selected research papers presented at the International Conference on Networking Intelligent Systems and Security held in Kenitra Morocco during 01-02 April 2021. The book highlights latest research and findings in the field of ICT and it provides new solutions, efficient tools and techniques that draw on modern technologies to increase urban services. In addition, it provides a critical overview of the status quo, shares new propositions and outlines future perspectives in networks, smart systems, security, information technologies and computer science. **Cloud of Things** Jitendra Kumar, G. R. Gangadharan, Ashutosh Kumar Singh, Chung-Nan Lee, 2024-08-07.

Cloud computing is the on-demand availability of computer system resources, especially data storage and computing power, without direct active management by the user. This book explores algorithms, protocols and system design principles of key smart technologies including cloud computing and the Internet of Things. It discusses the system design principles in cloud computing along with artificial intelligence, machine learning and data analytics applications. It presents blockchain-based solutions, cyber-physical system applications and deep learning approaches to solving practical problems. It highlights important concepts including the cloud of things architecture, cloud service management and virtualization and resource management techniques. It covers advanced technologies including fog computing, edge computing and distributed intelligence. It explores cloud-enabling technology, broadband networks and Internet architecture, Internet service providers (ISPs) and connectionless packet switching. The book is primarily written for graduate students, academic researchers and professionals in the field of computer science and engineering, electrical engineering and information technology. *Quality Of Protection* Dieter Gollmann, Fabio MASSACCI, Artsiom

Yautsiukhin, 2008-05-06. *Quality of Protection: Security Measurements and Metrics* is an edited volume based on the Quality of Protection Workshop in Milano, Italy, September 2005. This volume discusses how security research can progress towards quality of protection in security comparable to quality of service in networking and software measurements and metrics in empirical software engineering. Information security in the business setting has matured in the last few decades. Standards such as ISO 17799, the Common Criteria ISO 15408 and a number of industry certifications and risk analysis methodologies have raised the bar for good security solutions from a business perspective. Designed for a professional audience composed of researchers and practitioners in industry, *Quality of Protection: Security Measurements and Metrics* is also suitable for advanced level students in computer science. *Information Technology for Peace and Security* Christian Reuter, 2024-10-31.

Technological and scientific progress, especially the rapid development in information technology (IT) and artificial intelligence (AI), plays a crucial role regarding questions of peace and security. This textbook, extended and updated in its second edition, addresses the significance, potential of IT as well as the challenges it poses with regard to peace and security. It introduces the reader to the concepts of peace, conflict and security research, especially focusing on natural, technical and computer science perspectives. In the following sections, it sheds light on cyber conflicts, war and peace, cyber arms control, cyber attribution, infrastructures, artificial intelligence as well as ICT in peace and conflict. **Computer Networks** Piotr Gaj, Andrzej
