## **Japans Economic Position The Progress Of Industrialization:**

An East Asian Route of Industrialization? The Case of Japan, 1868-1937 Peer Vries, 2022-08-01 In this book Peer Vries is the first scholar to provide an extensive test of the claim that industrialization in East Asia in particular in Japan between the Meiji Restoration and World War Two would have been much more labour intensive than industrialization in the West He does this by systematically comparing the role and importance of labour and capital in Japan and in a number of Western countries at a similar stage of their industrial development He uses macro economic data as well as specific observations by people at the time It turns out that there is no reason to distinguish a specific labour intensive Japanese route of industrialization His comparative analysis provides us with a better understanding of the logic of industrialization in both West and East

**Japan's Quest** Warren S. Hunsberger, 1996-12-23 An international team of ten specialists in Japanese and American foreign relations address the crucial question what role should Japan play in international affairs This question has not found a fully satisfactory answer since the forced opening to foreign contacts in the mid nineteenth century Having copied foreign models and achieved a series of stunning successes and some failures in many aspects of private and public life Japan today stands at a pinnacle of economic power and affluence Despite this both economics and politics are undergoing major strains and changes during the 1990s and the quest for true internationalization is fraught with problems and only partially fulfilled This book is a joint project of the American University in Washington and Ritsumeikan University in Kyoto

*Averting a Great Divergence* Peer Vries, 2019-08-08 The most significant debate in global economic history over the past twenty years has dealt with the Great Divergence the economic gap between different parts of the world Thus far this debate has focused on China India and north western Europe particularly Great Britain This book shifts the focus to ask how Japan became the only non western county that managed at least partially to modernize its economy and start to industrialize in the 19th century Using a range of empirical data Peer Vries analyses the role of the state in Japan s economic growth from the Meiji Restoration to World War II and asks whether Japan s economic success can be attributed to the rise of state power Asserting that the state s involvement was fundamental in Japan s economic catching up he demonstrates how this was built on legacies from the previous Tokugawa period In this book Vries deepens our understanding of the Great Divergence in global history by re examining how Japan developed and modernized against the odds
