Shocks and Rivalries in the Middle East and North Africa Imad Mansour, William R. Thompson, 2020-06-01 Shocks and Rivalries in the Middle East and North Africa is the first book to examine issue driven antagonisms within groups of Middle East and North Africa MENA states and their impact on relations within the region The volume also considers how shock events such as internal revolts and regional wars can alter interstate tensions and the trajectory of conflict MENA has experienced more internal rivalries than any other region making a detailed analysis vital to understanding the region s complex political cultural and economic history The state groupings studied in this volume include Israel and Iran Iran and Saudi Arabia Iran and Turkey Iran Iraq and Syria Egypt and Saudi Arabia and Algeria and Morocco Essays are theoretically driven breaking the MENA region down into a collection of systems that exemplify how

state and nonstate actors interact around certain issues Through this approach contributors shed rare light on the origins persistence escalation and resolution of MENA rivalries and trace significant patterns of regional change Shocks and Rivalries in the Middle East and North Africa makes a major contribution to scholarship on MENA antagonisms It not only addresses an understudied phenomenon in the international relations of the MENA region it also expands our knowledge of rivalry dynamics in global politics Rivalry and Alliance Politics in Cold War Latin America Christopher

Darnton,2014-06-30 The success or failure of foreign policy initiatives in Latin America is heavily influenced by bureaucratic and military background players Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton s comparative study of the nature of conflict between Latin American states during the Cold War provides a counterintuitive and shrewd explanation of why diplomacy does or doesn t work Specifically he develops a theory that shows how the parochial interests of state bureaucracies can overwhelm national leaders foreign policy initiatives and complicate regional alliances His thorough evaluation of several twentieth century Latin American conflicts covers the gamut of diplomatic disputes from border clashes to economic provocations to regional power struggles Darnton examines the domestic political and economic conditions that contribute either to rivalry continued conflict or rapprochement diplomatic reconciliation while assessing the impact of U S foreign policy Detailed case studies provide not only a robust test of the theory but also a fascinating tour of Latin American history and Cold War politics including a multilayered examination of Argentine Brazilian strategic competition and presidential summits over four decades three rivalries in Central America following Cuba s 1959 revolution and how the 1980s debt crisis entangled the diplomatic affairs of several Andean countries These questions about international rivalry and rapprochement are of particular interest to security studies and international relations scholars as they seek to understand what defuses regional conflicts creates stronger incentives for improving diplomatic ties between states and builds effective alliances The analysis also bears fruit for contemporary studies of counterterrorism in its critique of parallels between the Cold War and the Global War on Terror its examination of failed rapprochement efforts between Algeria and Morocco and its assessment of obstacles to U S coalition building efforts **1995: A New Beginning for the**

Ariel Gonzalez Levaggi, 2019-07-23 This book explains cooperative and confrontational regional orders in the post Cold War era. Applying a push and pull framework to the evolution of regional orders, the book's theoretical section compares regional dynamics and studies the transformation and authority of governing arrangements among key regional actors who manage security and institutional cooperation. This presents a novel approach to comparing non-Western regional orders and helps forge a better integration between International Relations disciplinary approaches and area studies. The empirical section analyzes Central Eurasia and South America within the period 1989-2017 using case studies and interviews with decision makers, practitioners and experts. The volume demonstrates that soft engagement strategies from extra-regional great powers and internationalist domestic coalitions framed in a stable democratic polity are forces for peaceful interaction, while hard engagement strategies from great external powers plus nationalist coalitions within democratic backsliding in key regional powers present negative outlooks for regional cooperation. This book will be of much interest to students of regional security, comparative politics, area studies and International Relations. *Competitive International Strategy* Anders

The Rhetoric of the Right David L. George,2013 This study seeks to demonstrate the subtle ways in which changes in the language associated with economic issues are reflective of a gradual but quantifiable conservative ideological shift In this rigorous analysis David George uses as his data a century of word usage within The New York Times starting in 1900 It is not always obvious how the changes identified necessarily reflect a stronger prejudice toward laissez faire free market capitalism and so much of the book seeks to demonstrate the subtle ways in which the changing language indeed carries with it a political message This analysis is made through exploration of five major areas of focus economics rhetoric scholarship and the growing behavioral economics school of thought the discourse of government and taxation the changing meaning of competition and competitive changing attitudes toward labor and the celebration of growth relative to the decline in attention to economic justice and social equality *Theorizing Indian Foreign Policy* Mischa Hansel,Raphaëlle Khan,Mélissa Levallant,2017-04-21 Examined from a non Western lens the standard International Relations IR and Foreign Policy Analysis FPA approaches are ill adapted because of some Eurocentric and conceptual biases These biases partly stem from first the dearth of analyses focusing on non Western cases second the primacy of Western born concepts and method in the two disciplines That is what this book seeks to redress *Theorizing Indian Foreign Policy* draws together the study of

contemporary Indian foreign policy and the methods and theories used by FPA and IR while simultaneously contributing to a growing reflection on how to theorise a non Western case Its chapters offer a refreshing perspective by combining different sets of theories empirical analyses historical perspectives and insights from area studies Empirically chapters deal with different issues as well as varied bilateral relations and institutional settings Conceptually however they ask similar questions about what is unique about Indian foreign policy and how to study it The chapters also compel us to reconsider the meaning and boundary conditions of concepts e g coalition government strategic culture and sovereignty in a non Western context This book will appeal to both specialists and students of Indian foreign policy and International Relations Theory

Computer-Supported Cooperative Work Uwe M. Borghoff,Johann H. Schlichter,2013-11-09 The terms groupware and CSCW computer supported cooperative work have received significant attention in computer science and related disciplines for quite some time now This book is a revised and extended version of the 2nd edition of the German textbook Rechnergestützte Gruppenarbeit Eine Einführung in verteilte Anwendungen It has two main objectives first to outline the meaning of both terms and second to point out both the numerous opportunities for users of groupware and the risks of applying such systems The book intends to introduce an area of distributed systems namely the computer support of individuals trying to solve a common problem in cooperation with each other but not necessarily having identical work places or working times Computer supported cooperative work is an interdisciplinary application domain It can be viewed as a synergism between the areas of distributed systems and multimedia communication on the one hand and between those of information science and socio organizational theory on the other hand Thus the book is meant to help students of all these disciplines as well as users and developers of systems which have communication and cooperation within groups as top priorities
