The New Environmental Regulation Daniel J. Fiorino, 2006 Winner 2007 Louis Brownlow Award presented by the National Academy of Public Administration NAPA and 2006 Best Book in Environmental Management and Policy American Society for Public Administration Environmental regulation in the United States has succeeded to a certain extent in solving the problems it was designed to address air water and land are indisputably cleaner and in better condition than they would be without the environmental controls put in place since 1970 But Daniel Fiorino argues in *The New Environmental Regulation* that given recent environmental economic and social changes it is time for a new more effective model of environmental problem solving Fiorino provides a comprehensive but concise overview of U S environmental regulation its history its rationale and its application and offers recommendations for a more collaborative flexible and performance based alternative Traditional environmental regulation was based on the increasingly outdated assumption that environmental protection and business are irreversibly at odds The new environmental regulation Fiorino describes is based on performance rather than on a narrow definition of compliance and uses such policy instruments as market incentives and performance measurement It takes into consideration differences in the willingness and capabilities of different firms to meet their environmental obligations and it encourages innovation by allowing regulated industries especially the better performers more flexibility in how they achieve environmental goals Fiorino points to specific programs including the 33 50 Program innovative permitting and the use of covenants as environmental policy instruments in the Netherlands that have successfully pioneered these new strategies By bringing together such a wide range of research and real world examples Fiorino has created an invaluable resource for practitioners and scholars and an engaging text for environmental policy courses

The Oxford Handbook of Transformations of the State Stephan Leibfried, Evelyne Huber, Matthew Lange, Jonah D. Levy, Frank Nullmeier, John D. Stephens, 2015-06-11 This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries the post Communist

world and the Global South Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention from security to financial regulation migration welfare states democratization and quality of democracy ethno nationalism and human development The volume makes a compelling case that far from losing its relevance in the face of globalization the state remains a key actor in all areas of social and economic life changing its areas of intervention its modes of operation and its structures in adaption to new international and domestic challenges

Environmental Taxation and Climate Change Hope Ashiabor, Larry Kreiser, Julsuchada Sirisom, Janet E. Milne, 2011 Whilst green taxes face new challenges there is now an accumulated international experience on which to reflect This new collection of papers providing material for further vigorous argument evinces a keen appreciation of these realities I recommend this generally very readable book as a helpful reflection of some recent key concerns in the environmental policy area It constitutes a welcome addition to the literature inviting critical responses from the specialist but also drawing in the newcomer to the subject John Snape University of Warwick UK The level of public and political debate on carbon taxes is low Politicians fear the impact of a carbon tax on businesses and low income groups as well as on their popularity among voters This valuable book studies carbon taxes from many angles with ample attention paid to practical examples and shows that a smartly designed carbon tax is an indispensable instrument in the transition to a less carbon dependent economy Jonathan Verschuuren The University of Sydney Australia and Tilburg University The Netherlands Containing an authoritative set of original essays Environmental Taxation and Climate Change provides fresh insights and analysis on how environmental sustainability can be achieved through fiscal policy Written by distinguished environmental taxation scholars from around the world this timely volume covers a range of hotly debated subjects including carbon related taxation in OECD countries implications of environmental tax reforms innovative environmental taxation and behavioural strategies as well as many other relevant topics This up to date and well informed book will appeal to policymakers in government as well as students researchers and academics in environmental law and other academic disciplines

Environmental Governance in Europe Rüdiger K.W. Wurzel, Anthony R. Zito, A. J. Jordan, 2013-01-01 This path breaking book written by three well known experts makes an extremely valuable contribution to the study of new environmental policy instruments as well as to much wider theoretical debates about governance policy innovation learning and transfer Drawing on an unrivalled comparative empirical study of five different jurisdictions it manages to make many new points about issues that many of us thought had already been

settled Martin J nicke Free University of Berlin and former deputy chair German Advisory Council on the Environment Germany Much more than a study of environmental policy instruments this book ranges widely and authoritatively over the government to governance debate theories of policy change regulation policy transfer and policy learning Its lessons and conclusions are relevant and timely well beyond the European context of its case studies and it will be essential reading for public policy scholars everywhere for some time to come Jeremy Rayner University of Saskatchewan Canada This book represents a very rare achievement in that it combines detailed and up to the minute empirical analysis of environmental policy over the past four decades with a sophisticated discussion and critique of current theoretical issues in comparative and policy studies generally It unfolds with a keen eye towards understanding the temporal dimensions of policy dynamics both in the specific policy field examined but also in terms of testing key analytical concepts Taken as a whole it provides the most detailed empirical assessment to date of the general government to governance hypothesis with significant implications for policy and governance studies in general Michael Howlett Simon Fraser University Canada and National University of Singapore This book fills an important gap in the environmental governance literature addressing governance at a lower level of abstraction than other texts and examining how it plays out in relation to specific modes and instruments of governing It also contributes towards governance theory building efforts through the development of an empirically relevant analytical framework In so doing it provides a firm underpinning for assessing whether to what extent and in what ways there has been a transition from government towards governance in environmental policy Neil Gunningham Australian National University Theoretically sophisticated and empirically rich this book provides an overview of the introduction development and use of new policy instruments and new modes of environmental governance in the European context taking into account both national and European Union experiences This is a welcome addition to the field Miranda Schreurs Environmental Policy Research Centre and Free University of Berlin Germany European governance has witnessed dramatic changes in recent decades By assessing the use of new environmental policy instruments in European Union countries including the United Kingdom Germany the Netherlands and Austria this timely book analyses whether traditional forms of top down government have given way to less hierarchical governance instruments which rely strongly on societal self steering and or market forces The authors provide important new theoretical insights as well as fresh empirical detail on why and in what form these instruments are being adopted within and across different levels of governance along with analysis of the often overlooked interactions between the instrument types Providing important new theoretical insights into the governance debate by combining institutionalist and policy learning transfer approaches this book will be invaluable for both undergraduate and postgraduate students The analytical insights as well as a thorough empirical assessment of the use of environmental policy instruments in practice will prove essential for environmental policy specialists practitioners

Rediscovering Public Law and Public Administration in Comparative Policy Analysis Stéphane Nahrath, Frédéric Varone, 2009-01-01 Publi l occasion du 60e anniversaire du Prof Peter Knoepfel Professeur l Institut de hautes tudes en administration publique IDHEAP

Forests and Development Philippe Delacote, 2012-04-27 This book is a fully up to date study of the major issues facing forest conservation and the forestry industry which considers developments at local national and global levels Environmental and development topics relating to each level are discussed for instance the use of forest products in a rural poverty context corruption and forest harvesting and consumption as a political device Delacote employs a quantitative approach in order to analyse the plight of tropical forests in the developing world and in doing so produces a range of interesting conclusions This methodology fills a crucial research gap in existing studies of forests in a development context increased use of theoretical tools to interpret real life situations might be beneficial to the field Therefore the first objective of this book is to provide a sample of theoretical analysis concerning the forests and development nexus The second objective is to supply empirical economists with new theoretical insights with the hope that those results can emerge with conclusive field testing and relevant policy recommendations

Facilitating

Sustainable Innovation through Collaboration Joseph Sarkis, James J. Cordeiro, Diego Vazquez Brust, 2010-04-27

Facilitating Sustainable Innovation through Collaboration takes an unusually international perspective of sustainable innovation with contributions from Australia Europe and North America Prominent policy makers scientific researchers and practitioners in this field provide various inputs and analyses relating to the development of sustainable innovations It is expected that policy makers organizations individual researchers students and even communities can further develop and implement concepts and practices by drawing on the variety of projects and theoretical foundations presented in this volume

Rethinking Authority in Global Climate Governance Thomas Hickmann, 2015-10-16 In the past few years numerous authors have highlighted the emergence of transnational climate initiatives such as city networks private certification schemes and business self regulation in the policy domain of climate change While these transnational governance arrangements can surely contribute to solving the problem of climate change their development by different types of sub and non state actors does not imply a weakening of the intergovernmental level On the contrary many transnational climate initiatives use the international climate regime as a point of reference and have adopted various rules and procedures from international agreements Rethinking Authority in Global Climate Governance puts forward this argument and expands upon it using case studies which suggest that the effective operation of transnational climate initiatives strongly relies on the existence of an international regulatory framework created by nation states Thus this book emphasizes the centrality of the intergovernmental process clustered around the United Nations Framework Convention on Climate Change UNFCCC and underscores that multilateral treaty making continues to be more important than many scholars and policy makers suppose This book will be of great interest to students and scholars of global environmental politics climate change and sustainable development

Institutional Dynamics in Environmental Governance Bas Arts, Pieter Leroy, 2006-09-09 Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades That observation is nothing new attested to by the number of publications conferences and both private and public projects that have been initiated However our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects leaving us with a limited understanding of what the newness consists of in terms of an integrated perspective This book presents fresh analyses of a number of well known cases but does so from one comprehensive view the so called policy arrangement approach Cases discussed range over organic farming integrated water management nature policy cultural heritage policy integrated region oriented policy corporate environmental management and target group policy always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives
