

Hormone replacement therapy (HRT)

The leaflet aims to answer your questions about taking HRT to treat your menopausal symptoms. If you have any questions or concerns, please speak to the doctor or nurse caring for you. This leaflet should be read alongside any patient information provided by the manufacturer.

What is HRT and why do I need it?

HRT is medication aimed at relieving the symptoms that some women experience during the menopause, also known as the change of life. These symptoms could include hot flushes, night sweats, vaginal dryness, tiredness and irritability, and decreased sex drive. HRT works by replacing the hormone (oestrogen) that your body stops producing when you go through the menopause or when you have had surgery to remove your ovaries.

Used long-term, HRT may help to reduce the risk of osteoporosis (thinning of the bones) and bowel cancer. However, there are also known risks including an increased risk of certain types of cancer. These risks are described in more detail later in this leaflet. As new research is available this will be discussed with you in your clinic appointment.

When you start HRT, the doctor or nurse will discuss your age, symptoms and medical conditions before looking at the risks and benefits of HRT which are specific to you. These risks and benefits could change and will be discussed at your yearly review.

Some women have a medical menopause (a menopause caused by medical treatment) and may be offered HRT. Some women are not able to take HRT – usually these are women with cancers that have been caused by hormones and women who have had a blood clot.

You may have heard of bioidentical hormones. These are not used in treatment as they have not been approved by organisations that regulate medicines. They have not been researched and proved safe to use.

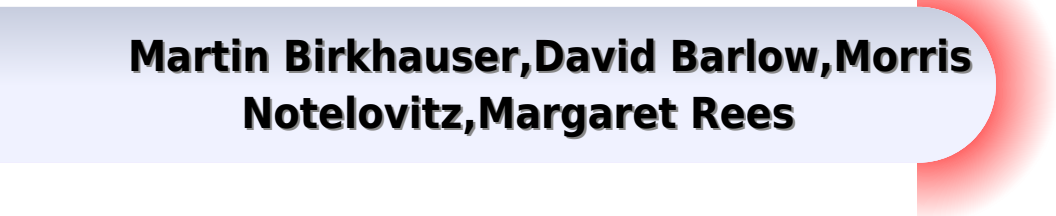

What are the different types of HRT?

There are two different types of HRT. The type of HRT you take will depend on where you are in the menopause and if your periods have stopped completely for a year.

- **Oestrogen only (no progestogen)** – this is for women who have had a hysterectomy (surgery to remove their womb), or are using an intrauterine system (IUS) such as Mirena. This type of HRT does not contain progestogen to protect the lining of the womb.
- **Combined HRT (oestrogen and progestogen)** – this is necessary if you still have your womb. This can be given in two ways.
 - Continuous combined HRT – oestrogen and progesterone, taken together daily (one a day) for 28 days. This means that there will be no withdrawal bleeds.
 - Sequential HRT – oestrogen only for the first 14 days then both hormones for the second 14 days. This usually results in monthly withdrawal bleeds.

Simran Kohli, 2005-06

Gone are the days when cabinet expansion used to get total media attention. Now cricket is hogging the limelight and team selection is the most debatable issue inside television studios before every series. Gone are the days when political king makers who played a major role in selecting the ministers used to grab unprecedented attention. Now it's the turn of national selectors. Gone are the days when after every general election media persons used to spend sleepless nights talking about the likely allocation of the portfolios. Which batsman is going to play at what position seems to be their major concern now. Gone are the days when psephologists used to be media's prize catch. Now former cricketers who can become good in house guests are in demand. Gone are the days when people used to wait for general elections with bated breath. The World Cup is the most awaited event now. Prime Minister of the country is still a powerful man but the captain of Indian cricket team can give him a run for his money as far as popularity and media attention is concerned. Nothing reflects this better than our television screen. From dawn to dusk from womb to tomb cricket follows us. Some of my friends say that it's a metro trend but I can say that it's catching up in far and remote areas of the country as well. Often people complain about why we have extreme reaction on Team India's performance. Swami Vivekananda who taught his disciples to worship God like heroes used to say: There must be no fear, no begging but demanding, demanding the highest. The true devotees are as hard as adamant and as fearless as lion. In our generation politicians failed us as they became synonymous with corruption. Bureaucrats failed us as they stood for delaying rather than getting the work done. Film stars gave us momentary feel of bravado but then they were reel and not real life heroes. In our search for heroes we zeroed in on the cricketers. And this is the reason as to why we react extremely to team India's performance. Cricket is more than just a game; it's a matter of emotion for us. Cricketers are more than just players; they are heroes for us. We react extremely as we love them and are emotionally attached to them. If there is one place on earth where all dreams of living men have found a home from the very earliest when men began the dream of existence, it's India. In its infancy cricket was very much an English sport but today it is the voice of India. The game has become so ingrained in our society that it's often said: If you want to know India, understand cricket. To bring about social equality in our representative institutions and policy making bodies, our political masters followed the policy of positive discrimination. On the contrary, the game of cricket has broken regional and other traditional barriers in the talent-based environment. From the game which was confined to Rajas and Maharajas, today it has percolated deep down to the grass root level. Team India's dressing room is truly reflective of this transformation; it is equally if not more representative than the Indian parliament. Most of the members of the Indian dressing room come from non cricketing backgrounds. The most charismatic batsman of present generation is the son of a teacher; his opening partner's father used to sell farm seeds, wheat and rice. The next all rounder hope of the country is the son of a muezzim and the Adam Gilchrist prototype of team India is the son of a government employee who retired as a pump operator. Most of the members of the present day Indian dressing room come from non cricketing environs. If Munaf Patel is from a village called Ikhar in Gujarat.

Kerala born pacer Sreesanth is from Kochi Most of the members of the present Indian dressing room had nothing in the name of sports facilities And yet they managed to find a way *HeartMemo* ,1997 *DRCOG Practice Exams* Stephen W. Lindow,2007-09
