Osterholm, 2017-03-14 A leading epidemiologist shares his powerful and necessary Richard Preston author of *The Hot Zone* stories from the front lines of our war on infectious diseases and explains how to prepare for global epidemics featuring a new preface on COVID 19 Unlike natural disasters whose destruction is concentrated in a limited area over a period of days and illnesses which have devastating effects but are limited to individuals and their families infectious disease has the terrifying power to disrupt everyday life on a global scale overwhelming public and private resources and bringing trade and transportation to a grinding halt In today's world it's easier than ever to move people animals and materials around the planet but the same advances that make modern infrastructure so efficient have made epidemics and even pandemics nearly inevitable And as outbreaks of COVID 19 Ebola MERS and Zika have demonstrated we are woefully underprepared to deal with the fallout So what can and must we do in order to protect ourselves from mankind's deadliest enemy Drawing on the latest medical science case studies policy research and hard earned epidemiological lessons *Deadliest Enemy* explores the resources and programs we need to develop if we are to keep ourselves safe from infectious disease The authors show how we could wake up to a reality in which many antibiotics no longer cure bioterror is a certainty and the threat of a disastrous

influenza or coronavirus pandemic looms ever larger Only by understanding the challenges we face can we prevent the unthinkable from becoming the inevitable Deadliest Enemy is high scientific drama a chronicle of medical mystery and discovery a reality check and a practical plan of action

That's Why I'm a Doctor Mark Bulgutch, 2020-03-07 Doctors hold a pretty special place in our lives They're often there when we're born and they're usually there when we die They're there for a lot of the scary or weird stuff that happens in between too In *That's Why I'm a Doctor* award winning journalist Mark Bulgutch brings together forty six stories from a diverse group of physicians including pediatricians interventional radiologists general surgeons psychiatrists family doctors gastroenterologists ophthalmologists gynecologists neurologists and more Each doctor's story describes the moment that left them thinking That's why I became a doctor This volume includes stories of innovation developing a treatment for cholera rare and fascinating medical cases the separation of conjoined twins the less dramatic but still quietly satisfying times when the doctor was able to have a lasting positive impact on the life of a patient or their family and of course those unexpected moments when the patient taught the doctor an important life lesson that would inform their practice for years to come These stories big and small are tied together by a sense of caring It's impossible to read what these doctors have to say and not come away with a new understanding of what goes through the mind of the person on the other end of the stethoscope and how dedicated doctors must be to do what they do
