Eye Tracking Methodology: Theory and Practice Andrew Duchowski, 2013-03-14 The scope of the book falls within a fairly narrow Human Computer Interaction domain i.e. describing a particular input modality however it spans a broad range of interdisciplinary research and application topics There are at least three domains that stand to benefit from eye tracking research visual perception human computer interaction and computer graphics The amalgamation of these topics forms a symbiotic relationship Graphical techniques provide a means of generating rich sets of visual stimuli ranging from 2D imagery to 3D immersive virtual worlds while research exploring visual attention and perception in turn influences the generation of artificial scenes and worlds Applications derived from these disciplines create a powerful Human Computer Interaction modality namely interaction based on knowledge of the user's gaze Recent advancements in eye tracking technology specifically the availability of cheaper faster more accurate and easier to use trackers have inspired increased eye movement and eye tracking research efforts However although eye trackers offer a uniquely objective view of overt human visual and attentional processes eye trackers have not yet gained widespread use beyond work conducted at various research laboratories This lack of acceptance is due in part to two reasons first the use of an eye tracker in an applied experimental setting is not a widely taught subject Hence there is a need for a book that may help in providing training

Eye Movements from Physiology to Cognition J.K. O'Regan, A. Lévy-Schoen, 2013-10-22 Eye movement research from a range of disciplines is presented in this book Contributions from all over the world examine theoretical and applied aspects of eye movements including classical biocybernetic models physiology pathology ocular exploration reading ergonomics human factors and microcomputer calibration techniques

Eye Tracking Methodology Andrew Duchowski, 2007-09-14 Despite the availability of cheap fast accurate and usable eye trackers there is little information available on how to develop implement and use these systems This 2nd edition of the successful guide contains significant additional material on the topic and aims to fill that gap in the market by providing an accessible and comprehensive introduction Additional key features of the 2nd edition include Technical description of new state of the art eye tracking technology a complete whole new section describing experimental methodology including experimental design empirical guidelines and five case studies and survey material regarding recent research publications

Search for Paradise Jens Naumann, 2012-08-31 Jens Naumann a typical energetic young man of 17 had just moved out of his parent s home in Northern British Columbia moving into a railway camp as an employee with the British Columbia Railway All goes well as Jens enjoys his new found freedom treasuring his driver s license and its associated freedom of travel Then on a wintry day in 1981 fate rears its ugly head and strikes him blind in his left eye Jens quickly rearranges his life to accommodate his new found fear that of losing his remaining eye now that the true vulnerability of his eyesight is revealed As his life continues onwards despite the initial readjustment he finds ultimate happiness in his new marriage to his young wife Lorri and just when life stands at its threshold of paradise exploring fatherhood along with the beauty of travel and thrill his worst nightmare becomes reality not once but twice in the most bizarre series of unforeseen incidents of bad luck as Jens is totally blinded with no foreseeable chance of seeing again according to the best medical experts Jens tries his best to adjust to this unwanted situation exploring conventional methods of rehabilitation to live with blindness as well as using imaginative totally unheard of activities in order to pass his time in a hope of someday being able to see again despite all the odds stacked against him Close to the turn of the century Jens unexpectedly receives news of an American Medical Device Engineer Dr William H Dobelle inviting blind adults as patients for his newly developed artificial vision system designed to provide limited vision via visual cortex stimulation Dr Dobelle claims that his system has a good chance in functioning based on previous experimenting with volunteers at the same time classifying the surgical procedure as minor The system and its related components is complicated consisting of not only the implants but a series of electrical sockets protruding from the patients head to which an array of computer boxes and stimulator hardware is connected and worn by the patient Jens is determined to be one of the patients regardless of the remoteness of the chance of being one out of literally millions of blind people in the World possibly lining up to have this procedure in hopes of ending their blindness for once and for all To his absolute surprise Jens is accepted as the first patient for this procedure and slowly builds a relationship with Dr Dobelle as Jens overcomes obvious barriers of raising enough money for the very expensive procedure as well as fighting the challenges of relentless forces working against him for his involvement in the Dobelle vision project Armed with preconceived ideas of how a research institute should be run Jens travels overseas for the various stages of the procedure only to find the most astonishing facts of what goes on in the heart of a renowned medical research institute Not only is Jens looking at the workings of the Dobelle Institute from the view of a patient but in short time Jens is hired by the firm as Patient Representative providing further exploration yet on the inner most details concerning a research company and its treatment of the 15 additional implanted patients Throughout the book

Jens describes the devastation exhilaration disappointment elation and confusion that attempts at sight recovery medical intervention media propaganda and ethical boundaries conjure in the most illustrative intensity The manner in which the book ends is most indescribable one could view it as the final straw the beginning of a new era the curse of the unforgiven the sadness of a crushing reality the beginning of a good job left unfinished or that of the birth of a new expert compelled to unleash the new found knowledge for the whole World to thrive Just as many questions are answered many more yet are opened and left so far undiscovered Search for Paradise is ce

Euphoria Connie Gault,2009-09 A bond between a young girl and an

abandoned baby encompasses eastern and western Canada from 1890s Toronto to the Regina Cyclone A historical novel that chronicles the life of Gladdie McConnell and her seemingly mysterious connection to Orillia Cooper The importance of sex of love of mothers and daughters all are themes running through this novel The nurturing and love from our mothers be it traditional or not is paramount to real survival The opening prologue set in Toronto in the late 1880 s connects Gladdie to Orillia in a way she didn t think possible When Gladdie a Toronto boarding house servant makes a promise to an abandoned day old child in 1891 she means to keep it A host of obstacles including her station in life a determined adoptive family and half a continent of distance isn t going to stop her Schooled in adversity and red headed like all the best indomitable heroines she knows how to persevere The twists and turns of Gladdie s helpmate life lead her to the summer of 1912 when twenty year old Orillia Cooper wakes up from surgery after being struck down by the Regina Cyclone It has taken a tornado and a devastating injury to Orillia to bring them back together because Orillia is that same child However she has no idea who Gladdie McConnell really is she s just a friend when she is in need of one An engaging cast of characters inhabits Euphoria bringing both eastern and western Canada at the turn of the 20th century to vivid life This beguiling novel with its quiet intelligence wit and comedy of errors is about the stories we want to believe in and more importantly about the value that may exist in wishes that don t come true

Education in Search of the Spirit John Fentress Gardner,1996 Real education will always seek to strengthen what is best in the human soul its longing for the experience of spiritual truth that brings into the self an objective appreciation of the noble aspects of its own nature together with a subjective sense of real affinity with the rest of humanity the earth planet as a whole and the great cosmos above and beyond The premise of this book is that a human being is a being of body soul and spirit whose core is eternal spirit from which center one should strive to live From this perspective the aim of true education is to help our children activate this deepest center in themselves For this living intuitive thinking must be brought to life in a new way The organ for such thinking is the heart where will and feeling join in uniting self and world morality and truth love and action This book is in three parts The first poses the problem the second describes the Waldorf approach as a solution and the third deals with questions of special interest to parents and educators alike such as authority discipline and freedom the nature of genius and the question of cultural pluralism The first edition of this book was titled *The Experience of Knowledge* in response to a clear call for experience in education Certainly if the sole purpose of education is to acquire information learning becomes dry abstract and deadening To have meaningful consequence in a person s life coming to know must become an experience Too often however such experience is understood simply as doing field trips class projects and so on But doing if unconnected to the whole person is just activity To become true experience it must speak out of and toward a student s secret center the spirit Hence the author affirms that authentic education is always in search of the spirit
