Living Colour Primer:

Living Color Nina G. Jablonski, 2012-09-27 *Living Color* is the first book to investigate the social history of skin color from prehistory to the present showing how our body's most visible trait influences our social interactions in profound and complex ways. In a fascinating and wide-ranging discussion, Nina G. Jablonski begins with the biology and evolution of skin pigmentation, explaining how skin color changed as humans moved around the globe. She explores the relationship between melanin pigment and sunlight and examines the consequences of rapid migrations, vacations, and other lifestyle choices that can create mismatches between our skin color and our environment. Richly illustrated, this book explains why skin color has come to be a biological trait with great social meaning, a product of evolution perceived by culture. It considers how we form impressions of others, how we create and use stereotypes, how negative stereotypes about dark skin developed and have played out through history, including being a basis for the transatlantic slave trade. Offering examples of how attitudes about skin color differ in the U.S., Brazil, India, and South Africa, Jablonski suggests that a knowledge of the evolution and social importance of skin color can help eliminate color-based discrimination and racism. [Social Issues in Living Color](#) Arthur W. Blume, 2017-02-16 Offering fresh and exciting approaches to solving global problems, this book creatively views challenging social issues through the lens of racial and ethnic psychology. As the demographic makeup of the American population continues to evolve, understanding and addressing the psychological needs of ethnic minorities in the United States becomes more important to the overall health and well-being of society. This three-volume set is the first publication to explicitly tackle social issues from the perspective of racial and ethnic psychology. It uniquely presents racial and ethnic psychological perspectives on topics such as media, criminal justice, racism, climate change, gender bias, and health and mental health disparities. Volume one introduces readers to the basic scientific concepts of racial and ethnic minority psychology and then examines the intersectionality of race, ethnicity, gender, and sexual orientation. It also addresses how race and ethnicity affect communication styles, leadership styles, and media. The second volume discusses the experiences of individuals within racial and ethnic minorities, including overt racism, covert racism, and colonialism, and addresses how ethnic minority psychology plays a role in our educational system, poverty, global climate change, and sustainability. The third volume covers ethics in health and research, considers the causes of health and mental health disparities, and identifies diversity initiatives that can improve the health and well-being of all citizens, not just racial and ethnic minority citizens. **Color Influencing Form (A Color Coursebook)** Roy Osborne, 2016-05-28 *Color Influencing Form* offers a compact, comprehensive, and inexpensive coursebook for the study of color in art and design.
