**Wise?** Susan Schreiner, 2011-01-27 The topic of certitude is much debated today On one side commentators such as Charles Krauthammer urge us to achieve moral clarity On the other those like George Will contend that the greatest present threat to civilization is an excess of certitude To address this uncomfortable debate Susan Schreiner turns to the intellectuals of early modern Europe a period when thought was still fluid and had not yet been reified into the form of rationality demanded by the eighteenth and nineteenth centuries Schreiner argues that Europe in the sixteenth century was preoccupied with concerns similar to ours both the desire for certainty especially religious certainty and warnings against certainty permeated the earlier era Digging beneath overt theological and philosophical problems she tackles the underlying fears of the period as she addresses questions of salvation authority the rise of skepticism the outbreak of religious violence the discernment of spirits and the ambiguous relationship between appearance and reality In her examination of the history of theological polemics and debates as well as other genres Schreiner sheds light on the repeated evaluation of certainty and the recurring fear of deception Among the texts she draws on are Montaigne's Essays the mystical writings of Teresa of Avila the works of Reformation fathers William of Occam Luther Thomas Muntzer and Thomas More and the dramas of Shakespeare The result is not a book about theology but rather about the way in which the concern with certitude determined the theology polemics and literature of an age

**Enemies of the Cross** Vincent Everer, 2021-01-05 *Enemies of the Cross* examines how suffering and truth were aligned in the divisive debates of the early Reformation Vincent Everer explores how Martin Luther along with his first intra Reformation critics offered true suffering as a crucible that would allow believers to distinguish the truth or falsehood of doctrine teachers and their own experiences To use suffering in this way however reformers also needed to teach Christians to recognize false suffering and the false teachers who hid under its mantle This book contends that these arguments which became an enduring part of the Lutheran and radical traditions were nourished by the reception of a daring late medieval mystical tradition the post Eckhartian which depicted annihilation of the self as the way to union with God The first intra Reformation dissenters Andreas Bodenstein von Karlstadt and Thomas M ntzer have frequently been depicted as champions of medieval mystical views over and against the non mystical Luther Everer counters this depiction by showing how Luther Karlstadt and M ntzer developed their shared mystical tradition in diverse directions while remaining united in the conviction that sinful self assertion prevented human beings from receiving truth and living in union with God He argues that Luther Karlstadt and M ntzer each represented a different form of ecclesial political dissent shaped by a mystical understanding of how Christians were united to God through the destruction of self assertion *Enemies of the Cross* draws on seldom used sources and proposes new concepts of revaluation and relocation to describe how Protestants and radicals brought medieval mystical teachings into new frameworks that rejected spiritual hierarchy
