From The Ashes Of Ruin:

The Northernmost Ruins of the Globe Bjarne Grønnow, Jens Fog Jensen, 2003-10-15 An important part of the heritage of Count Eigil Knuth 1903 1996 is his archaeological archive containing contextual information on prehistoric sites gathered during six decades of research in High Arctic Greenland The finds and observations are a key to the understanding of human life under extreme conditions in a long term perspective and represent a unique piece of evidence concerning the early cultural history of the Eastern Arctic Knuth's expeditions from 1932 to 1995 took him to Greenland and Canada in particular High Arctic Greenland In a number of important articles Knuth published the findings dating back to the earliest human settlement in Greenland However he never managed to present the complete body of information and results from his many investigations The present authors have thus compiled a computer database on the basis on his archive which constitutes the starting point of the present book The book focuses on Knuth's most substantial contribution to archaeology the prehistory of Peary Land and adjacent areas In the catalog emphasis has been placed on topographical and architectural information site structure artefact statistics and radiocarbon dates A total of 154 archaeological sites are presented Fifty one sites with a total of 244 features are Independence I sites c 2460 1860 cal BC twenty three sites with a total of 416 features belong to Independence II c 900 400 cal BC and sixty three sites with a total of 626 features are of Thule origin c 1400 1500 ca AD This study presents some new information on the faunal material from Peary Land based on Christyann Darwent's recent analyses as well as new data on the dwelling features on the Adam C Knuth Site which was visited by a multidisciplinary team in 2001 It also offers an introduction presenting an overview and evaluation of Knuth's remarkable curriculum vitae as an independent arctic archaeologist In the concluding chapters some basic statistics on the archaeological sites are presented We evaluate Knuth s radiocarbon datings of the Independence I Independence II and Thule cultures in High Arctic Greenland and settlement distributions and settlement patterns for the three cultures represented in Peary Land are discussed Nation Megan Kate Nelson, 2012 During the Civil War cities houses forests and soldiers bodies were transformed into dead heaps of ruins novel sights in the southern landscape How did this happen and why And what did Americans northern and southern black and white male and female make of this proliferation of ruins Ruin Nation is the first book to bring together environmental and cultural histories to consider the evocative power of ruination as an imagined state an act of destruction and a process of change Megan Kate Nelson examines the narratives and images that Americans produced as they confronted the war s destructiveness Architectural ruins cities and houses dominated the stories that soldiers and civilians told about the savage behavior of men and the invasions of domestic privacy. The ruins of living things trees and bodies also provoked discussion and debate People who witnessed forests and men being blown apart were plagued by anxieties about the impact of wartime technologies on nature and on individual identities. The obliteration of cities houses trees and men was a shared experience Nelson shows that this is one of the ironies of the war s ruination in a time of the most extreme national

divisiveness people found common ground as they considered the war s costs And yet very few of these ruins still exist suggesting that the destructive practices that dominated the experiences of Americans during the Civil War have been erased from our national consciousness A Story of Ruins Wu Hung, 2013-02-15 This richly illustrated book examines the changing significance of ruins as vehicles for cultural memory in Chinese art and visual culture from ancient times to the present The story of ruins in China is different from but connected to ruin culture in the West This book explores indigenous Chinese concepts of ruins and their visual manifestations as well as the complex historical interactions between China and the West since the eighteenth century Wu Hung leads us through an array of traditional and contemporary visual materials including painting architecture photography prints and cinema A Story of Ruins shows how ruins are integral to traditional Chinese culture in both architecture and pictorial forms It traces the changes in their representation over time from indigenous methods of recording damage and decay in ancient China to realistic images of architectural ruins in the nineteenth and twentieth centuries to the strong interest in urban ruins in contemporary China as shown in the many artworks that depict demolished houses and decaying industrial sites. The result is an original interpretation of the development of Chinese art as well as a unique contribution to global art history The Ethnogeography of the Tewa **Rising from the Ruins** Bruce C. Swaffield,2009-10-02 The neoclassic tendency <u>Indians</u> John Peabody Harrington, 1916 to write about the ruins of Rome was both an attempt to recapture the grandeur of the golden age of man and a lament for the passing of a great civilization John Dyer who wrote The Ruins of Rome in 1740 was largely responsible for the eighteenth century revival of a unique subgenre of landscape poetry dealing with ruins of the ancient world Few poems about the ruins had been written since Antiquit's de Rome in 1558 by Joachim Du Bellay Dyer was one of first neoclassic poets to return to the decaying stones of a past society as a source of poetic inspiration and imagination He views the relics as monuments of grandeur and greatness but also of impending death and destruction While following most of the rules and standards of neoclassicism that of imitating nature and giving pleasure to a reader Dyer also includes his personal reactions and emotions in The Ruins of Rome The work is composed from the position of a poet who serves as interpreter and translator of the subject a primary characteristic of prospect poetry in the eighteenth century Numerous other writers quickly followed Dyer's example including George Keate William Whitehead and William Parsons The tendency by these poets to write about the ruins of Rome from a subjective point of view was one of the strongest themes in what Northrop Frye has called the Age of Sensibility Although the renewed interest in Roman ruins lasted well into the nineteenth century influencing Romantic poets from Lord Byron to William Wordsworth the evolution of this type of verse was a gradual process it originated with Du Bellay s poem continued through seventeenth century paintings by Claude Lorrain and Salvator Rosa along with the later art of Piranesi and Pannini and reached maturity with the poetic interest in the imagination in the eighteenth century All of these factors especially the tendency of poets to record their subjective feelings and insights concerning the ruins are elements

that proved to be instrumental in the eventual development of Romanticism The Poetics of Ruins in Renaissance **Literature** Andrew Hui, 2017-01-02 The Renaissance was the Ruin naissance the birth of the ruin as a distinct category of cultural discourse one that inspired voluminous poetic production For humanists the ruin became the material sign that marked the rupture between themselves and classical antiquity In the first full length book to document this cultural phenomenon Andrew Hui explains how the invention of the ruin propelled poets into creating works that were self aware of their absorption of the past as well as their own survival in the future Ruin Memories Biørnar Olsen, Þóra Pétursdóttir, 2014-04-24 Since the nineteenth century mass production consumerism and cycles of material replacement have accelerated increasingly larger amounts of things are increasingly victimized rapidly and made redundant At the same time processes of destruction have immensely intensified although largely overlooked when compared to the research and social significance devoted to consumption and production The outcome is a ruin landscape of derelict factories closed shopping malls overgrown bunkers and redundant mining towns a ghostly world of decaying modern debris normally omitted from academic concerns and conventional histories. The archaeology of the recent or contemporary past has grown fast during the last decade This development has been concurrent with a broader popular artistic and scholarly interest in modern ruins in general Ruin Memories explores how the ruins of modernity are conceived and assigned cultural value in contemporary academic and public discourses reassesses the cultural and historical value of modern ruins and suggests possible means for reaffirming their cultural and historic significance Crucial for this reassessment is a concern with decay and ruination and with the role things play in expressing the neglected unsuccessful and ineffable Abandonment and ruination is usually understood negatively through the tropes of loss and deprivation things are degraded and humiliated while the information knowledge and memory embedded in them become lost along the way Without even ignoring its many negative and traumatizing aspects a main question addressed in this book is whether ruination also can be seen as an act of disclosure If ruination disturbs the routinized and ready to hand to what extent can it also be seen as a recovery of memory as exposing meanings and presences that perhaps are only possible to grasp at second hand when no longer immersed in their withdrawn and useful reality Anybody interested in the archaeology of the contemporary past will find Ruin Memories an essential guide to the very latest theoretical research in this emerging field of archaeological thought Oxford Thesaurus of English Maurice Waite, 2009-08-13 The leading single volume English thesaurus explores the richness of the English language with hundreds of thousands of synonyms and antonyms and thousands of example sentences drawn from the Oxford English Corpus finds the word you need guickly with carefully chosen and arranged synonyms broadens your vocabulary and finds solutions to word puzzles and crosswords with hundreds of thematic word lists and helps express yourself more accurately with hundreds of Choose the Right Word boxes exploring the difference between similar words Book Jacket One **Hundred Modern Scottish Poets** David Herschell Edwards. 1881 The Little-known Small House Ruins in the

Shakespeare's Ruins and Myth of Rome Maria Del Sapio Garbero, 2021-12-30 Rome was tantamount to its ruins a dismembered body to the eyes of those Italians and foreigners who visited the city in the years prior to or encompassing the lengthy span of the Renaissance Drawing on the double movement of archaeological exploration and creative reconstruction entailed in the humanist endeavour to resurrect the past ruins are seen as taking precedence over myth in Shakespeare s Rome They are assigned the role of a heuristic model and discovered in all their epistemic relevance in Shakespeare s dramatic vision of history and his negotiation of modernity This is the first book of its kind to address Shakespeare s relationship with Rome's authoritative myth archaeologically by taking as a point of departure a chronological reversal namely the vision of the eternal city as a ruinous scenario and hence the ways in which such a layered silent and aporetic scenario allows for an archaeo anatomical approach to Shakespeare's Roman works Spenser's Ruins and the Art of **Recollection** Rebeca Helfer, 2006-01-01 Beginning with the origins of mnemonic strategies in epic tales Helfer examines how the art of memory speaks to debates about poetry and its place in culture from Plato to Spenser's present day A Notice of the Ancient Ruins in Arizona and Utah Lying about the Rio San Juan William Henry Jackson, 1876 Res Francesco Pellizzi, 2014-03-10 RES 63 64 includes Source and trace by Christopher S Wood Timelessness fluidity and Apollo s libation by Milette Gaifman A liquid history Blood and animation in late medieval art by Beate Fricke Guercino s wet drawing by Nicola Suthor The readymade metabolized Fluxus in life by David Joselit and other papers
