*Charlotte Brontë from the Beginnings* Judith E. Pike, Lucy Morrison, 2016-09-19 Composed of serialized works poems short tales and novellas Charlotte Brontë's juvenilia merit serious scholarly attention as revelatory works in and of themselves as well as for what they tell us about the development of Brontë as a writer This timely collection attends to both critical strands positioning Brontë as an author whose career encompassed the Romantic and Victorian eras and delving

into the developing nineteenth century's literary concerns as well as the growth of the writer's mind. As the contributors show, Brontë's authorship took shape among the pages of her juvenilia as figures from Brontë's childhood experience of the world such as Wellington and Napoleon transmuted to her fictional pages while her siblings' works and worlds both overlapped with and extended beyond her own.

**Light from the East** Alexei V. Nesteruk, In this unique volume a new and distinctive perspective on hotly debated issues in science and religion emerges from the unlikely ancient Eastern Orthodox Christian tradition. Alexei Nesteruk reveals how the Orthodox tradition, deeply rooted in Greek Patristic thought, can contribute importantly in a way that the usual Western sources do not. Orthodox thought, he holds, profoundly and helpfully relates the experience of God to our knowledge of the world. His masterful historical introduction to the Orthodox traditions not only surveys key features of its theology but highlights its ontology of participation and communion. From this Nesteruk derives Orthodoxy's unique approach to theological and scientific attribution. Theology identifies the underlying principles (*logoi*) in scientific affirmations. Nesteruk then applies this methodology to key issues in cosmology: the presence of the divine in creation, the theological meaning of models of creation, the problem of time and the validity of the anthropic principle, especially as it relates to the emergence of humans and the Incarnation. Nesteruk's unique synthesis is not a valorization of Eastern Orthodox thought so much as an influx of startlingly fresh ideas about the character of science itself and an affirmation of the ultimate religious and theological value of the whole scientific enterprise.
