**The Film Edge** Eduardo Angel Russo, 2010 What does it mean to make films in Latin America The landscape today is as complex as it is dynamic New directors and new projects are constantly emerging film festivals appear one after another in what could only be described as an explosion of cinema in the region And yet inherent to this panorama both so vital and so difficult to define there is a troubling sense of uncertainty This book which brings together the writing of directors producers scholars and critics examines the current state of Latin American cinema Exploring tendencies and possibilities for the future of the audiovisual arts within the context of recent changes in methods of production and circulation the authors address a number of key issues including the role of independent filmmaking in the market and in relation to alternative modes of production the formation of new regional and global identities means of support for filmmakers in Latin America and the question of new formats categories and genres The result is less a mosaic of fragments than it is a tapestry whose interwoven threads create complex and changing shapes that constitute the fabric itself This tapestry allows us to glimpse beyond their particularities the points of contact between different parts of the region This book is an abridged and revised edition of HACER CINE Produccion Audiovisual en America Latina published in 2008 by Fundacion TyPA and Editorial Paidos This new

**Democracy's Edge** Frances Moore Lappe, 2005-10-28 Three out of five Americans both Republicans and Democrats feel our country is headed in the wrong direction America is at the edge a critical place at which we can either renew and revitalize or give in and lose that most precious American ideal democracy and along with it the freedom fairness and opportunities it assures Democracy's Edge is a rousing battle cry that we can and must act now From Jefferson to Eisenhower presidents from both parties have warned us of the danger of letting a closed narrow group of business and government officials concentrate power over our lives Yet today a small and unrepresentative group of people is making vital decisions for all of us But this crisis is only a symptom Lapp argues It's a symptom of thin democracy something done to us or for us not by or with us Such democracy is always at risk of being stolen by private interests or extremist groups left and right But there is a solution The answer says Lapp is Living Democracy a powerful yet often invisible citizens revolution surging in communities across America It's not random disjointed activism but the emergence of a new historical stage of democracy in which Americans realize that democracy isn't something we have but something we do Either we live it or lose it says Lapp
