our ideas about long term and catastrophic environmental challenges such as climate change militarism deforestation the pollution and management of the global commons petroculturalism and the commodification of nature The volume presents a postcolonial approach to the environmental humanities especially in conjunction with current thinking in areas such as political ecology and environmental justice Spanning regions such as Africa Asia Eastern Europe Latin America and the Caribbean Australasia and the Pacific as well as North America the volume includes essays by founding figures in the field as well as new scholars providing vital new interdisciplinary perspectives on the politics of the earth disaster vulnerability and resilience political ecologies and environmental justice world ecologies and the Anthropocene In engaging critical ecologies the volume poses a postcolonial environmental humanities for the twenty first century At the heart of this is a conviction that a thoroughly global postcolonial and comparative approach is essential to defining the emergent field of the environmental humanities and that this field has much to offer in understanding critical issues surrounding the creation of alternative ecological futures

The Politics of Globality since 1945 Rens van Munster, Casper Sylvest, 2016-05-12 This timely comprehensive and interdisciplinary volume advances an original argument about the complex roots and multiple politics of globality It shows that technological innovations and decisive developments since 1945 from the nuclear revolution to anthropogenic climate change and debates about the Anthropocene have prompted reflections on the global condition of humanity and helped reshape political communities by making the world appear small manageable and interconnected The contributors stress how human beings have transformed both their habitat and their view of human earth relations since 1945 Such changes have been accompanied by important shifts in political visions prompted new forms of human association encouraged legal and institutional reform and spurred ideas about ecological humility At the same time the spatially all encompassing nature of globality have also informed projects of human mastery and a range of practices historically associated with militarization and a strongly statist conception of national security This volume reflects on these paradoxical relationships their history and contemporary relevance Contributing to the overlapping concerns of four burgeoning fields of study across the humanities and the social sciences globality and globalization studies geopolitics and political geography Anthropocene studies global governance and political theory the book will be of great use to scholars and graduates working in these areas

Survival: a Study of Superbombs, Strontium 90 and Fallout J. M. Fowler, 1960 **Iraq: Silent Death (Penerbit USM)** Christian P Scherrer, Silent Death documents mass murder by the use of banned Uranium weapons The spread of genetic disorders is among the most heinous and criminal forms of modern warfare Its ever lasting impact on humans is inherently genocidal Such weapons have since 1991 been used in Iraq Afghanistan the Balkans and Lebanon Universiti Sains Malaysia Penerbit Universiti Sains Malaysia **A History of Radioecology** Patrick C. Kangas, 2022-12-26 This book presents a history of radioecology from World War II through to the critical years of the Cold War finishing with a discussion of recent developments and future implications for the field Drawing on a vast array of primary sources the book

reviews synthesizes and discusses the implications of the ecological research supported by the Atomic Energy Commission AEC of the United States government from World War II to the early 1970s This was a critical period in the history of ecology characterized by a transition from the older largely descriptive studies of communities of plants and animals to the modern form of the science involving functional studies of energy flow and mineral cycling in ecosystems This transition was in large part due to the development of radioecology which was a by product of the Cold War and the need to understand and predict the consequences of a nuclear war that was planned but has never occurred The book draws on important case studies such as the Pacific Proving Grounds the Nevada Test Site El Verde in Puerto Rico the Brookhaven National Laboratory and recent events such as the nuclear disasters at Chernobyl and Fukushima By revisiting studies and archived information from the Cold War era this book offers lessons from the history of radioecology to provide background and perspective for understanding possible present day impacts from issues of radiation risks associated with nuclear power generation and waste disposal Post Cold War developments in radioecology will be also reviewed and contrasted with the AEC supported ecology research for further perspectives This book will be of great interest to students and scholars of radioecology environmental pollution environmental technology bioscience and environmental history

Nuclear Fear Spencer R. WEART,1988 Our thinking is inhabited by images images of sometimes curious and overwhelming power The mushroom cloud weird rays that can transform the flesh the twilight world following a nuclear war the white city of the future the brilliant but mad scientist who plots to destroy the world all these images and more relate to nuclear energy but that is not their only common bond Decades before the first atom bomb exploded a web of symbols with surprising linkages was fully formed in the public mind The strange kinship of these symbols can be traced back not only to medieval symbolism but still deeper into experiences common to all of us This is a disturbing book it shows that much of what we believe about nuclear energy is not based on facts but on a complex tangle of imagery suffused with emotions and rooted in the distant past Nuclear Fear is the first work to explore all the symbolism attached to nuclear bombs and to civilian nuclear energy as well employing the powerful tools of history as well as findings from psychology sociology and even anthropology The story runs from the turn of the century to the present day following the scientists and journalists the filmmakers and novelists the officials and politicians of many nations who shaped the way people think about nuclear devices The author a historian who also holds a Ph D in physics has been able to separate genuine scientific knowledge about nuclear energy and radiation from the luxuriant mythology that obscures them In revealing the history of nuclear imagery Weart conveys the hopeful message that once we understand how this imagery has secretly influenced history and our own thinking

we can move on to a clearer view of the choices that confront our civilization

Reviews of this book Nuclear Fear is a rich layered journey back through our atomic history to the primal memories of monstrous mutants and mad scientists It is a deeply serious book but written in an accessible style that reveals the culture in which this fear emerges only to be suppressed and emerge again Ellen Goodman Boston Globe Reviews of this book A historical portrait of the quintessential modern nightmare Weart shows in meticulous and fascinating detail how the ancient images of alchemy fire sexuality Armageddon gold eternity and all the rest immediately clustered around the new science of atomic physics There is no question that the image of nuclear power reflects a complex and deeply disturbing portrait of what it means to be human Stephan Salisbury Philadelphia Inquirer Reviews of this book A detailed probing study of American hopes dreams and insecurities in the

twentieth century Weart has a poet's acumen for sensing human feelings Nuclear Fear remains captivating as history and original as an anthropological study of how nuclear power like alchemy in medieval times offers a convenient symbol for deeply rooted human feelings Los Angeles Times Reviews of this book Weart's tale boldly sweeps from the futuristic White City of the 1893 Chicago World's Fair and the discovery of radioactivity in 1896 through Hiroshima and Star Wars An admirable call for synthesis of art and science in a true transmutation that takes us beyond nuclear fear H Bruce Franklin Science
