A Hunter-Gatherer's Guide to the 21st Century Heather Heying, Bret Weinstein, 2021-09-14 A bold provocative history of our species finds the roots of civilization's success and failure in our evolutionary biology We are living through the most prosperous age in all of human history yet people are more listless divided and miserable than ever Wealth and comfort are unparalleled and yet our political landscape grows ever more toxic and rates of suicide loneliness and chronic illness continue to skyrocket How do we explain the gap between these two truths What's more what can we do to close it For evolutionary biologists Heather Heying and Bret Weinstein the cause of our woes is clear the modern world is out of sync with our ancient brains and bodies We evolved to live in clans but today most people don't even know their neighbors names Traditional gender roles once served a necessary evolutionary purpose but today we dismiss them as regressive The cognitive dissonance spawned by trying to live in a society we're not built for is killing us In this book Heying and Weinstein cut through the politically fraught discourse surrounding issues like sex gender diet parenting sleep education and more to outline a provocative science based worldview that will empower you to live a better wiser life They distill more than 20 years of research and first hand accounts from the most biodiverse ecosystems on Earth into straight forward principles and guidance for confronting our culture of hyper novelty
