media including writing and print Centuries elapsed before most of these new forms of communication would be used to produce works of art and intellect of sufficient stature to overcome this inevitable mistrust and nostalgia Using examples taken from the history of photography and film as well as MTV experimental films and Pepsi commercials the author considers the kinds of work that might unleash in time the full power of moving images And he argues that these works an emerging computer edited and distributed new video have the potential to inspire transformations in thought on a level with those inspired by the products of writing and print Stephens sees in video s complexities simultaneities and juxtapositions new ways of understanding and perhaps even surmounting the tumult and confusions of contemporary life Sure to spark lively even heated debate *The Rise of the Image the Fall of the Word* belongs in the library of millennium watchers everywhere
