beth Raddon, 2023-04-24 This open access book contributes to research on the ascendance of neoliberalism in Canada through the vantage point of professional fundraising in the 1990s and 2000s Fifty high ranking fundraisers from across Canada were interviewed through 2008 and 2009 about changes they had witnessed since starting their careers Fundraising as an occupation was burgeoning in this period in response to the devolution of state responsibility across the major domains of nonprofit activity education health care social services the arts recreation overseas humanitarian activities and environmental protection Welfare state retrenchment left the nonprofit and voluntary sector competing for private sources of funding with the help of these newly hired expert staff As fundraisers worked to instill a culture of philanthropy while targeting the ultra rich and advocating for tax favourable treatment of major gifts they became both products and promoters of the neoliberal political and cultural reconstruction of Canadian society

movement as well as a necessary read for every citizen under capitalism *Governance of Nuclear Power* , 1981 *Making Space for Justice* Michele Moody-Adams, 2022-07-05 Longlist 2023 Edwards Book Award Rodel Institute From nineteenth century abolitionism to Black Lives Matter today progressive social movements have been at the forefront of social change Yet it is seldom recognized that such movements have not only engaged in political action but also posed crucial philosophical questions about the meaning of justice and about how the demands of justice can be met Michele Moody Adams argues that anyone who is concerned with the theory or the practice of justice or both must ask what can be learned from social movements Drawing on a range of compelling examples she explores what they have shown about the nature of justice as well as what it takes to create space for justice in the world Moody Adams considers progressive social movements as

wellsprings of moral inquiry and as agents of social change drawing out key philosophical and practical principles Social justice demands humane regard for others combining compassionate concern and robust respect Successful movements have drawn on the transformative power of imagination strengthening the motivation to pursue justice and to create the political institutions and social policies that can sustain it by inspiring political hope Making Space for Justice contends that the insights arising from social movements are critical to bridging the gap between discerning theory and effective practice and should be transformative for political thought as well as for political activism

The Power of Hope Carol Graham, 2023-04-25 Why hope matters as a metric of economic and social well being In a society marked by extreme inequality of income and opportunity why should economists care about how people feel The truth is that feelings of well being are critical metrics that predict future life outcomes In this timely and innovative account economist Carol Graham argues for the importance of hope little studied in economics at present as an independent dimension of well being Given America's current mental health crisis thrown into stark relief by COVID hope may be the most important measure of well being and researchers are tracking trends in hope as a key factor in understanding the rising numbers of deaths of despair and premature mortality Graham an authority on the study of well being points to empirical evidence demonstrating that hope can improve people's life outcomes and that despair can destroy them These findings she argues merit deeper exploration Graham discusses the potential of novel well being metrics as tracking indicators of despair reports on new surveys of hope among low income adolescents and

considers the implications of the results for the futures of these young adults Graham asks how and why the wealthiest country in the world has such despair What are we missing She argues that public policy problems from joblessness and labor force dropout to the lack of affordable health care and inadequate public education can't be solved without hope Drawing on research in well being and other disciplines Graham describes strategies for restoring hope in populations where it has been lost The need to address despair and to restore hope is critical to America's future

The Generative Power of Hope Frederick Bird, 2022-04-26 This book analyses how and why we are living at a critical moment in the history of human life on earth and explores how we find grounds for the hopes that will enable us to address the challenges and crises of our time The author analyses hope both practically and philosophically as a generative virtue to realistically discern the situations in which we find ourselves and imaginatively to anticipate possibilities when the future is unknown and uncertain The author argues that hope is a mean between anomy disillusionment and despair on the one hand and wishful thinking

dreaming and fanaticizing on the other hand The book not only examines and analyzes from a historical perspective the contemporary crises such as climate change environmental degradation and its effects such as the social costs of these developments but also further analyzes the character and micro dynamics of hope and how it makes a difference in how we manage the crises which inevitably emerge Though contemporary crises are those we tend to focus on the author also engages with what is involved in a due regard for history and the relevance of a sense of history for addressing the crises of our time He shows us what we can learn from revisiting some thoughtful reflections by thinkers like Niebuhr Jaspers Camus and Arendt Finally the author shows us what is involved practically in anticipating possibilities by looking at hope as a social practice and noting how hopeful people make a difference

From Bloodshed to Hope in Burundi Ambassador Robert Krueger, Kathleen Tobin Krueger, 2009-03-06 In 1994 while nations everywhere stood idly by 800 000 people were slaughtered in eight weeks in Rwanda Arriving as U S Ambassador to neighboring Burundi a few weeks later Bob Krueger began drawing international attention to the genocide also proceeding in Burundi where he sought to minimize the killing and to preserve its fledgling democratic government from destruction by its own army From Bloodshed to Hope in Burundi is a compelling eyewitness account of both a horrific and persistent genocide and of the ongoing efforts of many courageous individuals to build a more just society Krueger and his wife Kathleen graphically document the slaughter occurring all around them as well as their repeated efforts to get the U S government and the international community to take notice and take action Bob Krueger reconstructs the events of the military coup that precipitated the Burundi genocide and describes his efforts to uncover the truth by digging up graves and interviewing survivors In straightforward and powerful language Kathleen Krueger recounts her family s experience living amid civil war including when she faced down a dozen AK 47 wielding African soldiers to save the life of a household worker From Bloodshed to Hope in Burundi shines a piercing light on a genocide that has gone largely unreported and identifies those responsible for it It also offers hope that as the truth emerges and the perpetrators are brought to account the people of Burundi will at last achieve peace and reconciliation

Prospects for Codifying the Relationship Between Central and Local Government Great Britain: Parliament: House of Commons: Political and Constitutional Reform Committee, 2013-01-29 The Committee has produced its own code included in this report for relations between central and local government The code is intended to replace the estimated 1 293 duties imposed on local government today The Committee concludes that the balance of power between central and local government is skewed in favour of the centre and needs to be addressed The devolution of power to Scotland Wales and Northern Ireland has been successful and is an evolving process there is no apparent reason why local government in England is not capable of using similar powers Power and finance must go together if local government is to become an equal partner it should have own source of revenue Local authorities in England could

also have a share of the existing income tax take and local councils freed to raise additional revenue with the consent of their electorates English local government lacks some of the most basic constitutional protections that are available to some of its counterparts in a number of other mature European democracies The Government should examine the possibilities of a stronger constitutional status for local government through an entrenched statutory code or a similar proposal A code for relations between central and local government enforced by statute could be beneficial to both tiers of government for several reasons First it could help set out exactly where powers do and should lie thereby increasing transparency for the electors Secondly it could help redress the overcentralisation of England Thirdly it could provide an economic boost that the country sorely needs
