South Wales Railways Gallery Stuart Davies,2022-12-29 At its peak the South Wales railway network was one of the most complex in the world Its primary purpose was to transport Coal from source to point of consumption or export via the various docks To this was added the other raw materials necessary for making Iron and ultimately Steel together with the respective products of that industry True there was no glory in this day to day phenomenon and as a consequence the area has been poorly represented in the annals of the British railway network Even that paragon of railway publicity the Great Western found easier plums to pick elsewhere on its system However in addition to the GW the area was a magnet for the London Although of secondary importance in regard to revenue Passenger services were carefully dovetailed into the intensive freight operation and matched any other location s provision After the 1923 Grouping the GW became the major player in South Wales It absorbed all 15 of the independent companies and further extended its policy of standardization Nevertheless where the smaller companies demonstrated good practices these were embraced The L NW and MR elements became LMSR but still remained far flung tentacles from the parent All this is recognized here albeit in proportion The Gallery aims to provide a flavor of what the railways of South Wales had to offer and enlighten the reader as to its major part in the national network
