Living Anatomy A Working Atlas Using Computed Tomography Magnetic Resonance And Angiography Images:

Living Anatomy Robert A. Novelline, Lucy Frank Squire, 1987 This is a text atlas workbook in a large format for medical students and radiologists in training that teaches in vivo anatomy by means of modern imaging modalities especially computed tomography CT magnetic resonance imaging MRI and angiography State of the art imaging scans are coupled with anatomical drawings to illuminate normal and abnormal anatomical structures Introduction to Sectional Anatomy

Michael E. Madden, 2008 Featuring all the latest imaging modalities including ultrasound MR and PET CT this Second Edition text provides a solid understanding of sectional anatomy and its applications in clinical imaging Chapters on each body region include patient CT and MR images shown in sequence through multiple planes followed by clinical cases centered on CT MR ultrasound and PET CT images By comparing images from different patients readers learn to distinguish normal anatomic variations from variations that indicate disease or injury This edition includes new clinical cases and has a new layout that makes it easier to compare images from several patients Each chapter ends with clinical application questions

Merrill's Atlas of Radiographic Positions and Radiologic Procedures Philip W. Ballinger, 1995 This text the second in a three volume set contains illustrations examples and procedures for imaging every part of the body Special icons designate essential competency positions and projections identified as necessary for entry level radiographers
