Icon Programming for Humanists Alan D. Corré, 1990 Icon is the programming language of choice for applications in the humanities. An ideal option for those whose main interest or research areas is the written word. Icon emphasizes proper programming principles and at the same time strikes a reasonable balance between structure and freedom. Icon Programming for Humanists teaches the principles of the Icon language in a very task oriented fashion. This book emphasizes projects that might interest the student of texts and language and Icon features are instilled incidentally to this. To aid the learning process, actual programs are exemplified and analysed to provide illustrations that readers can imitate and apply to their own projects and programs. **An overview of the Icon programming language, version 8** Ralph E.
