more than sixty anecdotes chosen and edited by science writer Adrian Berry. Divided into eleven sections, the book covers topics ranging from man's exploration of the world and space to the revolution in communications, scientific martyrs and bogus science. It contains a wealth of fascinating little-known facts and information as well as anecdotes about people who have played crucial roles in the progress of science: Louis Pasteur, Einstein and Galileo, along with lesser-known individuals like Lucy, the woman who lived more than three million years ago; Gilbert Vernam, the creator of the one-time pad, the world's first unbreakable cipher; and J. S. Haldane, the only man to have tested safely in the mines by reciting Shakespeare. The scientific achievements of this century—relativity, quantum mechanics, nuclear power, genetic engineering, space travel, jet aircraft, desktop computers, and the beginnings of artificial intelligence—have swept away most of the predictions of the last. What do these breakthroughs augur for the twenty-first century? *The Book of Scientific Anecdotes* illuminates some of the inventions and discoveries that have changed the world and the people who made them.
